2V0-17.25 Exam Quick Prep - Reliable 2V0-17.25 Test Materials

Provided that you lose your exam with our 2V0-17.25 exam questions unfortunately, you can have full refund or switch other version for free. All the preoccupation based on your needs and all these explain our belief to help you have satisfactory and comfortable purchasing services on the 2V0-17.25 Study Guide. We assume all the responsibilities our 2V0-17.25 simulating practice may bring you foreseeable outcomes and you will not regret for believing in us assuredly.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 2	• Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 3	• VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 4	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.

How Good Is To Take Actual4dump VMware 2V0-17.25 Practice Test Material?

We are aimed to improve customer satisfaction and always put customers first. Our experts check daily whether there is an update to the VMware Cloud Foundation 9.0 Administrator torrent prep, and if there is an update system, we will automatically send it to you. So it can guarantee latest knowledge and keep up with the pace of change. Many people are worried that online shopping electronics have viruses. But you don't have to worry about our products. Our 2V0-17.25 Exam Questions are absolutely safe and virus-free. If you have any questions during the installation process, we will arrange professional staff on guidance of your installation and use. We always put your needs first.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q84-Q89):

NEW QUESTION # 84
An administrator is responsible for maintaining a VMware Cloud Foundation (VCF) instance. The administrator has been tasked with scaling the CPU and RAM resources of a virtual machine.
Which three configuration limitations must the administrator consider when completing the task?
(Choose three.)

- A. To add Memory to a powered on virtual machine, Memory Hot Add must be enabled.
- B. To enable the CPU Hot Add or Memory Hot Add feature, the virtual machine must be powered off.
- C. To add vCPUs to a powered down virtual machine, CPU Hot Add must be enabled.
- D. To remove Memory to a powered on virtual machine, Memory Hot Add must be enabled.
- E. To enable Memory Hot Add feature, the virtual machine compatibility must be ESXi 7.0 Update 2 or later.
- F. To add vCPUs to a powered on virtual machine CPU Hot Add must be enabled.

Answer: A,B,F

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
When scaling CPU and RAM for a virtual machine in a VMware Cloud Foundation environment, the administrator must consider these limitations:
To add Memory to a powered on virtual machine, Memory Hot Add must be enabled (A): Without Memory Hot Add, adding memory requires the VM to be powered off.
To add vCPUs to a powered on virtual machine CPU Hot Add must be enabled (C): CPU Hot Add allows additional virtual CPUs to be added while the VM is powered on; otherwise, the VM must be powered off.
To enable the CPU Hot Add or Memory Hot Add feature, the virtual machine must be powered off (F):
These features can only be activated or changed when the VM is not running.
Removing memory while powered on is not supported, and enabling these hot add features does not require the VM to be at a specific hardware compatibility level unless specified by certain new functionalities, but the core requirement is the VM must be powered off to enable the features. Adding vCPUs to a powered off VM does not require CPU Hot Add.

NEW QUESTION # 85
Which three statements are characteristics of a VMware Cloud Foundation (VCF) private cloud? (Choose three.)

- A. VCF offers the ability to configure full isolation of organizations in the private cloud.
- B. VCF supports only vSAN storage technology.
- C. VCF supports only the industry and regulatory compliance offered by the cloud service provider.
- D. VCF offers automation of operations and the ability to optimize network services.
- E. VCF supports the provisioning of both VMs and containers.
- F. VCF offers manual scalability of the environment through configurations or custom scripts.

Answer: A,D,E

Explanation:
VCF provides integrated automation and orchestration for Day 0-2 operations, including networking: VCF is a "full-stack IaaS" with

"automation and orchestration to simplify Day 0, Day 1, and Day 2 tasks." VCF supports modern apps: users can provision "VMs" and "Kubernetes workloads" from self-service services, proving both VM and container support. Multi-tenancy with strong isolation is native: Organizations are "secure and isolated" boundaries; All Apps organizations run "virtual machines (VMs), Kubernetes... multiple tenants with secure infrastructure isolation." Incorrect choices: VCF is not limited to vSAN only (supports VMFS/NFS/CNS as documented elsewhere) and does not rely on manual scalability-automation is core. Compliance is provided within the private cloud, not only by a CSP.

NEW QUESTION # 86
What is the first step in downloading the vSphere CLI tools to a developer workstation?

- A. Visit the VMware Downloads page and locate the vSphere CLI tools.
- B. Install a compatible version of Java Runtime Environment
- C. Configure the workstation's network settings to connect to the vSphere environment.
- D. Register the developer workstation with the Active Directory.

Answer: A

Explanation:
The first step in downloading the vSphere CLI tools is to visit the VMware Downloads page, where the vSphere CLI tools are available. From there, you can select the appropriate version for your environment and begin the download process.

NEW QUESTION # 87
A newly deployed ESXi host fails to join vCenter Server due to a certificate mismatch.
Which vSphere component or service most likely handles certificate management?

- A. Enhanced Linked Mode
- B. Auto Deploy
- C. vSphere Certificate Manager
- D. vCenter Content Library

Answer: C

Explanation:
vSphere Certificate Manager is responsible for generating and managing certificates. Enhanced Linked Mode shares configuration between multiple vCenter Servers, Auto Deploy provisions ESXi hosts, and Content Library manages OVFs, ISOs, etc.

NEW QUESTION # 88
Which statement describes Harbor?

- A. Harbor, formerly known as Bitnami, is an image catalog for downloading verified open-source packages.
- B. Harbor requires all images be pulled from GitHub for validation.
- C. Harbor is an open source registry that secures artifacts with policies and RBAC, scans images for vulnerabilities, and signs images as trusted.
- D. Harbor is an image scanner used to verify that images are free from vulnerabilities and patches.

Answer: C

Explanation:
According to the VCF 9.0 Container Registry Documentation, Harbor is defined as:
"Harbor is an open source registry that secures artifacts with policies and role-based access control, ensures images are scanned and free from vulnerabilities, and signs images as trusted." This description aligns exactly with option A. Harbor is not Bitnami (B), though it integrates with open-source images. It includes vulnerability scanning but is not only an image scanner (C). It does not require GitHub as a source (D); Harbor can integrate with multiple registries.
Therefore, Harbor's primary role within VCF is to act as a secure image registry with RBAC, scanning, and signing capabilities.

NEW QUESTION # 89

Actual4dump VMware Cloud Foundation 9.0 Administrator (2V0-17.25) PDF exam questions file is portable and accessible on laptops, tablets, and smartphones. This pdf contains test questions compiled by experts. Answers to these pdf questions are correct and cover each section of the examination. You can even use this format of VMware Cloud Foundation 9.0 Administrator questions without restrictions of place and time. This VMware 2V0-17.25 Pdf Format is printable to read real questions manually. We update our pdf questions collection regularly to match the updates of the VMware 2V0-17.25 real exam.
