

GAQM CDCS-001 Valid Exam Review, CDCS-001 VCE Dumps

GAQM CDCS-001 Certified Data Centre Specialist (CDCS) 2

Newest CDCS-001 Reliable Test Vce & Leading Offer in Qualification Exams & Unparalleled CDCS-001: Certified Data Centre Specialist (CDCS)

ExamBoosts is a website specifically provide the certification exam information sources for GAQM professionals. Through many reflects from people who have purchase ExamBoosts's products, ExamBoosts is proved to be the best website to provide the source of information about [CDCS-001 Certification Exam](#). The product of CDCS-001 is a very reliable training tool for you. The answers of the exam exercises provided by ExamBoosts is very accurate. Our ExamBoosts's senior experts are continuing to enhance the quality of our training materials.

The CDCS-001 exam covers a wide range of topics related to data center management, including power and cooling, networking, storage, virtualization, security, and disaster recovery. CDCS-001 exam consists of 100 multiple-choice questions and must be completed within 120 minutes. The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20
For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation
Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.
Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21
Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

100% Pass 2026 The Best GAQM CDCS-001: Certified Data Centre Specialist (CDCS) Valid Exam Review

We offer free demos as your experimental tryout before downloading our real CDCS-001 exam questions. For more textual content about practicing exam questions, you can download our products with reasonable prices and get your practice begin within 5 minutes. After getting to know our CDCS-001 Test Guide by free demos, many exam candidates had their volitional purchase. So our CDCS-001 latest dumps are highly effective to make use of.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q59-Q64):

NEW QUESTION # 59

True or False: Fuel availability generally dictates the type of standby generator selected

- A. False
- B. True

Answer: B

Explanation:

Fuel availability generally dictates the type of standby generator selected as different types of generators use different types of fuel. For example, gasoline generators are typically used in residential or small commercial applications, while diesel generators are usually used in larger industrial and commercial applications.

Propane or natural gas generators may also be used, depending on the availability of fuel sources.

NEW QUESTION # 60

Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. Lowest installation cost
- B. It has more heat removal capacity per unit
- C. It doesn't require ductwork and/or dropped ceiling
- D. All components contain more than one unit

Answer: C

Explanation:

Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled systems, making them more cost-effective in the long run.

NEW QUESTION # 61

Which type of power can be a source available to the data center that takes over the function of supplying when utility power is unavailable?

- A. Active
- B. Passive
- C. Standby
- D. Alternate

Answer: C

Explanation:

Explanation

Standby power, also known as backup power, is a type of power that can be a source available to the data center that takes over the function of supplying when utility power is unavailable. Standby power systems are designed to provide power to critical loads in the event of a power outage, and can include generators, uninterruptible power supplies (UPS), and batteries. Standby power systems can be used to provide power to the data center for a short period of time, such as a few hours or days, until utility power is restored.

Passive, Active and Alternate are not specific type of power sources used in data center. They are terms used in different context and have different meaning.

NEW QUESTION # 62

Which mounted system is used to cool small IT environments?

- A. Ceiling Mounted System
- B. Floor Mounted System
- C. Chilled Mounted System
- **D. Air Mounted System**

Answer: D

Explanation:

Explanation

An air mounted system is often used to cool small IT environments. This type of cooling system is typically mounted on the wall or ceiling and works by blowing cool air into the room to lower the temperature. Air mounted systems are compact, easy to install and maintain, and can be a cost-effective solution for small spaces.

NEW QUESTION # 63

The distance that a signal's energy can travel in the time it takes for one cycle to occur is called the signal's:

- **A. wavelength**
- B. amplitude
- C. period
- D. frequency

Answer: A

Explanation:

Wavelength is a measure of the distance that a signal's energy can travel in the time it takes for one cycle of the signal to occur. It is calculated by dividing the speed of light by the frequency of the signal. Wavelength is generally expressed in meters (m).

NEW QUESTION # 64

.....

TestKingFree is determined to give hand to the candidates who want to pass their CDCS-001 exam smoothly and with ease by their first try. Our professional experts have compiled the most visual version: the PDF version of our CDCS-001 exam questions, which owns the advantage of convenient to be printed on the paper for it shows the entirety. In such a way, you can overcome your lack of confidence as well since you can have an overall look. The PDF version of our CDCS-001 Study Guide will provide you the easiest, the most flexible and leisure study experience to success.
