GH-100 Reliable Test Sims - GH-100 Valid Study Plan

This is a good way to purchase valid exam preparation materials for your coming GH-100 test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our GH-100 exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of Microsoft GH-100 Exam Preparation, even adjust your exam mood actively.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 2	• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

Topic 3	• Manage GitHub Packages:This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.

Microsoft GitHub Administration Sample Questions (Q25-Q30):

NEW QUESTION # 25

When a user becomes a member of multiple GitHub organizations, which THREE of the following are important considerations for administrators? (Choose three.)

- A. The user will automatically have the same role across all organizations.
- B. The user will need to authorize credentials separately for each SAML-enabled organization.
- C. The user's repository access and/or team membership needs to be managed separately for each organization.
- D. The user will have different permission levels in each organization.
- E. The user's profile information becomes private to non-organization members.
- F. The user's personal repositories will become accessible to all organizations.

Answer: B,C,D

Explanation:

A user's repository access and team memberships are scoped to each organization, so admins must configure permissions separately per org.

When an organization enforces SAML SSO, each member must authorize their personal access tokens or SSH keys for that org, requiring separate approval for each SAML-enabled organization Roles and permission levels (owner, member, billing manager, repository roles, etc.) are assigned on a per-organization basis, so a user often has different permissions in different organizations.

NEW QUESTION # 26

Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Actions are limited to reading repository content only
- B. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines
- C. GitHub Apps can only be used inside .github/workflows
- D. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories

Answer: D

Explanation:

GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

NEW QUESTION # 27

Which of the following correctly describes the difference between controlling actions at the enterprise level versus the organization level in GitHub?

- A. Enterprise policies apply only to public repositories, while organization policies apply to public, internal, and private repositories.
- B. Enterprise policies configure mandatory settings for organizations.
- C. Enterprise policies and organization policies are independent, with organization policies taking precedence for repositories within the organization.
- D. Enterprise policies can block specific actions, while organization policies can only enable or disable actions entirely.

Answer: B

Explanation:

Enterprise policies let you define and enforce mandatory settings across all member organizations - organization-level policies then

operate within the options that the enterprise policy exposes.

NEW QUESTION # 28

You are using GitHub-hosted runners and need to securely deploy to an internal system. The security team requires that these runners use IP address ranges that would not be shared with other companies. Which of the following approaches would meet their requirements?

- **A. GitHub-hosted larger runners with static IP addresses**
- B. GitHub-hosted standard runners, using the IP addresses provided in "actions" from https://api.github.com/meta
- C. GitHub-hosted standard runners, using the IP addresses provided in "api" from https://api.github.com/meta
- D. GitHub-hosted larger runners with Azure private networking

Answer: A

Explanation:
GitHub's larger runners let you reserve dedicated static IP addresses for your workflows - so you can allow-list those IPs in your firewall and be sure they aren't shared with any other tenant.

NEW QUESTION # 29

What additional capability does secret scanning offer for private repositories on GitHub Enterprise Cloud?

- **A. Allows custom pattern definitions for internal secret formats.**
- B. Rewrites history to remove secrets.
- C. Revokes GitHub access tokens automatically.
- D. Disables any code that contains a secret.

Answer: A

Explanation:
Secret scanning in private repositories on GitHub Enterprise Cloud lets you define and use custom regular-expression patterns - so you can detect internal or proprietary secret formats beyond the default partner-provided types.

NEW QUESTION # 30

......

Although the Microsoft GH-100 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our Microsoft GH-100 Study Materials, you will cope with it like a piece of cake. So our GH-100 learning questions will be your indispensable practice materials during your way to success.
