Besides, they are high efficient for passing rate is between 98 to 100 percent, so they can help you save time and cut down additional time to focus on the XSOAR-Engineer Actual Exam review only. We understand your drive of the certificate, so you have a focus already and that is a good start.

### Palo Alto Networks XSOAR Engineer Sample Questions (Q68-Q73):

#### NEW QUESTION # 68

Which two situations would an engineer consider when configuring classification and mapping for an incident type? (Choose two.)

- A. When creating incidents from the XSOAR REST API
- B. When fetching many different incident types from a single mailbox
- C. When adding a new analyst account to XSOAR
- D. When manually creating an incident from the UI

**Answer: A,D**

#### NEW QUESTION # 69

For troubleshooting, after a log bundle is created, where do the logs appear on the XCSOAR server?

- A. /var/log/demisto
- B. /tmp/log/demisto
- C. /var/lib/demisto
- D. /usr/local/demisto

**Answer: A**

#### NEW QUESTION # 70

What can you use to assign a layout, field, and playbook to an incoming incident?

- A. Classification and mapping
- B. Pre-processing
- C. Playbook
- D. Incident type

**Answer: A**

#### NEW QUESTION # 71

Which two incident search queries are valid? (Choose two.)

- A. `created:>="7 days"`
- B. `status:closed -category:job`
- C. `owner==admin`
- D. `role is Analyst`

**Answer: A,B**

#### NEW QUESTION # 72

Multiple company assets were reported by vulnerability scanners as being vulnerable to CVE-2017-11882.

This vulnerability affects applications installed on workstations. The SOC team needs to take action and apply the new vulnerability

patch that was just released. The team must first create a cause for each of the identified assets in ServiceNow IT Service Management (ITSM), in order to notify the IT department. Next, the team creates a task in the main playbook, which extracts the list of assets from the scanner report.

After the list of assets are created, what are the two solutions that the SOC team could take so that a case could be created and a patch installed? (Choose two.)

- A. Create a sub-playbook with a single input containing the computer names that will loop 'For Each Input' and perform the following tasks:-Active Directory User Enrichment based on the computerName- Create the ServiceNow Record by adding the enrichment information-Mark the ticket severity as Urgent
- B. Set a key for storing the iteration number and create a sub-playbook with a single input containing the computer names that will loop until the last item from the asset list (Exit condition: iterator equal to count of the number of item in the list) and perform the following tasks:-Increase the iterator value by one each time-Active Directory User Enrichment based on the computerName-Create the ServiceNow Record by adding the enrichment information-Mark the ticket severity as Urgent
- C. Set a key for storing the iteration number and create a sub-playbook with a single input containing the computer names that will loop until the last item from the asset list (Exit condition: iterator contains the count of the number of items in the list) and perform the following tasks:-Active Directory User Enrichment based on the computerName-Create the ServiceNow Record by adding the enrichment information-Mark the ticket severity as Urgent
- D. Create a sub-playbook with a single input containing the computer names that will loop until the last item from the asset list (Condition: AreValuesEqual - Exit on yes - left:1, right 1) and perform the following tasks:-Active Directory User Enrichment based on the computerName-Create the ServiceNow Record by adding the enrichment information-Mark the ticket severity as Urgent

**Answer: A,B**

### NEW QUESTION # 73

.....

They check each Palo Alto Networks XSOAR-Engineer practice test question and ensure the top standard of Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) exam questions all the time. So you can trust Prep4sureExam Palo Alto Networks XSOAR-Engineer practice test questions and start Palo Alto Networks XSOAR-Engineer exam preparation with confidence. The Prep4sureExam is a leading platform committed to making entire Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) exam preparation simple, quick, and easy for everyone. To fulfill this objective the Prep4sureExam are offering top-rated and real Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) practice test questions in three different formats.
