### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q54-Q59):

#### NEW QUESTION # 54

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Guard against fraud
- B. Generate creative accounting solutions
- C. Enforce compliance
- D. Simplify error resolution
- E. Reduce sales outstanding

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com

"Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C\_BCBAI\_2502 certification materials.

#### NEW QUESTION # 55

(Which of the following is Effective AI built on? Note: There are 2 correct answers to this question.)

- A. Open source LLMs
- B. Robust data foundation
- C. Cutting-edge algorithms or real-time processing
- D. Seamless integration

**Answer: B,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Effective AI in the context of SAP Business AI is built on a robust data foundation to ensure accurate and contextually relevant outcomes, and seamless integration to embed AI capabilities directly into business processes and applications for efficient deployment and scalability. This foundation enables customized AI solutions that leverage enterprise data securely while integrating with SAP and non-SAP systems.

Exact extracts supporting this:

"Effective AI is built on a robust data foundation and seamless integration, particularly when it involves customized AI solutions on the SAP ..."[learning.sap.com](https://learning.sap.com/learning-content/ba1/principles) From SAP Business AI principles: AI is "grounded in business data and embedded into every business function," emphasizing the data foundation and integration for effectiveness.[sap.com](https://www.sap.com)

"Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."[sap.com](https://www.sap.com) Other options are incorrect because:

Option A: While algorithms and processing are important, SAP emphasizes data and integration over cutting-edge algorithms alone for effective AI in business contexts.

Option C: SAP supports a range of LLMs, including proprietary ones, but does not position effective AI specifically on open-source models; focus is on secure, business-grounded AI.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," specifically the unit "Building Custom SAP Business AI Solutions," which highlights effective AI's reliance on data foundations and integration.

Supported by the SAP Business AI product page, aligning with C\_BCBAI\_2502 certification materials for positioning AI solutions.

### NEW QUESTION # 56

Which AI-driven capabilities are available in SAP Business AI?

There are 2 correct answers to this question.

Response:

- A. AI-powered fraud detection in finance
- B. Manual reconciliation of financial transactions
- C. Data input automation without AI involvement
- D. Machine Learning (ML) for automated data processing

Answer: A,D

### NEW QUESTION # 57

Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Environment, Health, and Safety (EHS)
- B. SAP Financial Closing Cockpit
- C. SAP Predictive Analytics
- D. SAP Business Network

Answer: A

Explanation:

SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements. For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.

The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.
