volume provisioning.

What must you install to enable the integration?

- A. OneView Global Dashboard
- **B. 3PAR Host Explorer**
- C. HPE SAN Network Advisor Enterprise
- D. HPE SAN Network Advisor Professional

Answer: B

Explanation:

To integrate HPE 3PAR StoreServ arrays into an HPE OneView environment for automated volume provisioning, the installation of the 3PAR Host Explorer is required. The 3PAR Host Explorer software facilitates the communication between the HPE 3PAR StoreServ storage array and the OneView management platform. This software collects detailed host configuration information, which is then used by HPE OneView to optimize the management and provisioning of storage resources, ensuring that the storage is allocated correctly according to the system requirements.

This integration allows for better automation, management, and monitoring of the storage environment, thereby improving efficiency and reducing the likelihood of manual errors.
