## PMI PMP - Project Management Professional (2026) Sample Questions (Q1918-Q1923):

**NEW QUESTION # 1918**

Drag and Drop Question

A hospital is running a project for one of their internal critical systems to manage billing, patient data, and record management along with consultation reports and input from physicians. The project manager now needs to categorize the identified risks. Drag each risk type on the left to its correct example on the right.

Type of Risk	Example
Technical risk	Availability of resources for the documentation and user manual preparation needs as this was not originally planned to be taken up by the project team
Commercial risk	Availability of the output formats of the files to interface with the data and record management systems on time as they are not available with the project manager
Management risk	The interfaces to medical devices require support from vendors
External risk	Needs regulatory compliance and clearance standards for incorporation into the system

**Answer:**

Explanation:

Type of Risk	Example
	Management risk
	Technical risk
	Commercial risk
	External risk
