CFR-410 Exam covers a wide range of topics, including threat detection and analysis, incident response planning, and recovery strategies. With the CFR-410 certification, candidates can demonstrate their expertise in cyber security incident management and increase their value to employers.

CertNexus CyberSec First Responder Sample Questions (Q137-Q142):

NEW QUESTION # 137
Which two options represent the most basic methods for designing a DMZ network firewall? (Choose two.)

- A. Single firewall
- B. Software firewall
- C. Triple firewall
- D. Dual firewall

Answer: A,D

Explanation:
Single firewall: A single firewall is the simplest method for designing a DMZ network, where a firewall is placed between the internal network and the external network (internet), controlling traffic to and from the DMZ.
Dual firewall: A dual firewall setup uses two firewalls, one between the internal network and the DMZ, and the other between the DMZ and the external network. This adds an extra layer of security.

NEW QUESTION # 138
When reviewing log files from a recent incident, the response team discovers that most of the network-based indicators are IP-based. It would be helpful to the response team if they could resolve those IP-based indicators to hostnames. Which of the following is BEST suited for this task?

- A. WINS
- B. NFS
- C. NTP
- D. RIP
- E. DNS

Answer: E

Explanation:
DNS (Domain Name System) is the best tool for resolving IP-based indicators to hostnames. It translates domain names (human-readable names) into IP addresses, and the reverse lookup process can resolve IP addresses back to hostnames, which would be helpful in this case for identifying the source of network-based indicators.

NEW QUESTION # 139
Which of the following is a cybersecurity solution for insider threats to strengthen information protection?

- A. Web proxy
- B. Anti-malware
- C. Data loss prevention (DLP)
- D. Intrusion detection system (IDS)

Answer: C

NEW QUESTION # 140
Which of the following, when exposed together, constitutes PII? (Choose two.)

- A. Marital status
- B. Employment status
- C. Birth date
- D. Account balance
- E. Full name

Answer: D,E

NEW QUESTION # 141

Windows Server 2016 log files can be found in which of the following locations?

- A. C:\Windows\winevt\System32\Logs
- B. C:\Windows\winevt\System\Logs
- C. C:\Windows\System\winevt\Logs
- D. C:\Windows\System32\winevt\Logs

Answer: D

Explanation:
In Windows Server 2016, log files are stored in the C:\Windows\System32\winevt\Logs directory. This is the default location for event log files, which can be accessed and analyzed using Event Viewer or other monitoring tools.
