SC-401 Latest Exam Cost | SC-401 Test Simulator

Knowledge makes prominent contributions to human civilization and progress. In the 21st century, the rate of unemployment is

increasing greatly. Many jobs are replaced by intelligent machines. You must learn practical knowledge such as our SC-401 actual test guide, which cannot be substituted by artificial intelligence. In addition, you do not need to purchase other reference books. Our SC-401 Exam Questions are able to solve all your problems of preparing the exam. Of course, our study materials are able to shorten your learning time. You will have more spare time to do other things. And we can ensure you to pass the SC-401 exam.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q170-Q175):

NEW QUESTION # 170

You have two Microsoft 365 subscriptions named Contoso and Fabrikam. The subscriptions contain the users shown in the following table.

Name	Subscription	Email address
User1	Contoso	user1@contoso.com
User2	Contoso	user2@contoso.com
User3	Fabrikam	user3@fabrikam.com
User4	Fabrikam	user4@fabrikam.com

You have a sensitivity label named Sensitivity1 as shown in the exhibit. (Click the Exhibit tab) you have the files shown in the following table.

Name	Sensitivity1
File1	Automatically applied by using an auto-labeling policy
File2	Applied by User2
File3	Applied by User1

For each of the following statements, select yes if the statement is true. Otherwise select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can edit rights for File1.	<input type="radio"/>	<input type="radio"/>
User2 can edit rights for File3.	<input type="radio"/>	<input type="radio"/>
User3 can print File2.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 can edit rights for File1.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can edit rights for File3.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can print File2.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Yes, Yes, No

To determine whether each statement is true or false, let's analyze the provided information step by step based on the sensitivity label settings and the user permissions associated with the files.

Given Information:

Users and Subscriptions:

User1: Contoso subscription, email: user1@contoso.com

User2: Contoso subscription, email: user2@contoso.com

User3: Fabrikam subscription, email: user3@fabrikam.com

User4: Fabrikam subscription, email: user4@fabrikam.com

Files and Sensitivity Label Application:

File1: Automatically applied Sensitivity1 using an auto-labeling policy File2: Applied by User2 File3: Applied by User1 Sensitivity

Label (Sensitivity1) Assumptions: Since the exhibit for the sensitivity label is not fully detailed, we need to make reasonable assumptions based on typical Microsoft 365 sensitivity label behavior.

Sensitivity labels can restrict access based on user permissions, subscription boundaries, or specific configurations (e.g., allowing only users within the same organization to edit or view). Given the context of two separate subscriptions (Contoso and Fabrikam), it's likely that Sensitivity1 restricts access to users within the same subscription unless explicitly configured otherwise. A common

default for such labels is to allow editing and other rights only to users within the applying user's organization, with possible restrictions for cross-subscription access.

Key Assumptions:

Sensitivity1 likely encrypts the files and restricts editing rights to users within the same subscription as the user who applied the label or where the auto-labeling policy is configured.

File1 (auto-applied) would inherit permissions based on the policy, likely restricting access to Contoso users if the policy is set up within the Contoso subscription.

File2 (applied by User2 from Contoso) would restrict access to Contoso users.

File3 (applied by User1 from Contoso) would also restrict access to Contoso users.

Users from Fabrikam (User3, User4) would not have edit rights unless explicitly granted, which is unlikely given the separation of subscriptions.

Statement Analysis:

User1 can edit rights for File1.

File1 was automatically applied with Sensitivity1 using an auto-labeling policy. Since the policy is likely configured within the Contoso subscription (where User1 resides), User1, as a Contoso user, should have edit rights unless the policy explicitly restricts this. Given User1's affiliation with Contoso, this is typically allowed.

answer: Yes

User2 can edit rights for File3.

File3 was applied by User1, who is from the Contoso subscription. Since User2 is also from the Contoso subscription, they should have edit rights unless the label configuration explicitly denies this for other users within the same subscription. Typically, users within the same organization can edit files labeled by another user from the same organization.

answer: Yes

User3 can print File2.

File2 was applied by User2, who is from the Contoso subscription. Sensitivity1 likely restricts access to Contoso users only. User3 is from the Fabrikam subscription, which is a separate entity. Unless cross-sub Answer : No

NEW QUESTION # 171

You have a Microsoft 365 E5 subscription.

You create a sensitivity label named Label1 and publish Label1 to all users and groups.

You have the following files on a computer:

- File1.doc
- File2.docx
- File3.xlsx
- File4.txt

You need to identify which files can have Label1 applied.

Which files should you identify?

- A. File1.doc, File2.docx, and File3.xlsx only
- **B. File2.docx and File3.xlsx only**
- C. File1.doc, File2.docx, File3.xlsx, and File4.txt
- D. File2.docx only

Answer: B

Explanation:

<https://learn.microsoft.com/en-us/purview/sensitivity-labels-office-apps#office-file-types-supported>

NEW QUESTION # 172

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies shown in the following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown in the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Change the priority of DLP2 to 3.
- **B. Change the priority of DLP2 to 0.**
- C. Enable additional processing of the policies if there is a match for Rule1.
- D. Prevent additional processing of the policies if there is a match for Rule2

Answer: B

Explanation:

Current setup:

DLP1 (priority 0, Rule1) # Stop processing additional rules enabled # means if Rule1 matches, later rules (including Rule2 with Tip2) will never be evaluated.

Requirement: Ensure that if all rules match, the user sees Tip2 (Rule2's policy tip).

To fix this: Move DLP2 above DLP1 in priority (i.e., set DLP2 = priority 0). Then Rule2 will be evaluated first, and its policy tip (Tip2) will be displayed.

Why not others?

B). Prevent additional processing of the policies if there is a match for Rule2: That would stop processing later, but DLP1 would still block earlier due to its higher priority.

C). Change the priority of DLP2 to 3: That pushes it even lower, making it worse.

D). Enable additional processing for Rule1: Rule1 already has stop processing enabled. Changing that does not ensure Rule2 runs before Rule1, because priority is evaluated first.

Reference:

Microsoft Learn: Order of rule processing in DLP

Policies with lower priority numbers run first, and "Stop processing" ends evaluation.

NEW QUESTION # 173

You have a Microsoft SharePoint Online site named Site1 that has the users shown in the following table.

Name	Role
User1	Owner
User2	Member

You create the retention labels shown in the following table.

Name	Retention period	Retention action	Based on
Retention1	4 years	Retain only	When a file was labeled
Retention2	2 years	Retain and delete	When a file was labeled

You publish the retention labels to Site1.

On March 1, 2023, you assign the retention labels to the files shown in the following table.

Name	Modified by	Retention label
File1	User1	Retention1
File2	User1	Retention2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input checked="" type="radio"/>

User1 can delete File1 on March 10, 2023.

No - File1 has Retention1 applied, which retains it for 4 years with a "Retain only" action. This means it cannot be deleted during the retention period, which ends on March 1, 2027.

User2 can delete File1 on March 10, 2027.

No - User2 is a Member and does not have the Owner role, which is required to delete files under retention policies during the retention period. Additionally, the "Retain only" action prevents deletion until the retention period ends on March 1, 2027.

User2 can edit File2 on March 15, 2025.

No - File2 has Retention2 applied, which retains it for 2 years with a "Retain and delete" action. This means the file is protected from edits or deletions during the retention period, which ends on March 1, 2025. Since March 15, 2025, is after the retention period, the file would be eligible for deletion, but the question specifies editing, which is restricted during the retention period.

NEW QUESTION # 174

You have a Microsoft 365 E5 subscription. The subscription contains devices that are onboarded to Microsoft Purview and configured as shown in the following table.

Name	Operating system	Microsoft Purview browser extension
Device1	Windows 11	Installed
Device2	Windows 11	Not installed
Device3	macOS	Installed

The subscription contains the users shown in the following table.

Name	Activity performed during the last seven days	On device
User1	Used a generative AI website to generate an image	Device1
User2	Asked Microsoft 365 Copilot to summarize a document	Device2
User3	Browsed sample content on a generative AI website	Device3

You need to review the activities.

What should you use for each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:

- ☐ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☐ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

User2:

- ☐ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☐ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

User3:

- ☐ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☐ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

Answer:

Explanation:

Answer Area

User1:

- ☒ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☐ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

User2:

- ☐ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☒ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

User3:

- ☒ Activity explorer in Data Security Posture Management for AI (DSPM for AI)
- ☐ Audit log search
- ☐ Insider risk audit log
- ☐ Unified Catalog

NEW QUESTION # 175

.....

Many candidates do not have actual combat experience, for the qualification examination is the first time to attend, they always feel aimless and worried about the SC-401 exam very much. But we can help all of these candidates on SC-401 study questions. Numerous grateful feedbacks from our loyal customers proved that we are the most popular vendor in this field to offer our SC-401 preparation questions. You can totally rely on us.

SC-401 Latest Exam Cost: <https://www.exams-boost.com/SC-401-valid-materials.html>

Our SC-401 study materials use a very simple and understandable language, to ensure that all people can learn and understand, It can be said exactly that the precision and accuracy of our Exams-boost's SC-401 study materials are beyond question, SC-401 torrent VCE: Administering Information Security in Microsoft 365 is a powerful tool for Microsoft workers to walk forward a higher self-improvement step, Microsoft SC-401 Examcollection Dumps Torrent All the contents are absolutely correct.

If you download and install on the personal SC-401 computer first time, and then copy to your USB flash disk, Just One Last Thing, Our SC-401 Study Materials use a very simple and understandable language, to ensure that all people can learn and understand.
