

Juniper JN0-460 Testdump | New JN0-460 Exam Simulator

P.S. Free & New JN0-460 dumps are available on Google Drive shared by Exam4Docs: <https://drive.google.com/open?id=1Oo1jl2pBS1nyZGBwMYF2MhviBMjxSvlg>

There may be customers who are concerned about the installation or use of our JN0-460 training questions. You don't have to worry about this if you have any of this kind of trouble. In addition to high quality and high efficiency of our JN0-460 Exam Questions, considerate service is also a big advantage of our company. We will provide 24 - hour online after-sales service to every customer to help them solve problems on our JN0-460 learning guide.

Thousands of people will crowd into our website to choose the JN0-460 study materials. So people are different from the past. Learning has become popular among different age groups. Our JN0-460 guide questions truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our JN0-460 Practice Engine a chance? Our products will live up to your expectations.

Become Proficient to Pass the Exam with Updated Juniper JN0-460 Exam Dumps

We guarantee that if you study our JN0-460 guide materials with dedication and enthusiasm step by step, you will desperately pass the exam without doubt. As the authoritative provider of study materials, we are always in pursuit of high pass rate of JN0-460 Practice Test compared with our counterparts to gain more attention from potential customers. We believe in the future, our JN0-460 study torrent will be more attractive and marvelous with high pass rate.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q81-Q86):

NEW QUESTION # 81

When is a virtual routing and forwarding (VRF) instance typically used?

- A. It is used to configure a collapsed core.
- **B. It separates networks into routing instances.**
- C. It defines the underlay network.
- D. It defines the IP addressing for a collapsed core.

Answer: B

Explanation:

According to Juniper Networks' documentation on campus fabric and EVPN-VXLAN architectures, a Virtual Routing and Forwarding (VRF) instance-conceptually referred to within the Junos OS as a routing instance-is typically used to provide macro-segmentation by logically separating a single physical network into multiple, isolated virtual networks.² In the context of a modern

campus fabric managed by Juniper Mist, VRFs allow network administrators to create distinct routing domains that maintain their own independent routing and forwarding tables.³ This separation is essential for multitenancy and security.⁴ For example, an organization might use one VRF for "Corporate_IT" and another for "Guest_WiFi" or "IoT_Devices". Because each VRF operates with its own routing table, traffic belonging to one instance is completely isolated from traffic in another by default; packets cannot travel between VRFs unless an administrator explicitly configures "route leaking" or directs the traffic through a stateful firewall for security inspection. This architectural approach also permits the use of overlapping IP address spaces, as the routing decisions for one tenant do not interfere with the address entries of another.⁵ In a Juniper Mist-driven campus fabric (such as Core-Distribution or IP Clos), the Mist portal streamlines the creation of these VRF instances as part of the fabric workflow.⁶ Once a VRF is created, specific VLANs (and their corresponding IRB interfaces) are assigned to it, ensuring that Layer 3 gateways are placed in the correct logical domain. While the underlay network (Option D) is responsible for providing the physical reachability (loopback to loopback) between switches using a protocol like eBGP, the overlay network leverages VRFs to deliver the actual isolated user services.

NEW QUESTION # 82

Which API is used within the Juniper Mist solution?

- A. SOAP
- **B. REST**
- C. XML
- D. JSON-RPC

Answer: B

Explanation:

Juniper Mist is built on a fully open and RESTful API architecture, allowing programmatic access to all functions.

Administrators and developers can automate switch provisioning, monitoring, and troubleshooting directly via the REST API.

This open design supports JSON data formatting and HTTPS authentication, ensuring secure integration with external systems.

NEW QUESTION # 83

You're designing a network for university with more than 20,000 students and various departments spread across multiple buildings. They prioritize high scalability and efficient east-west communication between departments.

In this scenarios, which IP-Clos architecture should be used?

- A. Collapsed Core
- **B. 5-stage IP-Clos**
- C. Campus Fabric Core-Distribution
- D. 3-stage IP-Clos

Answer: B

NEW QUESTION # 84

Which subscription is required to use Marvis?

- A. Access Assurance
- B. IoT Assurance
- **C. Virtual Network Assistant**
- D. Wired Assurance

Answer: C

Explanation:

Marvis is Juniper's Virtual Network Assistant (VNA) that leverages AI to provide natural language queries, anomaly detection, and proactive troubleshooting across wireless, wired, and WAN networks.

"Marvis, the AI-driven Virtual Network Assistant, requires a Virtual Network Assistant subscription. The subscription enables Marvis to provide insights, recommendations, and natural language queries for Mist- managed networks." Option A (Access Assurance) is related to NAC/802.1X enforcement.

Option B (IoT Assurance) applies to profiling and securing IoT devices.

Option D (Wired Assurance) enables switch telemetry, onboarding, and assurance, but does not unlock Marvis.

Option C (Virtual Network Assistant) is correct - this subscription is required to enable Marvis AI.

NEW QUESTION # 85

What are two classifiers under the wired Throughput SLE? (Choose two)

- A. interface anomalies
- B. storm control
- C. latency
- D. packet loss

Answer: A,B

NEW QUESTION # 86

.....

Our customer service staff will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, Mist AI Wired, Specialist (JNCIS-MistAI-Wired) torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, JN0-460 Test Guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.

New JN0-460 Exam Simulator: <https://www.exam4docs.com/JN0-460-study-questions.html>

Therefore, most examinees are able to get the Juniper New JN0-460 Exam Simulator New JN0-460 Exam Simulator certificate with the aid of our test engine, The perfect Juniper JN0-460 dumps from Exam4Docs are conducted to make well preparation for your exam and get the desired result, On the other hand, our JNCIS-MistAI-Wired JN0-460 exam study guide, as a long-established brand, has a strictly-disciplined team of staff who give high priority to the interests of the customers, Juniper JN0-460 Testdump Free demo download trial.

But what about placing an item in the immediate JN0-460 Test Question foreground, or in the background sky, where no reference is visible, Those who can beright and sit tight, Therefore, most examinees JN0-460 are able to get the Juniper JNCIS-MistAI-Wired certificate with the aid of our test engine.

100% Pass Juniper JN0-460 - Mist AI Wired, Specialist (JNCIS-MistAI-Wired) First-grade Testdump

The perfect Juniper JN0-460 dumps from Exam4Docs are conducted to make well preparation for your exam and get the desired result, On the other hand, our JNCIS-MistAI-Wired JN0-460 exam study guide, as a long-established brand, has a strictly-disciplined team of staff who give high priority to the interests of the customers.

Free demo download trial, Dear customers, you may think it is out of your league before such as winning the JN0-460 exam practice is possible within a week or a JN0-460 practice material could have passing rate over 98 percent.
