Cisco 300-835 exam is a 90-minute exam that consists of 60-70 questions. 300-835 exam focuses on the skills and knowledge required to implement and automate Cisco Collaboration Solutions. 300-835 exam covers a wide range of topics, including APIs, programming concepts, collaboration APIs, automation and orchestration tools, and software development kits. 300-835 exam is designed to test the candidate's understanding of these topics and their ability to apply them to real-world scenarios.

With the model shift of the intent-based networking, software and network become more interconnected every day. That is why the professionals in the IT field have to improve their skills in different subject areas. Many vendors provide various certifications to choose from, and if you want to combine your experiences with the abilities presented by Cisco, you will attain what you need. Thus, if you want to evaluate your knowledge of the implementation of the apps, which automate as well as extend the Cisco Collaboration platforms, you should find out all the details of the Cisco 300-835 exam. This test leads you to three certifications, such as Cisco Certified DevNet Specialist – Collaboration Automation and Programmability, CCNP Collaboration, and Cisco Certified DevNet Professional. Please note that this is a concentration exam. This means that you also have to sit for the core tests, which are Cisco 350-901 (for Cisco Certified DevNet Professional) and Cisco 350-801 (for CCNP Collaboration), to get certified.

Official Cisco Training for 300-835 Exam

If you're looking for the best resource to prepare for Cisco 300-835, enroll in the official training course. This is a reliable instrument in calibrating your skills in Cisco Collaboration automated and programmable technologies for both cloud and on-premise setup. The course also cultivates your adeptness in working with platforms and processes to capably deal with various communication challenges. Some of the pivotal tools addressed in the lectures are Cisco Unified Communications Manager, Cisco Unity Connection, Cisco Webex Meetings, and Cisco Collaboration Endpoints, among others. In addition, you will obtain insights on the proper usage of APIs interfaces, including REST, SOAP, JSON, XML, and Python.

Uniquely, this training is not all about discussion. It comes with comprehensive lessons accompanied by practical labs to give you the right set of knowledge and technical abilities. For the lectures, these highlight more on the implementation side of automation and programmability that are tailored to the needs of the network infrastructure. In contrast, the hands-on labs largely point out your capacity to streamline, design, and organize web services in accordance with the requirements set by the organization. All these sections are squeeze into 3 days for instructor-led training. Other options include the virtual program led by an instructor that lasts for 3 days, featuring web-based classes and practice labs, or 3 days of self-paced study with E-learning materials.

NEW QUESTION # 66

When the behavior of a Cisco collaboration device is customized, which use case requires an external control system because implementing JavaScript macro does not suffice?

- A. Implement an in-room control panel for speed-dialing.
- B. Trigger a "room-reset" to restore default configurations.
- C. Move the shutters up and down.
- D. Add a Join Webex meeting button to the touch panel.

Answer: C

Explanation:

You can make speed dial via macros, and obviously you need something external to move shutters.
