

2026 Test AIGP Question - Realistic IAPP Certified Artificial Intelligence Governance Professional Exam Dumps Pdf Pass Guaranteed

P.S. Free 2026 IAPP AIGP dumps are available on Google Drive shared by PassSureExam: <https://drive.google.com/open?id=1vgGn0Qp36Jcp7LNUc7f9s9YnzT8AkQvb>

The PassSureExam wants to win the trust of IAPP AIGP exam candidates at any cost. To fulfill this objective the PassSureExam is offering top-rated and real AIGP exam practice test in three different formats. These AIGP exam question formats are PDF dumps, web-based practice test software, and web-based practice test software. All these three AIGP Exam Question formats contain the real, updated, and error-free AIGP exam practice test.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 2	Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 3	Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

Topic 4	• Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

2026 Test AIGP Question | Valid IAPP AIGP: IAPP Certified Artificial Intelligence Governance Professional 100% Pass

The PassSureExam aids students in passing the test on their first try by giving them the real questions in three formats, 24/7 support team assistance, free demo, up to 1 year of free updates, and the satisfaction guarantee. As a result of its persistent efforts in providing candidates with actual AIGP Exam Questions, PassSureExam has become one of the best platforms to prepare for the IAPP AIGP exam successfully. One must prepare with PassSureExam exam questions if one wishes to pass the AIGP exam on their first attempt.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q95-Q100):

NEW QUESTION # 95

CASE STUDY

Please use the following to answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely to arise in adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records to a radiologist for secondary review pursuant to agreed-upon criteria (e.g., a confidence score below a threshold).

To date, the healthcare network has:

- Defined its AI ethical principles.
- Conducted discovery to identify the intended uses and success criteria for the system.
- Established an AI risk committee.
- Assembled a cross-functional team with clear roles and responsibilities.
- Created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution. It also intends to retain a large consulting firm to supplement its small data science team and help develop the algorithm using the healthcare network's existing data and de-identified data that is licensed from a large US clinical research partner.

The most significant risk from combining the healthcare network's existing data with the clinical research partner data is?

- A. Security risk.
- B. Operational risk.
- C. Reputational risk.
- D. Privacy risk.

Answer: D

Explanation:

Combining datasets, even if de-identified, increases the risk of re-identification and other privacy concerns, making privacy risk the most significant in this context.

NEW QUESTION # 96

Which of the following are subjects covered by a typical impact assessment?

- A. Fundamental rights, data protection and safety.
- B. Third-party risk, model risk and legal risk.
- C. Toxicity, accuracy and development.
- D. Datasets, behavior and tooling.

Answer: A

Explanation:

The correct answer is D because typical AI impact assessments focus on evaluating risks to individuals and society, particularly in areas such as fundamental rights, data protection, and safety. Frameworks like Data Protection Impact Assessments and Fundamental Rights Impact Assessments are designed to assess how AI systems may affect privacy, fairness, human rights, and potential harm to users. These assessments are core components of AI governance and are often required or recommended by regulations such as the GDPR and the EU AI Act. While options A, B, and C reference technical or operational considerations, they do not capture the broader societal and legal impacts that impact assessments are intended to address. AI governance emphasizes a human-centric approach, ensuring systems are safe, lawful, and respectful of individual rights before deployment.

NEW QUESTION # 97

Which of the following may be permissible uses of an AI system under the EU AI Act EXCEPT?

- A. Improving the response time for emergency services
- B. Using biometrics in abduction cases
- C. Detecting emotions in a telemedicine session
- D. Detecting emotions in a workplace for employee morale

Answer: D

Explanation:

The correct answer is D. Emotion recognition in the workplace is flagged as unacceptable or highly restricted under the EU AI Act due to its intrusive nature and potential for misuse.

From the AIGP ILT Guide - EU AI Act Training Module:

"AI systems that monitor individuals' emotions in the workplace or educational settings are listed among prohibited or strictly limited practices under Article 5." AI Governance in Practice Report 2024 supports this interpretation:

"Emotion recognition systems, especially in sensitive contexts such as employment or education, raise significant concerns under EU fundamental rights law and are likely to be restricted." Other uses listed—such as emergency response or emotion detection in healthcare—may fall under lawful and beneficial uses, especially when justified by public interest.

NEW QUESTION # 98

CASE STUDY

A premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.

To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions.

One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

All of the following are potential negative consequences created by using the AI tool to help make hiring decisions EXCEPT?

- A. Automation bias
- B. Candidate quality
- C. Disparate impacts

- D. Privacy violations

Answer: B

Explanation:

The correct answer is B. "Candidate quality" is not a negative consequence of using AI—rather, it is the intended benefit of using such tools (e.g., more efficient filtering of strong candidates).

From the AIGP ILT Guide:

"Automation bias, disparate impact, and privacy risks are well-documented concerns in AI-assisted hiring.

These risks may arise when AI models replicate biases present in training data or obscure the decision logic." AI Governance in Practice Report 2025 (Bias and Fairness Section) also warns:

"Improper AI use in hiring can lead to disparate impact, where neutral criteria disproportionately disadvantage protected groups." Candidate quality is a goal, not a risk, making B the correct answer for what is not a negative outcome.

NEW QUESTION # 99

A company is creating a mobile app to enable individuals to upload images and videos, and analyze this data using ML to provide lifestyle improvement recommendations. The sign-up form has the following data fields:

1. First name
2. Last name
3. Mobile number
4. Email ID
5. New password
6. Date of birth
7. Gender

In addition, the app obtains a device's IP address and location information while in use.

What GDPR privacy principles does this violate?

- A. Transparency and Accuracy.
- B. Accountability and Lawfulness.
- **C. Purpose Limitation and Data Minimization.**
- D. Integrity and Confidentiality.

Answer: C

Explanation:

Collecting more personal data than necessary violates GDPR principles of Purpose Limitation (using data only for specific purposes) and Data Minimization (collecting only what is needed).

NEW QUESTION # 100

.....

PassSureExam IAPP AIGP Dumps are the certification training material that guarantees 100% sail through the test at the first attempt. The accuracy rate of PassSureExam test answers and test questions is very high, so you only need to use the training material that guarantees you will pass the exam at the first time. If you don't believe it, try our free demo. If you don't pass the exam, PassSureExam will give you a FULL REFUND. So you have nothing to lose. Having used it, you can find it is high quality dumps. Hurry to have a try. We provide you with free demo and you can visit [PassSureExam.com](https://www.passsureexam.com) to download those questions.
