CIPS Level 4 – Diploma in Procurement and Supply

Scope and influence of procurement and supply [L4M1]

Sample Questions

L4M1 Sample Questions V2 Sep 2023

Leading global excellence in procurement and supply

In a knowledge-based job market, learning is your quickest pathway, your best investment. Knowledge is wealth. Modern society needs solid foundation, broad knowledge, and comprehensive quality of compound talents. Our L4M1 certification materials can help you transfer into a versatile talent. Many job seekers have successfully realized financial freedom with the assistance of our L4M1 test training. All your dreams will be fully realized after you have obtained the L4M1 certificate. Finding a good paying job is available for you. Good chances are few. Please follow your heart.

The company is preparing for the test candidates to prepare the L4M1 exam guide professional brand, designed to be the most effective and easiest way to help users through their want to get the test L4M1 certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market. Our L4M1 practice materials have been well received by the users, mainly reflected in the following advantages.

>> Preparation L4M1 Store <<

L4M1 Exam Format & Braindumps L4M1 Pdf

Our company really took a lot of thought in order to provide customers with better L4M1 learning materials. First of all, in the setting of product content, we have hired the most professional team who analyzed a large amount of information and compiled the most reasonable L4M1 Exam Questions. And you can find the most accurate on our L4M1 study braindumps. Secondly, our services are

24/7 available to help our customers solve all kinds of questions.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q29-Q34):

NEW QUESTION # 29

Describe 3 stages of the sourcing cycle that occur in the post-contract award stage (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach the question

Your answer should provide details on 3 of the following:

- Contract Award and Implementation
- Warehouse Logistics
- Contract performance and Improvement
- Supplier Relationship Management
- Asset Management

Because the question is only asking for 3 stages, you're going to have to go much more into detail for each stage, giving lots of information about why each stage is important and examples. You could consider thinking of an example procurement you have done recently and explaining the stages for that. Or you could take a hypothetical procurement too. Either will get you the same marks. Pick the three that you can write the most about.

Essay Plan

Introduction - explain that sourcing of goods and the role of Procurement doesn't end once a contract is signed. There is ongoing management and processes which must be carried out to ensure success.

Paragraph 1 - Contract Performance and Improvement

This is about ensuring contract obligations are fulfilled. Contract administration includes P2P procedures, database management, budgeting / costs monitoring, reporting and dispute resolution

Procurement's role may be in managing contract performance through the use of SLAs and / or KPIs. This can be done via reporting, using a Supplier Scorecard and meeting regularly to discuss.

It's important KPIs are measured and that there are consequences for failing to meet them. An example of consequences could be using a Performance Improvement Plan.

Contract Management also includes updating the contract where required - e.g. issuing variations to contract and updating the change control log

Another important aspect of this is ensuring the costs remain within scope of the budget

Contract performance can be compared if you have several suppliers delivering the same goods- could use a Factor Rating Method.

Performance could be measured against several criteria such as on time deliveries, response time of supplier, number of complaints.

Paragraph 2 - Supplier Relationship Management

There is a difference between managing the contract and managing the supplier relationship. It's possible to have excellent contract performance and a terrible relationship. However, the two are generally linked- where there is a good relationship, the contract often performs well.

The supplier management approach depends on where the relationship falls on the relationship spectrum (e.g. transactional or collaborative)

This involves; maintaining regular contact with the supplier, motivating the supplier, working collaboratively with them (e.g. on performance issues or resolving any disputes)

Incentivising the supplier leads to collaboration and mutual support

To assess or rank suppliers you could use a vendor rating method or supplier evaluation forms

Supplier relationship management may involve investing in the supplier- e.g. through training or technology sharing Paragraph 3 - Asset Management

Includes creating a post contract 'lessons-learned'

Assessments should be carried out to determine if business requirements have changed, whether the agreement is still required and fit for purpose, what can be learnt from the process and how improvements can be incorporated next time.

This is the final stage of the Procurement Cycle and takes us back to the start of cycle, which begins again when the item needs to be reprocured

Whole life costing should be considered at this stage: this is the total cost of ownership over the life of an asset. The concept is also known as life-cycle cost (LCC) or lifetime cost, and is commonly referred to as "cradle to grave" or "womb to tomb" costs.

Generally used on large purchases such as machinery and vehicles. Full Asset Management may not necessary for direct cost items such as raw materials incorporated into final goods.

Considerations may include; costs of running the asset, how long it will perform, insurance, maintenance, opportunity costs, disposing of the asset.

Also consider environmental and social impacts of the procurement.

Conclusion - it is important that procurement are involved at every stage of the cycle, not just in the pre- award stages. Procurement can add value at every stage.

Tutor Notes

- Depending on the examples you choose to use, you could talk about how the type of item procured could impact on the different stages. For example, high risk purchases may require more contract management than low risk purchases, and capital expenditure items such as new machinery may require more attention to the Asset Management stage.

- You could also think about how procurement adds value at each of the stages.

- Study guide p. 79

NEW QUESTION # 30

Describe the four main ways that a Public Sector organisation can procure goods or services (25 points)

Answer:

Explanation:

See the solution inExplanation partbelow.

Explanation:

How to approach this question

- This question is testing to see if you know the 4 procurement procedures allowed in the Public Sector which are: open, restricted, competitive dialogue, competitive dialogue with negotiation. The Public Sector is limited in how it can procure due to the Public Contract Regulations, so things like Early Supplier Involvement isn't an option.

- The question doesn't specifically say it has to be these four, but these are the ones in the book. Because of the vagueness you could say something like running a competition and awarding via a Framework instead.

Talking about Public Private Partnerships could also be appropriate but that is outside of the scope of this module (and Level! It comes up in Level 5). These answers would be accepted.

- Also note that it doesn't say the UK in the question, so if you answered this about your own country, that would be fine.

Example Essay

Each country's government has its own regulations relating to how goods, services and works can be procured.

The UK's procurement rules is currently dictated by the Public Procurement Regulations 2015 which is based off EU Procurement Directives. This piece of legislation will likely be superseded in Autumn 2023 due to the UK leaving the EU. Until this point, the PCR allows UK public sector organisations to procure in the following ways: open, restricted, competitive dialogue, competitive dialogue with negotiation Open Procedure: This is the most straightforward and transparent method. A local government issues an open tender for office supplies. Any company that provides these supplies can submit a bid. The government then evaluates all bids based on price, quality, and delivery terms to select the supplier. Any interested supplier can submit a tender. The process is open from the outset, and all submissions are evaluated against pre-defined criteria. This procedure is used when you wish to attract a large number of bidders for the opportunity and is often posted online on a platform such as Find A Tender.com so that suppliers can find the opportunity. If it is a large contract it is a requirement for details to be published on OJEU. The disadvantage of using this approach is that you may receive many bids which can be time-consuming.

Restricted Procedure: In this method, the public sector organization invites suppliers to express their interest.

After a preliminary selection process, only those who meet the criteria are invited to submit tenders. This is used when the opportunity is more technical, for example a healthcare authority needs specialized medical equipment. The authority would requests expressions of interest from suppliers. After reviewing these, it invites a shortlist of qualified suppliers to submit detailed bids for further evaluation. The benefit of this approach is that unsuitable suppliers are weeded out early, this saving time.

Competitive Dialogue: This is used for complex contracts where the organization cannot define the technical means or legal or financial make-up of a project in advance. A dialogue with selected bidders is conducted to develop one or more suitable solutions, which are then put out to tender. For example, a local council is planning a new public transport system but is unsure of the best solution. It enters into a dialogue with several firms specializing in transport systems to explore various options before requesting final bids based on the developed solutions. Suppliers can be eliminated through the dialogue process based on pre-determined criteria.

Competitive Dialogue with Negotiation: Similar to competitive dialogue, but with an added phase of negotiation. It's used for particularly complex projects where the needs cannot be met without adaptation of readily available solutions. For example: a government department requires a complex IT system that integrates various existing systems. It engages in a competitive dialogue to develop potential solutions and then negotiates with bidders to refine these solutions before finalizing the contract. This procedure allows for negotiations with the winning bidder to readjust requirements if needed.

The approach taken by a public sector organisation will depend on a number of factors, but in particular the complexity of the project and whether there is a pre-determined scope. Other factors to consider include; the time-sensitivity of the project and how quickly the procurement exercise needs to be completed, the amount of suppliers in the marketplace, and whether suppliers

need to be consulted on to create the specification.

Tutor Notes

- These four procedures are outlined on p.212. Post PCR 2015, these procedures may change, or be renamed, depending on what the UK government decide to do. So if you're taking this exam in November 2024 or later, note that the study guide is now out of date and you should conduct a bit of your own research.
- You could also mention that the value of spend is a factor when public sector organisations are deciding on a procurement route. For really low value stuff, like they need a new sofa for the office, most organisation's requirements are to get three quotes and compare them. That isn't in the study guide, it's just real life (I've worked in this sector so know thisstuff). Each organisation will have its own thresholds for what procurement route needs to be taken, so I wouldn't comment on that but generally if it's under £10k there's quite a bit of flexibility. Where you reach 'threshold' then things become very serious and there's much more scrutiny.
- Thresholds are not part of the syllabus so don't worry about learning this. But if you're interested have a read here: New public procurement thresholds from 1 January 2024 - BM Insights - Blake Morgan

NEW QUESTION # 31

Industry Sectors can be classified as Primary, Secondary and Tertiary. What is meant by an 'industry sector'? Describe the main characteristics of and types of business you will find in these. (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- The first question can be a simple introduction with a bit of extra detail. The main 'meat' to your essay is going to be explaining the three sectors, their characteristics and example businesses.
- Aim for three well explained characteristics as a minimum

Example essay

An industry sector refers to a broad category or grouping of businesses and economic activities that share similar characteristics and functions in the production and distribution of goods and services. These sectors are often classified into three main categories: Primary, Secondary, and Tertiary. Here are the main characteristics and types of businesses you will find in each of these industry sectors:

1. Primary Sector:

*Characteristics: The primary sector involves activities related to the extraction and production of raw materials and natural resources directly from the environment. This sector relies on nature and weather patterns: businesses in the primary sector are highly dependent on natural factors such as climate, weather, soil quality, and geographic location. These factors can significantly impact the productivity and profitability of primary sector activities. Extreme weather such as floods can severely impact this sector. Moreover there is a seasonality to this sector and many activities in the primary sector require a significant amount of manual labour, particularly in agriculture, fishing, and forestry. However, modern technology has also been integrated into some primary sector activities to increase efficiency.

*Types of Businesses: a. Agriculture: This includes farming, crop cultivation, livestock raising, and forestry.

b. Mining and Extraction. c. Fishing and Aquaculture: Forestry and Logging: Includes the harvesting of timber and related activities.

2. Secondary Sector:

*Characteristic: The secondary sector focuses on the transformation of raw materials and intermediate goods into finished products. The main characteristic of the sector is that it requires high levels of machinery and industrial techniques. There is a reliance on technology. Secondly, the secondary sector adds significant value to the products compared to their raw material form. This value addition is achieved through processing, assembly, and quality control processes. The third main characteristic is standardisation: Manufacturing processes often involve standardization of components and processes to ensure consistency and quality in the final products. Standardization helps in economies of scale.

*Types of Businesses: a. Manufacturing: This sector includes factories and plants that produce tangible goods such as automobiles, electronics, textiles, and machinery. b. Construction: Involves the building and construction of structures like buildings, bridges, and infrastructure. c. Utilities: Companies providing essential services like electricity, gas, and water supply fall into this category.

3. Tertiary Sector:

*Characteristic: The tertiary sector is also known as the service sector and involves businesses that offer various services to consumers and other businesses. The main defining characteristic of this sector is Intangibility: Services are intangible and cannot be touched or held. They are often experienced directly by consumers through interactions with service providers or through the use of technology. Secondly, High Human Involvement: The tertiary sector relies heavily on a skilled and often highly educated workforce to deliver services effectively. This can include professionals such as doctors, lawyers, teachers, and customer service representatives. Lastly, Customization: Many services are customized to meet the specific needs and preferences of individual clients or customers. This personalization is a key characteristic of the tertiary sector. For example Legal Advice will always be different depending on the specific needs of the client.

*Types of Businesses: a. Retail and Wholesale: Businesses engaged in the sale of goods to consumers or to other businesses. b. Healthcare and Education: This includes hospitals, clinics, schools, colleges, and universities. c. Financial Services: Banks, insurance companies, and investment firms are part of this sector. d.

Hospitality and Tourism: Hotels, restaurants, travel agencies, and entertainment venues fall into this category.

e. Professional Services: Legal, accounting, consulting, and IT services are part of the tertiary sector.

These industry sectors represent the different stages of economic activity, with the primary sector providing raw materials, the secondary sector processing and manufacturing goods, and the tertiary sector offering services and distribution. Together, these sectors form the backbone of an economy, contributing to its growth and development Tutor Notes

- I've gone overboard on naming the types of organisation in the different sectors. You don't have to remember all of these. 3 examples is sufficient to get good marks. I've just named them all so you can see what could be considered a right answer.

- Some people are talking about Quaternary and Quinary Sectors. CIPS is not one of those people, so don't worry if you come across those terms in any further reading. But FYI

1.

*Quaternary Sector: This sector involves knowledge-based activities, including research and development, information technology, and data analysis.

*Quinary Sector: The quinary sector comprises high-level decision-making and leadership roles in areas such as government, academia, healthcare, and top-level corporate management.

- LO 4.1 p.196

NEW QUESTION # 32

(a) Outline FIVE procedures that could be included in the procurement policy manual. (15 marks)

(b) Analyse how TWO Of these procedures can positively influence procurement activities and organisational outcomes for BetaCo. (10 marks)

BetaCo Inc.

BetaCo Inc. is a medium-sized electronics design and manufacturing company that sells audio equipment to event management customers for

use in stadiums and festivals. BetaCo has significantly increased its sales over the last five years and is now looking to establish more contracts with new customers. BetaCo Inc. is aware that new customers will require it to have robust procurement processes in place that minimise organisational risk.

Currently, all procurement activities are dealt with by BetaCo's small, customer-orientated project teams. Each project team makes its own procurement decisions with limited central oversight and does not follow standardised processes. This type of activity has resulted in BetaCo frequently encountering overspending on projects, and senior management is concerned that there is a lack of control over what products and services the project teams buy. In addition, suppliers regularly complain that their invoices are not paid on time, which has caused issues for future purchases.

To address these challenges, BetaCo has decided to create a centralised procurement and supply management department. BetaCo has recently appointed Pat Kennedy as its procurement and supply manager. BetaCo has also recruited three senior buyers, five buyers and two assistant buyers, who will join the company in the next few months.

Pat's first task is to establish a procurement policy manual. The manual will contain a set of procedures that can be followed by the new procurement team and it will control the company's procurement activities to ensure that the issues BetaCo is facing are effectively managed.

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

(a) Five Procedures to Include in BetaCo's Procurement Policy Manual

* Purchase Requisition and Approval Procedure

* All procurement requests must be formally submitted through standardized purchase requisition forms and approved by designated authorities before any purchase action is taken.

* This ensures control over spending and adherence to budgets.

* Supplier Selection and Evaluation Procedure

* A structured process to identify, assess, and approve suppliers based on criteria such as quality, reliability, price, and compliance with BetaCo's standards.

* Supplier performance should be regularly reviewed to maintain quality and reliability.

* Purchase Order (PO) Management Procedure

* Clear guidelines on raising, issuing, and tracking purchase orders to suppliers, ensuring orders are placed only after necessary

approvals and conform to agreed terms.

* Purchase orders serve as formal contracts protecting both BetaCo and suppliers.

* Invoice Processing and Payment Procedure

* Defines steps for receiving, verifying, and authorizing supplier invoices, followed by timely payment according to agreed payment terms.

* This avoids late payments and maintains good supplier relationships.

* Conflict of Interest and Ethics Compliance Procedure

* Policies requiring employees to declare any conflicts of interest and adhere to ethical standards in procurement activities to ensure transparency and fairness.

* This prevents fraud, corruption, and protects BetaCo's reputation.

(b) Analysis of How TWO Procedures Positively Influence Procurement Activities and Organisational Outcomes for BetaCo

1. Purchase Requisition and Approval Procedure

* Positive Influence on Procurement Activities: Introducing a formal purchase requisition and approval procedure provides BetaCo with much-needed control and oversight over spending, addressing the current issue of overspending by project teams. It ensures that all procurement requests are validated against project budgets and company policies before any purchase commitment is made.

* Impact on Organisational Outcomes: This procedure supports financial discipline and accountability, reducing uncontrolled expenditures and improving cost management. It also creates a clear audit trail for procurement decisions, helping senior management monitor and enforce compliance, thus reducing organisational risk.

2. Invoice Processing and Payment Procedure

* Positive Influence on Procurement Activities: By implementing a standardized invoice verification and timely payment procedure, BetaCo can resolve the existing problem of late payments to suppliers.

This ensures invoices are matched to purchase orders and delivery notes, approved promptly, and paid within agreed terms.

* Impact on Organisational Outcomes: Timely payments strengthen supplier relationships, enhancing trust and reliability in supply continuity, which is critical for BetaCo's growing customer base and production needs. It also helps avoid disputes or disruptions caused by delayed payments, contributing to smoother operations and better supplier cooperation.

Conclusion:

For BetaCo, incorporating structured procurement procedures into the policy manual is essential for centralising control, improving transparency, and reducing risks associated with decentralized procurement activities. Specifically, purchase requisition and approval alongside invoice processing procedures will directly address current challenges, leading to improved financial control, supplier relationships, and operational efficiency, ultimately supporting BetaCo's growth ambitions and reputation.

NEW QUESTION # 33

Describe the main differences between the three economic sectors: public, private and third. Your answer may make reference to the following: funding, ownership, shares, objectives and administration (25 marks)

Answer:

Explanation:

See the solution inExplanation partbelow.

Explanation:

How to approach this question

- Sometimes CIPS give you a steer on how to answer the question. My advice is to follow it. The question says you MAY make reference to the following, but I'd use those hints as a guide for content- a paragraph on each and you're done!

- When you've got a 'may make reference to' hint - this means you can completely ignore it and do your own thing and bring in your own ideas. May means it's optional, so you wouldn't be penalised for this. However, you have to consider the examiner's mark scheme- it will detail options of stuff you can write for funding, ownership etc. Then there will be a line at the bottom saying something like 'accept other options such as x and y'. This leaves it up to the examiner to decide whether what you've said is relevant. I'd personally not leave it up to chance you get a lenient examiner. If you write what's definitely going to be on their mark scheme, you're more likely to get more points.

Example Essay

The modern economy is a complex tapestry of various sectors, each with its own distinct characteristics and functions. The three prominent sectors are the public sector, the private sector, and the third sector. These sectors differ significantly in terms of their funding mechanisms, ownership structures, objectives, the concept of shares, and their administration.

Firstly, the public sector is predominantly funded by the government through taxation, grants, and other forms of public revenue. Its very existence hinges on the provision of essential services and the fulfilment of societal needs. These organizations are owned by the government, be it at the federal, state, or local level. Unlike the private sector, the concept of shares doesn't apply in the public sector. Instead, the government allocates budgets to various departments and agencies for public services and projects. The primary objectives of the public sector revolve around the welfare of the citizens, including the provision of education, healthcare, defence, and infrastructure. It is characterized by bureaucratic administration, with decision-making processes subject to governmental regulations and oversight. A prime example is public schools and healthcare systems, which are funded and operated by the

government with the primary objective of ensuring universal access to education and healthcare services.

In contrast, the private sector operates on a starkly different paradigm. It is primarily funded by private capital, investment, and profit-seeking activities. Private individuals and corporations own these entities, with ownership shares often represented by stocks. Shareholders invest capital in exchange for ownership stakes and the potential for dividends. The central objective in the private sector is profit maximization, driven by competition in the market. Companies in the private sector are administered by management teams and boards of directors, with decisions guided by market forces. Apple and ExxonMobil are examples of private sector entities, privately owned and publicly traded, with profit motives at their core. Shareholders invest in these companies with the expectation of financial returns.

Lastly, the third sector, often referred to as the nonprofit or voluntary sector, represents a unique economic sphere. It relies on a combination of funding sources, including donations, grants, and earned income, but not taxation. Third sector organizations are not owned by individuals or shareholders; instead, they are governed by boards of directors or trustees. Unlike the private sectors, shares are not applicable in the third sector. These organizations do not seek to distribute profits to owners. The primary objective of the third sector is to serve a social or community purpose, such as addressing societal issues, promoting social change, and providing services that benefit the public. Administration in this sector is overseen by non-profit boards, and it heavily relies on volunteers, philanthropy, and community engagement. For example, the Red Cross operates with the objective of providing humanitarian aid and disaster relief, relying on donations and volunteers to fulfil its mission. Any profits that are made are reinvested into the organisation to further its mission.

In conclusion, the public, private, and third sectors represent diverse economic domains, each with its own funding mechanisms, ownership structures, objectives, and administrative models. These sectors play essential and complementary roles in society, contributing to economic development, public welfare, and social progress. Together, they form the foundation of a balanced and dynamic economic landscape.

Tutor Notes

- I've structured this essay with a paragraph on each sector, but you could have done a paragraph on each theme, thus having 5 paragraphs instead of 3. Either approach works.
- You've got 5 things and 3 sectors, that equals 15 marks. If you give an example of each and a strong intro and conclusion, that's full marks.
- See LO 4.1 p. 203 - there's a cute table with this information on.

NEW QUESTION # 34

.....

If you feel that you purchase ActualTestsIT CIPS L4M1 exam training materials, and use it to prepare for the exam is an adventure, then the whole of life is an adventure. Gone the furthest person is who are willing to do it and willing to take risks. Not to mention that ActualTestsIT CIPS L4M1 exam training materials are many candidates proved in practice.
