## Exam Sample Salesforce Analytics-DA-201 Questions, Analytics-DA-201 Pass Guaranteed

Our company has the highly authoritative and experienced team. In order to let customers enjoy the best service, all Analytics-DA-201 exam prep of our company were designed by hundreds of experienced experts. Our Analytics-DA-201 test questions will help customers learn the important knowledge about exam. If you buy our products, it will be very easy for you to have the mastery of a core set of knowledge in the shortest time, at the same time, our Analytics-DA-201 Test Torrent can help you avoid falling into rote learning habits. You just need to spend 20 to 30 hours on study, and then you can take your exam. In addition, the authoritative production team of our Analytics-DA-201 exam prep will update the study system every day in order to make our customers enjoy the newest information.

## Salesforce Analytics-DA-201 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S<br>• 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP. |
| Topic 2 | • Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S<br>• 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices. |
| Topic 3 | • ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud. |
| Topic 4 | • ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications. |

## Salesforce Certified Tableau Data Analyst Sample Questions (Q59-Q64):

**NEW QUESTION # 59**
A Data Analyst has the following chart that shows the cumulative volume of sales from various dates.
The analyst wants the months to appear as shown in the following chart.
What should the analyst do?

- A. Convert the date to Continuous
- B. Change the Sort Order
- C. Convert the date to Attribute
- D. Convert the date to Exact Date

**Answer: A**

**NEW QUESTION # 60**
You have the following dataset.
Yon need to calculate the ranking shown in the Rank field.
How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula ?

**Answer:**

Explanation:
Explanation:
To calculate the ranking shown in the Rank field, you need to use the RANK_UNIQUE function, which returns the unique rank of each value in a partition. You need to specify the expression as SUM([Sales]), which calculates the total sales for each product. You also need to specify the order as descending, which means that the highest sales will have the lowest rank. Finally, you need to specify the restart as every
[Category], which means that the ranking will reset for each category. References: https://help.tableau.com /current/pro/desktop/en-us/functions_functions_tablecalculation.htm https://help.tableau.com/current/pro /desktop/en-us/calculations_calculatedfields_lod_rank.htm

**NEW QUESTION # 61**
You have a dashboard that contains confidential information about patients health. The data needs to always be up to date tor a team of healthcare workers How should you share me dashboard with the healthcare workers?

- A. Publish the dashboard to Tableau Server
- B. Export the dashboard as a .twbx
- C. Print the dashboard to PDF
- D. Publish the dashboard to Tableau Public

**Answer: A**

Explanation:
To share a dashboard that contains confidential information about patients health and needs to always be up to date for a team of healthcare workers, you should publish it to Tableau Server. This will allow you to control who can access and interact with your dashboard, as well as schedule automatic refreshes of your data source or extract. Publishing to Tableau Public would expose your data to anyone on the internet, printing to PDF would not update your data, and exporting as a .twbx would require sending a large file that might not be compatible with other versions of Tableau. References: https://help.tableau.com/current/pro/desktop/en-us /publish_workbooks_share.htm https://help.tableau.com/current/pro/desktop/en-us /publish_workbooks_tableauserver.htm
When sharing sensitive and confidential information that needs to be kept up-to-date, such as patient health data for a team of healthcare workers, the best practice is to publish the dashboard to Tableau Server. Tableau Server is designed for secure, controlled access and can be configured to ensure that data is refreshed as needed. Publishing to Tableau Public is not secure for confidential data, printing to PDF or exporting as a .
twbx does not allow for live data updates.

**NEW QUESTION # 62**
You have the following primary data source that contains a dimension named Dorm_Code.
You receive the following secondary data source that contains updated dorm codes.
You need to bring the updated dorm codes into Tableau and use the codes in existing visualizations. The new dorm codes must use the existing field name of Dorm_Code.
What should you do?

- A. Bring in the secondary data source as a union.
- B. Create a data blend and select Edit Primary Aliases to replace the primary data source alias values with values from the secondary data source
- C. Bring in the secondary data source by using relationships. From the Data pane, right-click Dorm_Name select Replace References, and then select Dorm_Name_New
- D. Bring in the secondary table as a left join to the primary data source. From the Data Source page, select Create Calculated Field in the Dorm_Name field and enter [Dcrm_Name_New] in the calculation window

**Answer: C**

Explanation:
* Using relationships: You can use relationships to link the secondary data source with the primary data source based on a common field. This will allow you to use fields from both data sources in your visualization without creating new fields or duplicating data. You can then replace references to update the dimension values. For example, you can use relationships to link the updated dorm codes with the primary data source and then replace Dorm_Code with Dorm_Code_New in your visualization.
https://community.tableau.com/s/question/0D54T00000C5ldZSAR/update-data-view-based-on-dimension To update existing visualizations with new codes without changing the field name, using relationships to bring in the secondary data source is appropriate. Then using Replace References allows you to update the references from the old dorm codes to the new ones while maintaining the existing field name.

**NEW QUESTION # 63**
A Data Analyst has a dataset that contains people and the awards they have won.
Which formula should the analyst use to get the number of different types of awards that have been won?

- A. COUNT ( [Award] )

- B. COUNTD ( [Award] )
- C. WINDOW_COUNT ( [Award] )
- D. COUNTD ( [NAME] )

**Answer: B**

**NEW QUESTION # 64**
.....

We have always been made rapid progress on our Analytics-DA-201 training materials because of the merits of high-efficiency and perfect after-sales services online for 24 hours. Studying with our Analytics-DA-201 actual exam, you can get the most professional information and achieve your dreaming scores by your first go. We can claim that as long as you study with our Analytics-DA-201 Exam Guide for 20 to 30 hours, you will pass your Analytics-DA-201 exam confidently.
