2026 Latest Prep4sureExam HPE7-A06 PDF Dumps and HPE7-A06 Exam Engine Free Share: <https://drive.google.com/open?id=1I8rbGlu7dojIBFKoYPFYDedvFtDaFSGq>

In order to gain more competitive advantages when you are going for a job interview, more and more people have been longing to get a HPE7-A06 certification. They think the certification is the embodiment of their ability; they are already convinced that getting a HPE7-A06 certification can help them look for a better job. There is no doubt that it is very difficult for most people to pass the exam and have the certification easily. If you are also weighted with the trouble about a HPE7-A06 Certification, we are willing to soothe your trouble and comfort you.

The advancements in computer technology are faster now than ever before, (at the same time) bringing much convenience to our daily life and work. HP HPE7-A06 braindumps materials can help workers pass exams and get certifications. If workers get good computer certifications you will apply for good positions and get nice opportunities. HPE7-A06 Braindumps materials will assist you to achieve your ideal and may even change people's life.

## Reliable HPE7-A06 Exam Book - Valid HPE7-A06 Braindumps

In order to help customers, who are willing to buy our HPE7-A06 test torrent, make good use of time and accumulate the

knowledge, Our company have been trying our best to reform and update our HPE Campus Access Switching Expert Written Exam exam tool. "Quality First, Credibility First, and Service First" is our company's purpose, we deeply hope our HPE7-A06 Study Materials can bring benefits and profits for our customers. So we have been persisting in updating our HPE7-A06 test torrent and trying our best to provide customers with the latest study materials.

## HPE Campus Access Switching Expert Written Exam Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Drag and Drop Question

Match the network technology to the customer requirement.

<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; padding: 5px; width: 40px; height: 30px; text-align: center;">ECMP</div> <div style="border: 1px solid black; padding: 5px; width: 40px; height: 30px; text-align: center;">EVPN</div> <div style="border: 1px solid black; padding: 5px; width: 40px; height: 30px; text-align: center;">VNI</div> <div style="border: 1px solid black; padding: 5px; width: 40px; height: 30px; text-align: center;">VXLAN</div> </div>	<p><b>Answer Area</b></p> <p>Establish redundant links between the aggregation and core layers. <input type="checkbox"/></p> <p>Extend layer 2 across multiple sites. <input type="checkbox"/></p> <p>Identify individual layer 2 segments in an overlay. <input type="checkbox"/></p> <p>Minimize configuration steps to establish tunnels between sites. <input type="checkbox"/></p>
--	---

**Answer:**

Explanation:

	<p><b>Answer Area</b></p> <p>Establish redundant links between the aggregation and core layers. <input type="checkbox"/> ECMP</p> <p>Extend layer 2 across multiple sites. <input type="checkbox"/> VXLAN</p> <p>Identify individual layer 2 segments in an overlay. <input type="checkbox"/> VNI</p> <p>Minimize configuration steps to establish tunnels between sites. <input type="checkbox"/> EVPN</p>
---	---

### NEW QUESTION # 67

What is the maximum number of interfaces that can be active in the same LACP link on AOS-CX access layer switches?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

On AOS-CX switches, an LACP (802.3ad) link aggregation group can include up to 16 active member interfaces. This allows

higher bandwidth aggregation and redundancy at the access layer.

### NEW QUESTION # 68

A client is unable to connect to the network. In the HPE Aruba Networking ClearPass access tracker, we can see an EAP timeout. What is a possible cause of this message?

- A. The radius server can see that the client certificate is expired.
- B. The radius server does not trust the client certificate.
- C. The client does not trust the radius server certificate.
- D. The client can see that the radius server certificate is expired.

**Answer: C**

Explanation:

An EAP timeout commonly occurs when the client does not trust the RADIUS server certificate, causing the authentication process to stall until it times out. This is a typical issue in 802.1X/EAP deployments if the server certificate is not trusted by the client.

### NEW QUESTION # 69

You want to use OSPF to advertise a only .\16 summary route for the SVIs below to a neighbor In the same area (area 0). Which configuration will achieve this?

- A. 

```
router ospf 1
  redistribute connected
  summary-address 10.1.0.0/16
```
- B. 

```
interface vlan 11
  ip ospf 1 area 0
!
interface vlan 12
  ip ospf 1 area 0
!
interface vlan 13
  ip ospf 1 area 0
!
router ospf 1
  summary-address 10.1.0.0/16
```
- C. 

```
router ospf 1
  redistribute connected
  summary-address 10.1.0.0/16
```
- D. 

```
interface vlan 11
  ip ospf 1 area 0
!
interface vlan 12
  ip ospf 1 area 0
!
interface vlan 13
  ip ospf 1 area 0
!
router ospf 1
  area 0 range 10.1.0.0/16
```
- E. 

```
router ospf 1
  redistribute connected
  area 0 range 10.1.0.0/16
```

**Answer: D**

Explanation:

The goal is to configure OSPF on a router so that it advertises only a 10.1.0.0/16 summary route for the specific SVIs (VLAN 11, 12, 13, assumed to be within the 10.1.x.x range) to its OSPF neighbors within the same area (Area 0).

\* OSPF Intra-Area Behavior: A fundamental principle of OSPF (link-state protocols) is that all routers within the same area must have an identical Link State Database (LSDB) for that area. This means all routers learn about all the specific networks (Type-1 Router LSAs, Type-2 Network LSAs) within their area. OSPFv2 does not support summarizing routes in a way that hides specific network LSAs from other routers within the same area. Summarization occurs only at area boundaries (by ABRs using Type-3 Summary LSAs via the area range command) or for external routes redistributed into OSPF (by ASBRs using Type-5 External LSAs via the summary-address command).

\* Analysis of Options:

\* A) area 0 range 10.1.0.0/16: This command is used on an Area Border Router (ABR) to summarize routes originating from Area 0 when advertising them into another area (e.g., the backbone). It does not affect LSA flooding within Area 0. It also includes redistribute connected, which is unrelated here.

\* B) summary-address 10.1.0.0/16: This command is used on an Autonomous System Boundary Router (ASBR) to summarize external routes being redistributed into OSPF. It is not used for summarizing internal OSPF routes like SVIs defined within an OSPF area.

\* C) & D) summary-address 10.1.0.0/16: Same issue as B; incorrect command for summarizing internal OSPF routes.

\* E) area 0 range 10.1.0.0/16: Similar to A, this uses the area range command. It correctly shows the SVIs configured for OSPF Area 0 first. However, like A, this command performs inter-area summarization on an ABR and does not suppress the specific LSAs within Area 0.

\* Conclusion: The question asks for something that OSPFv2 cannot do: advertise only a summary route within the same area while suppressing specifics. Therefore, none of the configurations will achieve the exact stated outcome. However, if the question is flawed and intends to ask which configuration uses the correct command structure for summarizing internal OSPF routes (even if only effective between areas), then the area range command is the relevant one. Both A and E use this command. Option E is slightly better structured as it shows the interfaces being added to OSPF Area 0 first. Assuming this is the intended direction despite the impossibility of the specific request, E is the most plausible choice among the given options.

References: RFC 2328 (OSPFv2), OSPF Configuration Guides for AOS-CX (explaining area range for ABRs and summary-address for ASBRs). This relates to the "Routing" (16%) objective.

## NEW QUESTION # 70

You have recently configured a switch for 802.1X authentication with HPE Aruba Networking ClearPass. A security admin is seeing events with the following description in ClearPass Event Viewer.

RADIUS authentication attempt from unknown NAD (10.10.1.10:1812)

Which command should you use to identify the configuration issue?

- A. show radius-server detail
- B. show aaa authentication-server radius
- C. show ip source-interface radius
- D. show radius-server shared-secret

**Answer: C**

Explanation:

The ClearPass Event Viewer message "RADIUS authentication attempt from unknown NAD (10.10.1.10:

1812)" indicates that ClearPass received a RADIUS request from the IP address 10.10.1.10, but this IP is not configured as a trusted Network Access Device (NAD) in ClearPass's network device list, or the shared secret doesn't match. The first step in troubleshooting on the switch side is to verify which source IP address the switch is actually using to send these RADIUS requests.

\* RADIUS Source IP: AOS-CX switches can be configured to use a specific source IP address for RADIUS packets, often using the ip source-interface radius [vrf <vrf-name>] command. This is important if the switch has multiple IP interfaces or uses VRFs.

\* Analysis of Commands:

\* A. show ip source-interface radius: This command directly displays the configured source interface and IP address used for RADIUS communications, allowing comparison with the IP configured in ClearPass.

\* B. show aaa authentication-server radius: Shows server group configuration, not the source IP used by the switch.

\* C. show radius-server shared-secret: Not a standard command; secrets are usually masked in other commands.

\* D. show radius-server detail: Shows configured RADIUS server details but doesn't explicitly show the source IP the switch is using to originate packets.

\* Conclusion: To identify why ClearPass sees requests from an "unknown NAD" IP (10.10.1.10), the first step on the switch is to confirm which source IP it's using. show ip source-interface radius provides this crucial information.

References: AOS-CX Security Guide (RADIUS Client Configuration, ip source-interface), ClearPass Documentation (NAD Configuration). This relates to "Authentication/Authorization" (9%) and "Troubleshooting" (10%) objectives.

## NEW QUESTION # 71

.....

In order to meet the demands of all the customers, we can promise that we will provide all customers with three different versions of the HPE7-A06 study materials: PDF version, Soft version and APP version. In addition, we can make sure that we are going to

offer high quality HPE7-A06 practice study materials with reasonable prices but various benefits for all customers. It is our sincere hope to help you pass HPE7-A06 exam by the help of our HPE7-A06 certification guide. Just come and buy our HPE7-A06 learning prep!

**Reliable HPE7-A06 Exam Book:** <https://www.prep4sureexam.com/HPE7-A06-dumps-torrent.html>

HP Valuable HPE7-A06 Feedback Just click on the mouse to have a look, giving you a chance to try, Have you heard HPE7-A06 practice questions, To achieve the requirements of our surrounding, everyone is working hard to hold many different professional certificates and improve personal ability eagerly (HP HPE7-A06 test quiz materials), we are no exception, HP Valuable HPE7-A06 Feedback When you are shilly-shally too long time, you may be later than others.

In terms of messaging, there are several major distinctions Valid HPE7-A06 Braindumps between social media and traditional communications channels, Formally speaking, a job is any unit of work that can be scheduled and HPE7-A06 Pass4sure Dumps Pdf processed, while a task is a group of related jobs that work together to achieve some function.

## **TOP Valuable HPE7-A06 Feedback: HPE Campus Access Switching Expert Written Exam - The Best HP Reliable HPE7-A06 Exam Book**

Just click on the mouse to have a look, giving you a chance to try, Have you heard HPE7-A06 Practice Questions, To achieve the requirements of our surrounding, everyone is working hard to hold many different professional certificates and improve personal ability eagerly (HP HPE7-A06 test quiz materials), we are no exception.

When you are shilly-shally too long time, you HPE7-A06 may be later than others, Candidates only need to practice the questions and answers of our HPE7-A06 exam guide PDF several times and master the full of exam materials so that they will pass exam casually.
