## Vce FCP\_FGT\_AD-7.6 Format | FCP\_FGT\_AD-7.6 Valid Exam Book

Keep making progress is a very good thing for all people. If you try your best to improve yourself continuously, you will that you will harvest a lot, including money, happiness and a good job and so on. The FCP\_FGT\_AD-7.6 preparation exam from our company will help you keep making progress. Choosing our FCP\_FGT\_AD-7.6 study material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. If you decide to buy our FCP\_FGT\_AD-7.6 study questions, you can get the chance that you will pass your FCP\_FGT\_AD-7.6 exam and get the certification successfully in a short time.

### Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q19-Q24):

### NEW QUESTION # 19

Refer to the exhibit.

The screenshot shows the FortiGate IPS Signature configuration interface. The 'Add Signatures' window is open, displaying the following settings for the selected signature 'FTP.Login.Failed':

- Type: Filter **Signature**
- Action: **Block**
- Packet logging: **Enable** (Disable is also visible)
- Status: **Enable** (Disable and Default are also visible)
- Rate-based settings: **Default** (Specify is also visible)
- Exempt IPs: **0** (Edit IP Exemptions is also visible)

Below the settings, a table lists the signature details:

Name	Severity	Target	OS	Action
FTP.Login.Failed	Server	All	Pass	

Review the intrusion prevention system (IPS) profile signature settings shown in the exhibit.

What do you conclude when adding the FTP.Login.Failed signature to the IPS sensor profile?

- A. The signature setting uses a custom rating threshold.
- B. Traffic matching the signature will be allowed and logged.

- C. The signature setting includes a group of other signatures.
- **D. Traffic matching the signature will be silently dropped and logged.**

**Answer: D**

Explanation:

Select Block to silently drop traffic matching any of the signatures included in the entry.

So, while the default action would be 'Pass' for this signature the administrator is specifically overriding that to set the Block action.

To use the default action the setting would have to be

'Default'.

#### NEW QUESTION # 20

Refer to the exhibit, which shows a partial configuration from the remote authentication server.

Attribute	Value	Vendor	Actions
Fortinet-Group-Name	Training	Fortinet	
		Fortinet	X

Why does the FortiGate administrator need this configuration?

- A. To authenticate Any FortiGate user groups.
- **B. To authenticate only the Training user group.**
- C. To set up a RADIUS server Secret.
- D. To authenticate and match the Training OU on the RADIUS server.

**Answer: B**

Explanation:

The Fortinet-Group-Name attribute is used to restrict authentication to users who belong specifically to the "Training" user group on the RADIUS server.

#### NEW QUESTION # 21

Refer to the exhibit. The exhibit shows the FortiGuard Category Based Filter section of a corporate web filter profile.

## FortiGate web filter profile configuration

Edit Web Filter Profile

Name: Corporate

Comments: Write a comment... 0/255

Feature set: Flow-based Proxy-based

FortiGuard Category Based Filter

Allow Monitor Block Warning Authenticate

Name	Action
Bandwidth Consuming	
Freeware and Software Downloads	Allow
File Sharing and Storage	Allow
Streaming Media and Download	Allow
Peer-to-peer File Sharing	Allow
Internet Radio and TV	Allow
Internet Telephony	Allow
Security Risk	
Malicious Websites	Block

35%

An administrator must block access to download.com, which belongs to the Freeware and Software Downloads category. The administrator must also allow other websites in the same category. What are two solutions for satisfying the requirement? (Choose two.)

- A. Set the Freeware and Software Downloads category Action to Warning.
- B. Configure a web override rating for download.com and select Malicious Websites as the subcategory.
- C. Configure a separate firewall policy with action Deny and an FQDN address object for \*.download.com as destination address.
- D. Configure a static URL filter entry for download.com with Type and Action set to Wildcard and Block, respectively.

**Answer: C,D**

Explanation:

Creating a static URL filter to block download.com specifically allows blocking that site without affecting the entire category. Using a separate firewall policy with a Deny action for an FQDN address object matching download.com can also block the site while allowing others in the same category.

### NEW QUESTION # 22

Which two settings are required for SSL VPN to function between two FortiGate devices? (Choose two.)

- A. The server FortiGate requires a CA certificate to verify the client FortiGate certificate.

- B. The client FortiGate requires the SSL VPN tunnel interface type to connect SSL VPN.
- C. The client FortiGate requires a client certificate signed by the CA on the server FortiGate.
- D. The client FortiGate requires a manually added route to remote subnets.

Answer: A,C

Explanation:

The server FortiGate requires a CA certificate to verify the client FortiGate certificate.

When configuring an SSL VPN tunnel between two FortiGates, the server FortiGate must verify the authenticity of the connecting client's certificate. This is done using a CA certificate installed on the server to ensure the client certificate is trusted.

The client FortiGate requires a client certificate signed by the CA on the server FortiGate.

The client FortiGate uses this client certificate to authenticate itself to the server during SSL VPN negotiation. The certificate must be signed by the same CA trusted by the server to establish a secure, validated SSL VPN connection.

### NEW QUESTION # 23

Refer to the exhibits.

application sensor **FORTINET**

Priority	Details	Type	Action
1	Excessive-Bandwidth	Filter	<input checked="" type="radio"/> Block
2	Google	Filter	<input checked="" type="radio"/> Monitor

You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits. You cannot access any of the Google applications, but you are able to access [www.fortinet.com](http://www.fortinet.com). Which two actions would you take to resolve the issue? (Choose two.)

- A. Set the action for Google in the Application and Filter Overrides section to Allow
- B. Add "Google\*.com" to the URL category in the security profile
- C. Set SSL inspection to deep-content inspection
- D. Move up Google in the Application and Filter Overrides section to set its priority to 1.
- E. Change the Inspection mode to Flow-based

**Answer: A,D**

#### NEW QUESTION # 24

.....

Our product boosts varied functions to be convenient for you to master the FCP\_FGT\_AD-7.6 training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on FCP\_FGT\_AD-7.6 Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our FCP\_FGT\_AD-7.6 study materials they can contact our customer service at any time.
