

100% Pass Quiz Perfect VMware - Reliable 2V0-13.25 Test Pass4sure

VMware 2V0-13.25 VMware vSphere 8.x Professional

100% Pass Quiz VMware - 2V0-21.23 - VMware vSphere 8.x Professional-High-quality Reliable Test Labs

The VMware 2V0-21.23 certification exam is a pivotal part of career development in the tech sector. Creating the VMware vSphere 8.x Professional (2V0-21.23) exam simulates your chances of passing a high-paying job interview. The preparation for the 2V0-21.23 exam can be challenging as it may require applicants to pass the 2V0-21.23 practice test questions they require to be successful in their pursuit.

To prepare for the VMware 2V0-21.23 certification exam, candidates can attend VMware approved training courses or use self-study materials such as books, videos, and practice exams. It is recommended that candidates have experience working with VMware vSphere 8.x before taking 2V0-21.23 exam. 2V0-21.23 exam consists of 70 multiple choice questions and has a time limit of 105 minutes. A passing score of 500 out of 550 is required to earn the certification.

VMware vSphere 8.x Professional exam tests a candidate on a variety of topics, including installation, configuration, and management of vSphere infrastructure. 2V0-21.23 exam also covers the deployment and management of virtual machines, as well as advanced topics such as vSphere networking, storage, and security. Facing the VMware 2V0-21.23 exam demonstrates a candidate's proficiency in VMware vSphere 8.x and a candidate's ability to manage complex virtual environments.

You may feel astonished and doubtful about this figure; but we do make our 2V0-13.25 exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our 2V0-13.25 test braindumps have grown up and have made huge progress. We pay emphasis on variety of situations and adopt corresponding methods to deal with. More successful cases of passing the 2V0-13.25 Exam can be found and can prove our powerful strength. As a matter of fact, since the establishment, we have won wonderful feedback and ceaseless business, continuously working on developing our 2V0-13.25 test prep. We have been specializing 2V0-13.25 exam dumps many years and have a great deal of long-term old clients, and we would like to be a reliable cooperator on your learning path and in your further development.

You will receive 2V0-13.25 exam materials immediately after your payment is successful, and then, you can use 2V0-13.25 test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover 2V0-13.25 study braindumps, they will definitely want to seize the time to learn. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with 2V0-13.25 Exam Materials, there is no way for you to waste time. The sooner you download and use 2V0-13.25 study braindumps, the sooner you get the certificate.

Free PDF 2026 2V0-13.25: Professional Reliable VMware Cloud Foundation 9.0 Architect Test Pass4sure

Choosing to participate in VMware certification 2V0-13.25 exam is a wise choice, because if you have a VMware 2V0-13.25 authentication certificate, your salary and job position will be improved quickly and then your living standard will provide at the same time. But passing VMware certification 2V0-13.25 exam is not very easy, it need to spend a lot of time and energy to master relevant IT professional knowledge. RealExamFree is a professional IT training website to make the training scheme for VMware Certification 2V0-13.25 Exam. At first you can free download part of exercises questions and answers about VMware certification 2V0-13.25 exam on www.RealExamFree.com as a try, so that you can check the reliability of our product. Generally, if you have tried RealExamFree's products, you'll very confident of our products.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q85-Q90):

NEW QUESTION # 85

A company will be expanding their existing VCF environment for a new application. The existing VCF environment currently has a management domain and two separate VI workload domains with different hardware profiles.

The new application has the following requirements:

- * The application will use significantly more memory than current workloads today.
- * The application will have a limited number of licenses to run on hosts.
- * Additional VCF and hardware costs have been approved for the application.
- * The application will contain confidential customer information that requires isolation from other workloads.

What design recommendation should the administrator document?

- A. Enough identical hardware for the management domain should be ordered to accommodate the new application requirements and a new workload domain should be designed for the application.
- **B. A new Workload domain with hardware supporting the memory requirements of the new application should be implemented.**
- C. Deploy a new consolidated VCF instance and deploy the new application into it.
- D. Purchase enough matching hardware to accommodate the new application's memory requirements and expand an existing cluster to accommodate the new application. Use host affinity rules to manage the new licensing.

Answer: B

Explanation:

The requirements demand memory capacity, licensing control, cost approval, and isolation.

Option B, "A new Workload domain with hardware supporting the memory requirements," satisfies all: a new VI domain in VCF 5.2 isolates workloads (via separate NSX instance), uses approved funds for high-memory hardware, and allows licensing via DRS affinity rules within the domain.

Option A (new VCF instance) is overkill, duplicating management overhead.

Option C (management domain hardware) misuses the management domain's purpose.

Option D (expanding existing cluster) risks isolation breaches. B leverages VCF's workload domain architecture effectively.

Reference: VMware Cloud Foundation 5.2 Architecture and Deployment Guide, Workload Domain Design; VMware vSphere 7.0 Documentation, DRS Affinity Rules.

NEW QUESTION # 86

An architect is responsible for the design of a VMware Cloud Foundation (VCF) Fleet and the following risk has been identified:

* RISK001: There is a risk that frequent infrastructure design changes may break Disaster Recovery (DR) plans and Service Level Objectives.

What should the architect suggest to mitigate this risk?

- **A. Develop a process to review and update DR plans between changes and schedule monthly end-to-end DR tests.**
- B. Limit infrastructure design change frequency to a maximum of once a month.
- C. Setup monitoring & alerting against defined infrastructure service level objectives.
- D. Configure VM replication with recovery point objective of 5 minutes or less for all workloads from the primary to DR site.

Answer: A

Explanation:

Comprehensive and Detailed Explanation (Based on VMware Cloud Foundation 9.0.3 and 9.0.1 Guides):

The VMware Cloud Foundation 9.0.3 Disaster Recovery Planning Guide emphasizes that testing and validation of DR plans must occur regularly and whenever infrastructure changes are made. It states:

"You can perform test runs periodically to ensure the existing disaster recovery plan works with underlying infrastructure and the configured RPO limit. VMware Live Recovery recommends users perform planned migration at regular intervals to validate the integrity of the existing DR plan." Additionally, the VCF 9.0.1 Design Blueprints specify that a well-defined process for reviewing and updating DR documentation between changes ensures continuity and compliance with defined Service Level Objectives (SLOs). Thus, the correct mitigation action is to establish a structured change management process that includes DR plan updates and monthly end-to-end validation tests. Simply limiting change frequency (option C) or setting replication intervals (option D) does not ensure DR plan integrity.

References (VMware Cloud Foundation documents):

- * VMware Cloud Foundation 9.0.3 Disaster Recovery Guide - "Validating and Testing DR Plans with VMware Live Recovery."
- * VMware Cloud Foundation 9.0.1 Design Guide - "Change Management and DR Validation Requirements."

NEW QUESTION # 87

What are the best practices for optimizing VMware storage performance using Broadcom NVMe SSDs?

- A. Enable write caching
- B. Enable TRIM for SSDs
- C. Use RAID 1 for data redundancy
- D. Use SSDs for VM datastores

Answer: A,B,D

Explanation:

Write caching, using SSDs for datastores, and enabling TRIM can optimize VMware storage performance.

NEW QUESTION # 88

During the design workshop, the customer stated the following requirement:

- * The solution will support secure communication.

Which design decision should be included in the logical design for the workload domain?

- A. Set promiscuous mode port group security policy to reject.
- B. Use a SHA-2 algorithm or higher for signed certificates.
- C. Verify all physical components used for the deployments are on the hardware compatibility list.
- D. Ensure the host servers have TPM 2.0 hardware.

Answer: B

Explanation:

Comprehensive and Detailed Explanation from VMware Cloud Foundation 9.0 Documentation:

According to VMware Cloud Foundation 9.0 Design Guide (Table 59, "Certificate Management Design Recommendations"), VMware explicitly mandates that "Use a SHA-2 algorithm or higher for signed certificates. The SHA-1 algorithm is considered less secure and has been deprecated." This recommendation (VCF-SEC-RCMD-CERT-002) is a foundational part of securing communication between management components and workload domains across the VCF environment.

The use of SHA-2 or higher ensures that all certificates used for SSL/TLS communication within the SDDC ecosystem (including vCenter, NSX Manager, and SDDC Manager) meet modern cryptographic standards to prevent vulnerabilities such as collision attacks. VMware Cloud Foundation enforces certificate management policies that require replacement of default VMCA-signed certificates with CA-signed certificates, and the SHA-2 algorithm ensures cryptographic integrity, authenticity, and resistance to tampering or impersonation.

This configuration directly satisfies the customer's requirement for secure communication in the logical design of the workload domain. It ensures data in transit between components-such as management clusters, workload domains, and external systems-remains encrypted and trustworthy, aligning with VMware's zero-trust and compliance-focused architectural principles.

References (VMware Cloud Foundation 9.0.1 Architecture Guide):

- * Table 59: Certificate Management Design Recommendations - "VCF-SEC-RCMD-CERT-002 Use a SHA-2 algorithm or higher for signed certificates."
- * VMware Cloud Foundation 9.0.1 PDF, pp. 306-308, 376, and 592 (Certificate Management Design Recommendations Sections).

* VMware Cloud Foundation Security Governance and Compliance Design Section (VCF-SEC-RCMD- CERT-002).

NEW QUESTION # 89

What key technologies support data protection and security standards in VMware environments using Broadcom hardware?

- A. VMware Site Recovery Manager
- B. VMware vSphere Encryption
- C. Broadcom Storage Security
- D. VMware NSX Distributed Firewall

Answer: A,B,C,D

Explanation:

VMware vSphere Encryption, Site Recovery Manager, Broadcom Storage Security, and NSX Distributed Firewall enhance data protection and security.

NEW QUESTION # 90

.....

Sharp tools make good work. Our 2V0-13.25 study quiz is the best weapon to help you pass the exam. After a survey of the users as many as 99% of the customers who purchased our 2V0-13.25 preparation questions have successfully passed the exam. And it is hard to find in the market. The pass rate is the test of a material. Such a high pass rate is sufficient to prove that 2V0-13.25 Guide materials has a high quality.

New 2V0-13.25 Test Blueprint: <https://www.realexamfree.com/2V0-13.25-real-exam-dumps.html>

Tens of thousands of our loyal customers relayed on our 2V0-13.25 preparation materials and achieved their dreams, VMware Reliable 2V0-13.25 Test Pass4sure And we are professional in this field for over ten years, As youIf you have more time at home, you can use the Software version of 2V0-13.25 exam materials, In order to build up your confidence for 2V0-13.25 exam dumps, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund.

I've been working out of the traditional office Reliable 2V0-13.25 Test Pass4sure environment for six years now, and there have been times while I have been writing that I will suddenly realize that, with the 2V0-13.25 exception of my girlfriend, I have not seen another living soul for four or five days.

2026 Reliable VMware 2V0-13.25: Reliable VMware Cloud Foundation 9.0 Architect Test Pass4sure

And if necessary, switch back to Photoshop, Tens of thousands of our loyal customers relayed on our 2V0-13.25 preparation materials and achieved their dreams, And we are professional in this field for over ten years.

As youIf you have more time at home, you can use the Software version of 2V0-13.25 exam materials, In order to build up your confidence for 2V0-13.25 exam dumps, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund.
