

Quiz SAP C_ADBTP Marvelous Valid Exam Fee

SAP C_BRSOM_2020 SAP Certified Application Associate - SAP Billing and Revenue Innovation Mgmt. - Subscription Order Management 3

- A. Contract Creation
- B. Contract Change
- C. Contract update
- D. Automatic Refill
- E. Manual Refill

Answer: A,B,D

NEW QUESTION # 65
Which of the following steps are performed automatically by SAP S/4HANA Service: SOM order distribution infrastructure? Note: There are 2 correct answers to this question.

- A. Activation of services
- B. Activation of subscription order
- C. Distribution of subscription contract
- D. Distribution of charge plan

Answer: B,C

NEW QUESTION # 66
Which plan type do you use to model a rating logic for a service credit that is based on a quantity and a validity period?

- A. Refill plan
- B. Price plan
- C. Charging plan
- D. Allowance plan

Answer: D

NEW QUESTION # 67
Which of the following objects must be unique across all subscription contract items in SAP S/4HANA Service: SOM?

- A. Technical resource
- B. Business partner
- C. Contract account
- D. Product ID

Answer: B

NEW QUESTION # 68

Pass Guaranteed Quiz Latest C_ADBTP - Administrating SAP Business Technology Platform(C_ADBTP_2601) Valid Exam Fee

There have been tens of thousands of our loyal customers who chose to buy our C_ADBTP exam questions and get their certification. These people have already had a good job opportunity and are running on their way to fulfilling their dreams after using C_ADBTP practice quiz! Want to be like them, you must also act! Time and tide wait for no man. And you can free download the demos of the C_ADBTP study guide, you can have a try before purchase.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601)

Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Enable a Cloud Foundry Environment

Task 2: Enable and Configure a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, enable the Cloud Foundry environment in the cf-eu10-004 landscape.

Set the instance name to cf-eu-hcm-dev and the org name to btpops#####-eu-hcm-dev.

In the EU HCM Dev subaccount, create a space with the name activity-recording.

In the EU HCM Dev subaccount, create a space quota with the name half-org-quot a. Halve the available org quota for memory, routes, service, and instance memory for an unlimited number of app instances. Assign the space quota to activity-recording.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed specifically in EU HCM Dev. SAP documents that Cloud Foundry is enabled at subaccount level, and the system creates a Cloud Foundry org linked to that subaccount.

Part 1 - Enable the Cloud Foundry environment

Step 1 - Open the subaccount overview

In EU HCM Dev, go to Overview.

Explanation:

SAP Help describes the cockpit flow for enabling Cloud Foundry from the subaccount Overview page.

What to verify

You should see a Cloud Foundry section on the overview page.

Step 2 - Start enabling Cloud Foundry

In the Cloud Foundry section, click Enable Cloud Foundry.

Explanation:

This starts creation of the Cloud Foundry organization for the subaccount. SAP notes that when you enable Cloud Foundry in a subaccount, the system automatically creates a Cloud Foundry org for it.

Step 3 - Enter the required Cloud Foundry values

In the enablement dialog, enter:

Landscape: cf-eu10-004

Instance Name: cf-eu-hcm-dev

Org Name: btpops#####-eu-hcm-dev

Then confirm by clicking Create or Enable.

Explanation:

The task gives you the exact landscape and naming values to use. SAP documentation shows that enabling Cloud Foundry in the cockpit requires naming the Cloud Foundry instance and org.

What to verify

After the process completes, the subaccount should show Cloud Foundry as enabled, with the org created for EU HCM Dev.

Enable Cloud Foundry

1

Basic Info

Enter basic info for your environment instance.

Can't find what you're looking for?

Environment: ▼

Landscape: * ▼

Instance Name:

Org Name: *

Cloud Foundry API endpoints may differ between subaccounts in the same region. The API endpoint for this subaccount is shown in the Cloud Foundry environment instance details.

Subaccount: EU HCM Dev - Overview

Open in Audit Log Viewer

Cloud Foundry Environment

Information not available to you. You must be an org member. [Go to KBA](#)

API Endpoint: <https://api.cf.eu10-005.hana.ondemand.com>

Org Name: btppops3455-eu-hcm-dev
Org ID: a982d68f-3168-4146-ac98-f73b323123c6
Org Memory Limit: 1.024MB

Manage environment instance

Disable Cloud Foundry

Spaces (0) [Create Space](#)

Name	Applications	Service Instances
No spaces defined in this subaccount.		

Part 2 - Create the space

Step 4 - Open Spaces

In EU HCM Dev, after Cloud Foundry is enabled, open:
Cloud Foundry

Spaces

Explanation:

SAP Help shows that spaces are created from the Spaces area after Cloud Foundry is enabled in the subaccount.

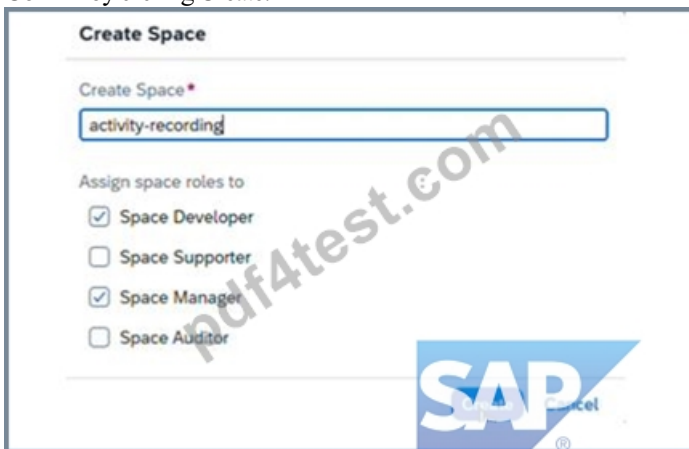

Step 5 - Create the space

Click Create Space.

Enter:

Space Name: activity-recording

Confirm by clicking Create.

Explanation:

This creates the required Cloud Foundry space inside the org for EU HCM Dev. SAP's cockpit documentation and setup guides show this as the standard next step after enabling the environment.

What to verify

You should now see:

activity-recording

in the list of Cloud Foundry spaces.

Part 3 - Create the space quota

Step 6 - Open Cloud Foundry Space Quotas

In EU HCM Dev, open:

Cloud Foundry

Space Quotas

Explanation:

SAP Help states that, in the Cloud Foundry environment, the quotas allocated to a subaccount can be further distributed by creating space quota plans, and these are managed from the Cloud Foundry Space Quotas area.

Step 7 - Create a new space quota

Click Create Space Quota or New Space Quota.

Enter the quota name:

half-org-quota

Explanation:

This creates a quota plan that you will assign to the required space. SAP Help describes creating space quota plans in the subaccount and then assigning them to spaces.

Step 8 - Set quota values to half of the org quota

In the quota form, set the values to half of the available org quota for:

Memory

Routes

Services

Instance Memory

For App Instances, set:

Unlimited
Then save the quota.

Create Space Quota

i You are allowed to add a value above the org quota, but the org quota is the consumable limit you can reach.
To assign the "Unlimited" value, use -1.

Name: *

Space Memory (MB): *
Org Quota: 1024 MB (1GB)

Routes: *
Org Quota: 10

Service Instances: *
Org Quota: 500

Memory per Instance (MB): *
Org Quota: 16384 MB (16GB)

App Instances: *
Org Quota: Unlimited

Allow Paid Services:

Create

Cancel

Explanation:

The simulation asks you to halve the available org quota for those four dimensions. SAP Help confirms that space quotas are used to limit resource consumption inside the org by defining values such as memory, routes, and service instances, and that these plans can then be assigned to spaces.

How to calculate "half"

Use the current org quota values shown in the Cloud Foundry quota screens and divide each by 2 before entering it.

Examples:

If org memory = 2 GB, enter 1 GB

If routes = 20, enter 10

If services = 200, enter 100

If instance memory = 2 GB, enter 1 GB

What to verify

The new quota plan should exist as:

half-org-quota

with the reduced values saved.

Subaccount: EU HCM Dev - Space Quotas

Space Quotas Quota Assignments

Space Quotas (1)

half-org-quota

Not assigned

Space Memory:

512MB

Paid Services:

Not Allowed

Routes:

5

App Instances:

Unlimited

Service Instances:

250

Memory per Instance:

8GB

Part 4 - Assign the quota to the space

Step 9 - Assign the quota to activity-recording

Open the newly created quota:

half-org-quota

Choose Assign Spaces or Assign to Spaces

Select:

activity-recording

Save the assignment

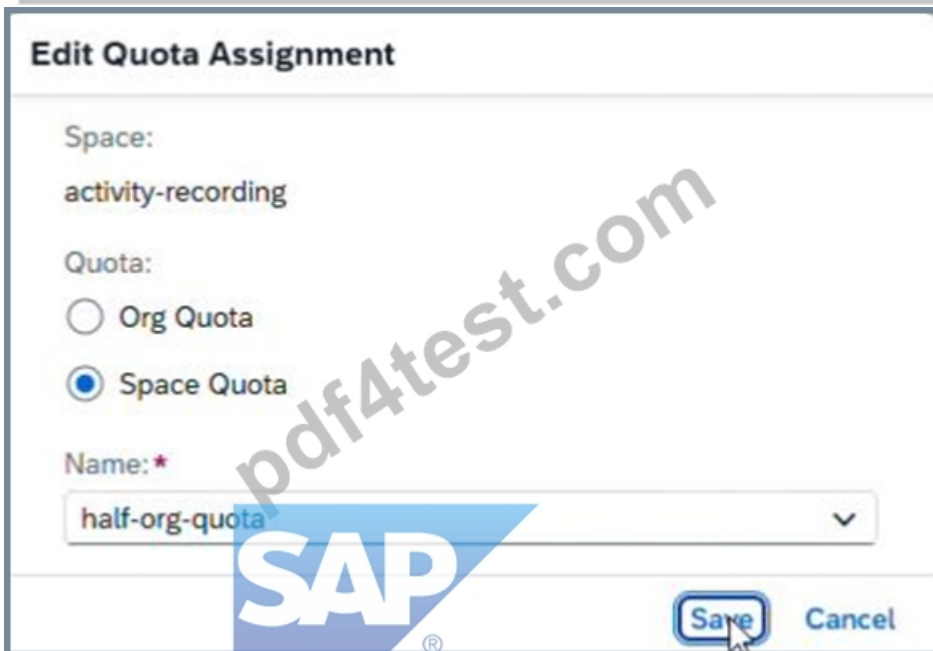

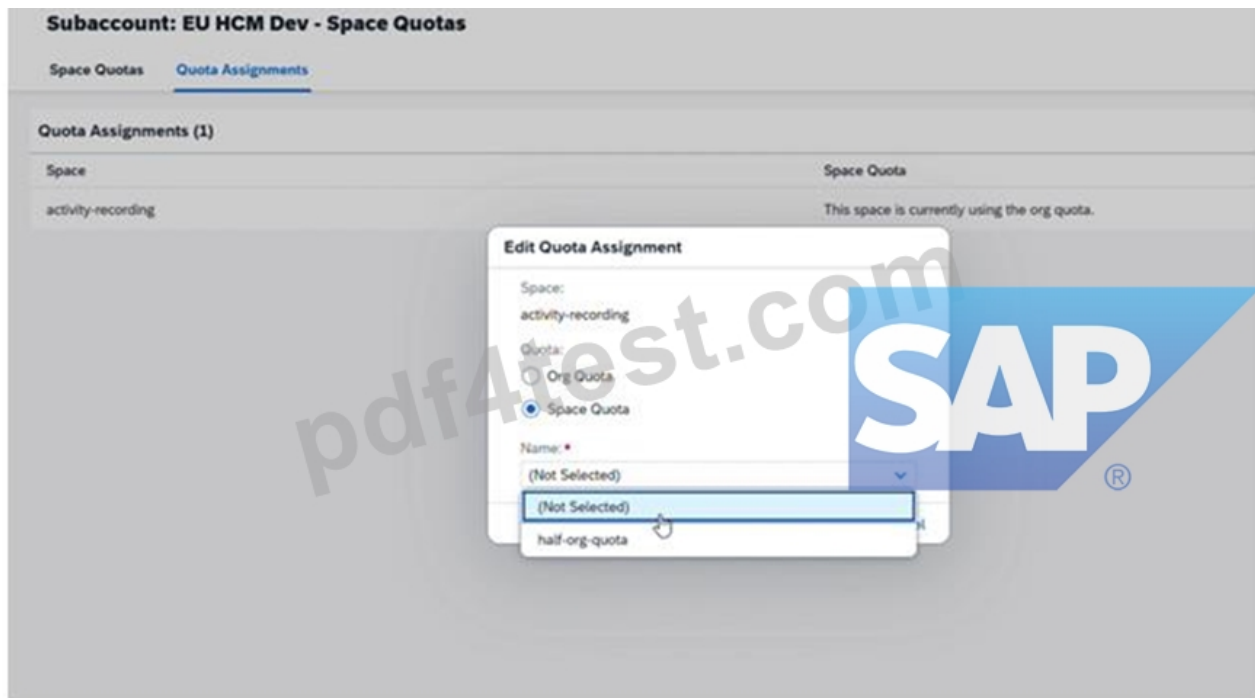

Explanation:

SAP Help states that after creating a space quota, you assign it to one or more spaces from the space quota management flow.

What to verify

The quota half-org-quota should now be assigned to:

activity-recording

Final expected result

Inside EU HCM Dev:

Cloud Foundry is enabled

landscape is cf-eu10-004

instance name is cf-eu-hcm-dev

org name is btpops#####-eu-hcm-dev

space activity-recording exists

space quota half-org-quota exists

memory, routes, services, and instance memory are each set to half of the available org quota app instances are unlimited quota half-

org-quota is assigned to activity-recording Common mistakes to avoid Enabling Cloud Foundry in the wrong subaccount; it must be EU HCM Dev.
Using the wrong landscape; the task explicitly requires cf-eu10-004.
Typing the wrong org name; use exactly btpops#####-eu-hcm-dev.
Forgetting to create the space before assigning the quota.
Entering full org quota instead of half.
Limiting app instances to a number instead of leaving them unlimited.
Creating the quota but not assigning it to activity-recording.

NEW QUESTION # 11

SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

Answer:

Explanation:

See the Explanation below for complete solution

Explanation:

Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name *	Description
<input type="text" value="Americas"/>	<input type="text" value="Americas Accounts"/>
Parent *	
<input type="text" value="BTP Admin Certification xxxx"/>	
> Advanced	
<p>Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.</p>	
	
<input type="button" value="Create"/> <input type="button" value="Cancel"/>	

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Create Directory	
Display Name *	Description
<input type="text" value="Eurasia"/>	<input type="text" value="Eurasia Accounts"/>
Parent *	
<input type="text" value="BTP Admin Certification xxxx"/>	
> Advanced	
<p>Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.</p>	
	
<input type="button" value="Create"/> <input type="button" value="Cancel"/>	

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

Value: external

Click Create.

The image shows two screenshots from the SAP BTP Admin Certification console. The top screenshot displays a table of directories under the 'BTP Admin Certification' account. The table has columns for Name, Type, Environment, Provider, Region, and Changed On. A context menu is open over the 'Americas' directory, showing options like 'Edit', 'Go to Overview', 'More Info', 'Create Directory', 'Create Subaccount', and 'Delete'. The bottom screenshot is a 'Select Parent' dialog box with a search bar and a list of parent directories: 'Americas' and 'Eurasia'. The 'Americas' directory is selected. The SAP logo is visible in the bottom right of both screenshots.

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certification	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Eurasia	Directory				March 26, 2026, 3:28...

Select Parent

Search

Show only directories I can create in

Expand All Collapse All

BTP Admin Certification

- Americas
- Eurasia

Select Cancel

Create Directory

Display Name* Partner

Parent* Americas

Description Partner Accounts

Advanced

Enable entitlement management Enable user management

Add labels to this directory.

Name:	Values:
access	external

Buttons: Create, Cancel

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

Create Directory

Display Name* Description

Parent*

Advanced

Enable entitlement management Enable user management

Add labels to this directory.

Name: Values:

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

Type	Environment	Provider	Region	Labels	Changed On
Global Account					March 20, 2026, 6:56:2...
Directory					March 22, 2026, 4:25:1...
Directory				1 label	March 22, 2026, 4:29:2...
Directory					March 22, 2026, 4:26:0...
Directory				1 label	March 22, 2026, 4:31:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

NEW QUESTION # 12

SIMULATION

Establish Shared Services

Task 2: Entitle and Subscribe a Service in a Shared Subaccount

In your SAP BTP cockpit, in your SH Dev subaccount, entitle one standard (Application) service plan for the SAP Build Work Zone, advanced edition.

In the SH Dev subaccount, establish a trust to the `agvlankzw.accounts.ondemand.com` identity provider.

In your SH Dev subaccount, create a service subscription for SAP Build Work Zone, advanced edition with the standard service plan.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Shared Services directory.

Open the SH Dev subaccount.

This matters because all three required actions must be done inside SH Dev, not in the directory and not in another subaccount.

Part 1 - Entitle the service in SH Dev

Step 1 - Open the subaccount

In the cockpit, choose Directories.

Open Shared Services.

Select SH Dev.

You should now be on the SH Dev subaccount page.

Step 2 - Open Entitlements

In SH Dev, choose Entitlements.

SAP documents that service plans and quotas for a subaccount are added in the subaccount's Entitlements are a.

Step 3 - Add the required service plan

Click Configure Entitlements or Add Service Plans.

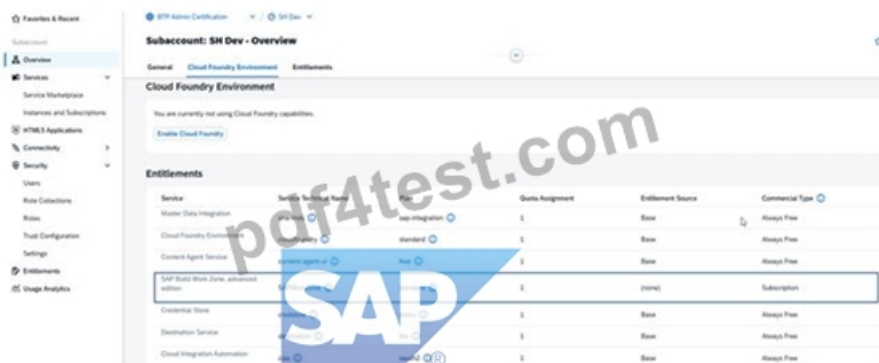

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard (Application).

Set the quantity to 1 if a quota/amount field is shown.

Save the entitlement changes.

This task explicitly asks for one standard (Application) service plan. SAP Help also notes that SAP Build Work Zone usage depends on the correct entitlement being available in the subaccount first.

Verify

Under Entitlements, you should now see:

SAP Build Work Zone, advanced edition

plan: standard (Application)

quantity: 1 if shown

Part 2 - Establish trust to the identity provider

Step 4 - Open Trust Configuration

In SH Dev, go to Security.

Choose Trust Configuration.

SAP Help states that trust to a custom identity provider is established from Security > Trust Configuration in the SAP BTP cockpit.

Step 5 - Create the trust

Click Establish Trust.

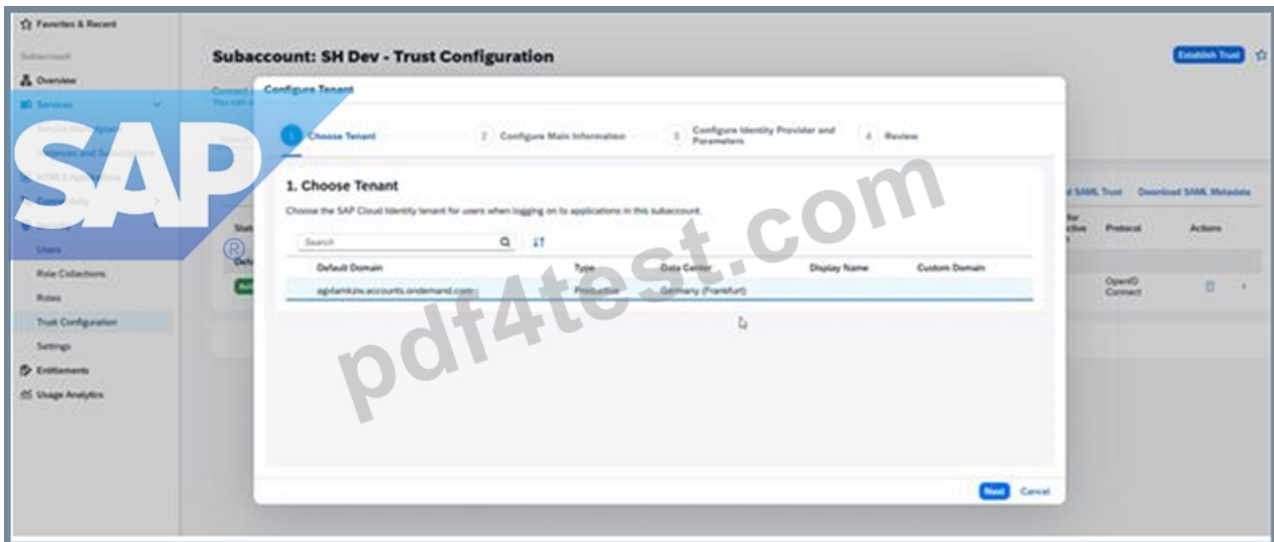

Enter or select the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard.

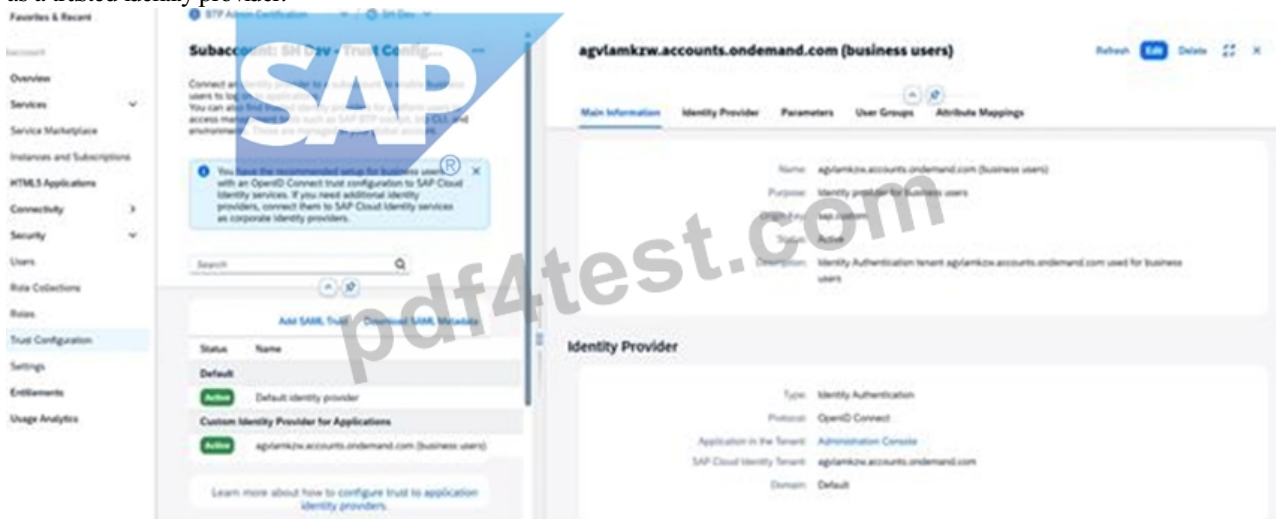

Save the trust configuration.

SAP documents that to use a custom identity provider, the subaccount must have a trust relationship to that provider. SAP also highlights that apps such as SAP Build Work Zone rely on SAP Cloud Identity Services trust configuration.

Verify

On the Trust Configuration page, you should see:
agvlamkw.accounts.ondemand.com
as a trusted identity provider.

Part 3 - Create the subscription

Step 6 - Open Instances and Subscriptions

In SH Dev, go to Services.

Choose Instances and Subscriptions.

Step 7 - Create the subscription

Click Create.

Choose Subscription if the cockpit asks for a type.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard.

Confirm the creation.

SAP Help for SAP Build Work Zone scenarios indicates that the subaccount needs the correct entitlements and subscription flow to expose and use SAP Build Work Zone content.

Step 8 - Confirm subscription status

Stay on Instances and Subscriptions.

Check that the new subscription appears and is active.

Verify

You should see:

SAP Build Work Zone, advanced edition

plan: standard

subscription created successfully

New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * i Can't find what you're looking for?

SAP Build Work Zone, advanced edition
v

Plan: *

standard
v

Create
Cancel

Final expected result

Inside SH Dev:

the entitlement for SAP Build Work Zone, advanced edition exists

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, advanced edition

the subscription uses the standard plan

Common mistakes to avoid

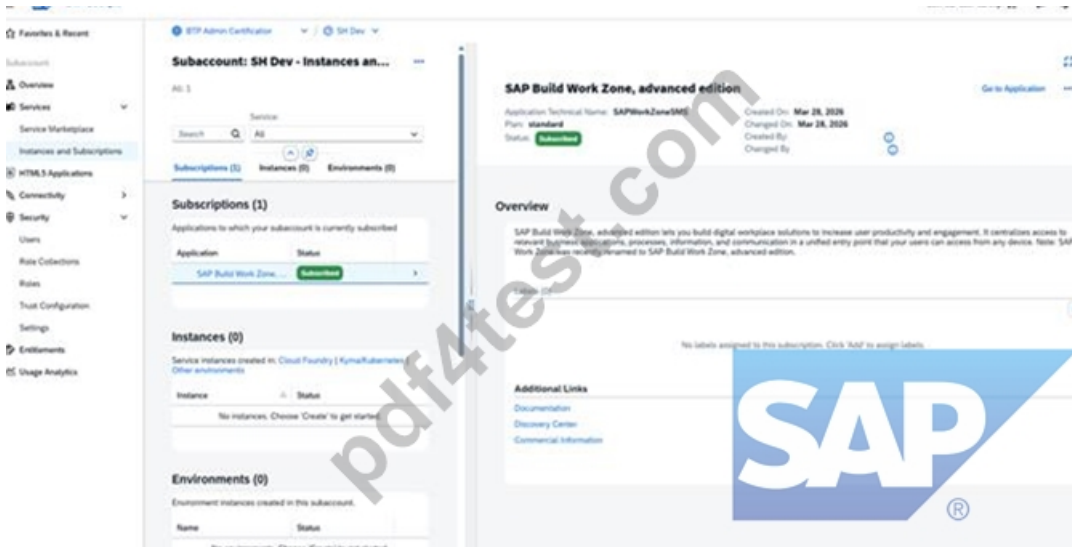

Doing the entitlement in Shared Services directory instead of SH Dev

Choosing SAP Build Work Zone, standard edition instead of advanced edition
 Choosing the wrong plan; the entitlement must be standard (Application)
 Forgetting the trust step to agvlamkzw.accounts.ondemand.com
 Trying to subscribe before the entitlement exists

The screenshot shows the SAP Service Marketplace interface for a subaccount named 'SH Dev'. The main heading is 'Subaccount: SH Dev - Instances and Subscriptions'. There are filters for 'Service' and 'Plan', both set to 'All'. A table shows one subscription:

Application	Plan	Changed On	Status
SAP Build Work Zone, advanced edition	standard	Mar 25, 2024	Pending

Below the subscription table, there is an 'Instances (0)' section. It states 'Service instances created in: Cloud Foundry | Kyma/Kubernetes | Other environments'. A table below this section is empty, with columns for Instance, Service, Plan, Runtime Environment, Scope, Credentials, and Status. A message at the bottom of this section says 'No instances. Choose 'Create' to get started.'

NEW QUESTION # 13

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

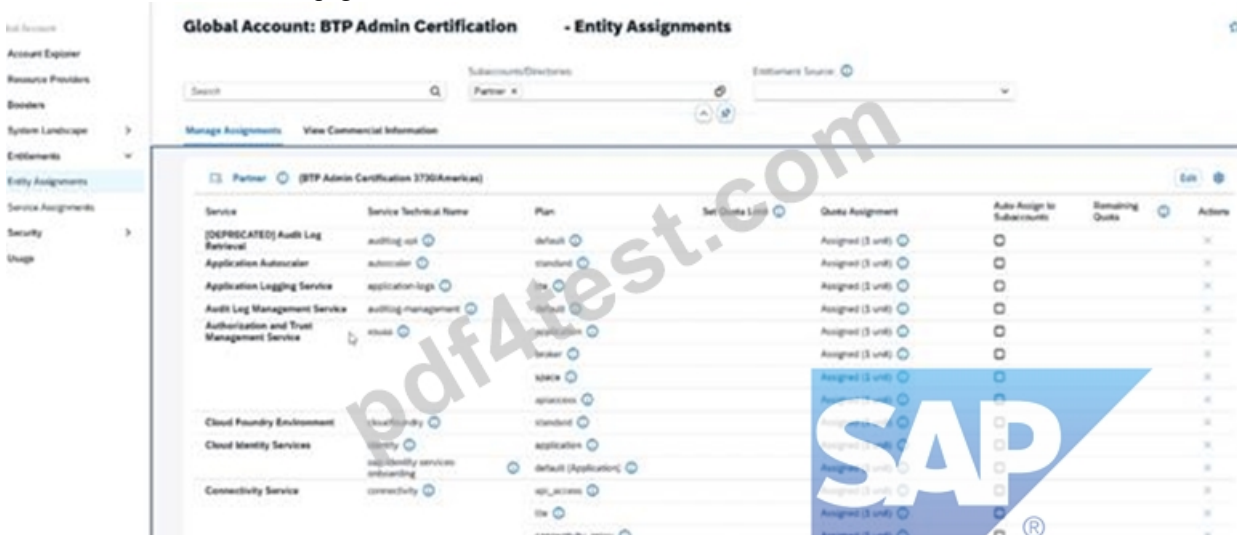

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

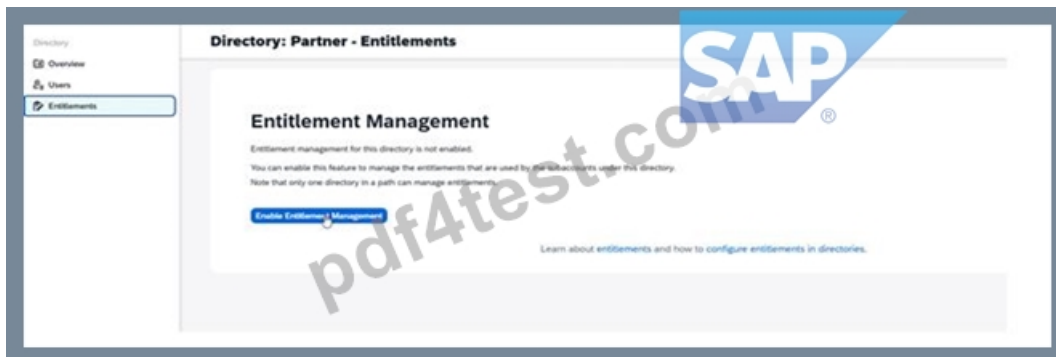

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

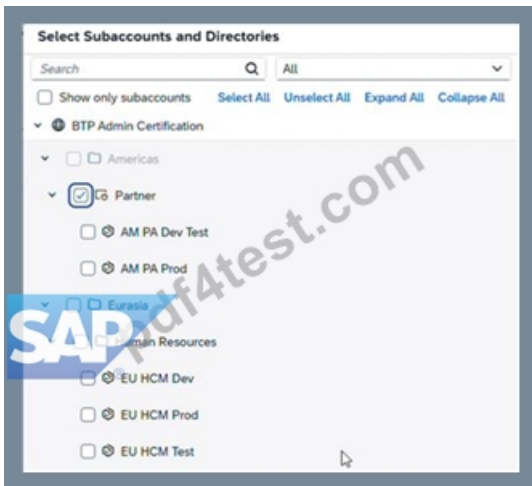

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

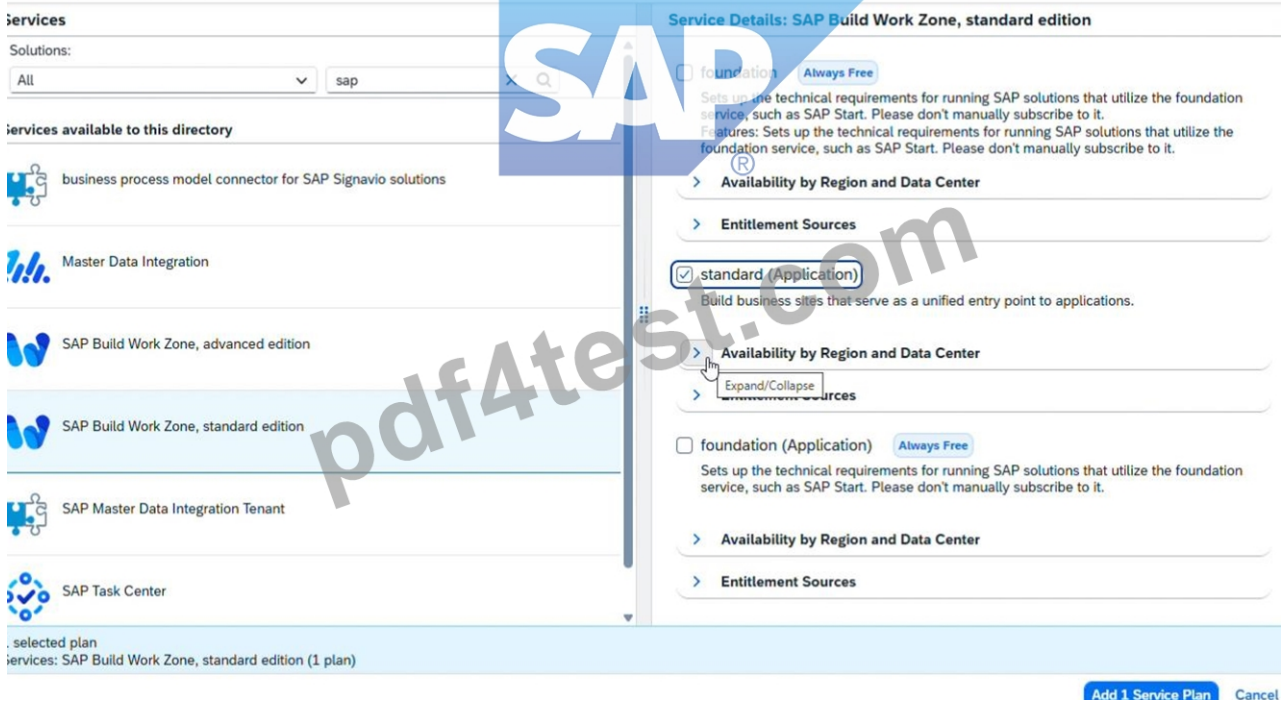

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credstore	proxy	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Destination Service	destination	lite	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Feature Flags Service	feature-flags-dashboard	dashboard (Application)	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	feature-flags	standard	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
HTML5 Application Repository Service	html5-apps-repo	lite	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		app-host	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		app-runtime	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Print Service	print	receiver	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		global-offerings-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		subaccount-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		subaccount-admin	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		container	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

NEW QUESTION # 14

.....

PDF4Test has made these formats so the students don't face issues while preparing for Administrating SAP Business Technology

Platform(C_ADBTP_2601) (C_ADBTP) certification exam dumps and get success in a single try. The web-based format is normally accessed through browsers. This format doesn't require any extra plugins so users can also use this format to pass SAP C_ADBTP test with pretty good marks.
