ADA-C02 Braindumps Torrent, Reliable ADA-C02 Exam Online

Many candidates find the Snowflake ADA-C02 exam preparation difficult. They often buy expensive study courses to start their Snowflake ADA-C02 certification exam preparation. However, spending a huge amount on such resources is difficult for many SnowPro Advanced Administrator ADA-C02 exam applicants. The latest Snowflake ADA-C02 Exam Dumps are the right option for you to prepare for the Snowflake ADA-C02 certification test at home.

Snowflake SnowPro Advanced Administrator ADA-C02 Sample Questions (Q53-Q58):

NEW QUESTION # 53

A Snowflake Administrator needs to set up Time Travel for a presentation area that includes facts and dimensions tables, and receives a lot of meaningless and erroneous IoT data. Time Travel is being used as a component of the company's data quality process in which the ingestion pipeline should revert to a known quality data state if any anomalies are detected in the latest load. Data from the past 30 days may have to be retrieved because of latencies in the data acquisition process.

According to best practices, how should these requirements be met? (Choose two.)

- A. Related data should not be placed together in the same schema. Facts and dimension tables should each have their own schemas.
- B. The `DATA_RETENTION_TIME_IN_DAYS` should be kept at the account level and never used for lower level containers (databases and schemas).
- C. Only TRANSIENT tables should be used to ensure referential integrity between the fact and dimension tables.
- D. The fact and dimension tables should have the same `DATA_RETENTION_TIME_IN_DAYS`.
- E. The fact and dimension tables should be cloned together using the same Time Travel options to reduce potential referential integrity issues with the restored data.

Answer: D,E

Explanation:

To ensure consistent recovery, fact and dimension tables must have the same DATA_RETENTION_TIME_IN_DAYS, so they can be restored to the same point in time.

Cloning the fact and dimension tables together with consistent Time Travel options ensures data integrity and avoids referential mismatches when reverting to a prior state.

NEW QUESTION # 54

DatabaseA has a single schema called Schema1. This schema contains many tables and views. The ANALYST role has privileges to select from all objects in DatabaseA.Schema1. The SYSADMIN role clones DatabaseA to DatabaseA_clone.

What privileges does the ANALYST role have on tables and views in DatabaseA_clone? (Choose two.)

- A. USAGE on the schema DatabaseA_clone
- B. SELECT on all tables, and only non-secure views in DatabaseA_clone.Schema1
- C. SELECT on all tables and views in DatabaseA_clone.Schema1
- D. SELECT on all tables, and only secure views in DatabaseA_clone.Schema1
- E. USAGE on the database DatabaseA_clone.Schema1

Answer: A,C

Explanation:

When a database is cloned, the privileges granted on objects within the source database are preserved in the cloned database. Roles that had privileges on objects such as tables and views continue to have those privileges on the corresponding cloned objects.

Therefore, the ANALYST role retains SELECT privileges on all tables and views within the cloned schema.

In addition, the cloned database and schema inherit the same access control configuration, allowing the role to use the schema within the cloned database.

NEW QUESTION # 55

What Snowflake capabilities are commonly used in rollback scenarios? (Choose two.)

- A. CREATE TABLE prd_table_bkp as SELECT * from table(result_scan('problematic_query_id'));
- B. SELECT SYSTEM\$CANCEL_QUERY('problematic_query_id');
- C. ALTER TABLE prd_table SWAP WITH prd_table_bkp;
- D. CREATE TABLE prd_table_bkp CLONE prd_table BEFORE (STATEMENT => 'problematic_query_id');
- E. Contact Snowflake Support to retrieve Fail-safe data.

Answer: C,D

Explanation:

Creating a clone of a table at a point in time before a problematic statement uses Snowflake Time Travel to restore the table's previous state without copying data. This allows recovery of the table as it existed before the issue occurred.

Swapping tables enables a fast rollback by exchanging the original production table with the restored backup table. This operation is metadata-only and allows immediate restoration of the previous version of the data with minimal downtime.

NEW QUESTION # 56

A user has enrolled in Multi-factor Authentication (MFA) for connecting to Snowflake. The user informs the Snowflake Administrator that they lost their mobile phone the previous evening.

Which step should the Administrator take to allow the user to log in to the system, without revoking their MFA enrollment?

- A. Alter the user and set MINS_TO_BYPASS_MFA to a value that will disable MFA long enough for the user to log in.
- B. Instruct the user to connect to Snowflake using SnowSQL, which does not support MFA authentication.
- C. Alter the user and set DISABLE_MFA to true, which will suspend the MFA requirement for 24 hours.
- D. Instruct the user to append the normal URL with /?mode=mfa_bypass&code= to log on.

Answer: A

Explanation:

The correct step is to use ALTER USER ... SET MINS_TO_BYPASS_MFA = <minutes> which temporarily suspends MFA for the specified duration, allowing the user to log in and reconfigure their MFA without revoking enrollment. This preserves MFA setup

and is the supported method in Snowflake.

NEW QUESTION # 57

What roles or security privileges will allow a consumer account to request and get data from the Data Exchange? (Choose two.)

- A. SECURITYADMIN
- B. SYSADMIN
- C. ACCOUNTADMIN
- D. IMPORT SHARE and CREATE DATABASE
- E. IMPORT PRIVILEGES and SHARED DATABASE

Answer: C,D

Explanation:

ACCOUNTADMIN role is required to access and manage Data Exchange listings and shares.

The IMPORT SHARE and CREATE DATABASE privileges are required to create databases from shared data.

NEW QUESTION # 58

.....

Our PDF version of the ADA-C02 learning braindumps can print on papers and make notes. Then windows software of the ADA-C02 exam questions, which needs to install on windows software. Also, the windows software is intelligent to simulate the real test environment. Then the online engine of the ADA-C02 Study Materials, which is convenient for you because it doesn't need to install on computers. It supports Windows, Mac, Android, iOS and so on. This version just can run on web browser.
