Maybe you are under tremendous pressure now, but you need to know that people's best job is often done under adverse circumstances. Ideological pressure, even physical pain, can be a mental stimulant. Turn pressure into power, which may be your chance to complete the transformation. But our CIPM Exam Questions can help you become more competitive easier than you can imagine. With a pass rate of 98% to 100%, our CIPM study materials can help you achieve your dream easily. And we have money back guarantee on our CIPM practice guide.

The CIPM exam covers a wide range of privacy management topics, including creating a privacy program, managing privacy risks, implementing privacy policies, and ensuring compliance with global privacy laws and regulations. CIPM exam is designed to test the candidate's knowledge of privacy laws and regulations, as well as their ability to apply this knowledge to real-world scenarios. The CIPM exam is a rigorous and comprehensive test that requires candidates to have a thorough understanding of privacy management principles and practices.

The International Association of Privacy Professionals (IAPP) CIPM (Certified Information Privacy Manager) exam is a rigorous certification exam that assesses the knowledge and skills of individuals who manage privacy programs. CIPM exam is designed to test the knowledge and understanding of privacy laws and regulations, privacy program management, privacy operations, and communication and training. Passing the CIPM exam is a testament to an individual's knowledge and experience in managing privacy programs.

## CIPM Reliable Test Guide, CIPM Relevant Exam Dumps

PrepAwayETE will provide you with a standard, classified, and authentic study material for all the IT candidates. Our experts are trying their best to supply you with the high quality CIPM training pdf which contains the important knowledge required by the actual test. The high quality and valid CIPM study torrent will make you more confidence in the real test. Additionally, you will get the updated IAPP vce dumps within one year after payment. With the updated CIPM study material, you can successfully pass at first try.

IAPP CIPM certification is an excellent choice for professionals who are looking to advance their careers in privacy management. Certified Information Privacy Manager (CIPM) certification provides a comprehensive understanding of global privacy laws and regulations, and prepares professionals to develop and implement effective privacy programs within their organizations. With the growing importance of data privacy in today's digital landscape, the CIPM Certification is a valuable asset for anyone working in the field of privacy management.

### IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

##### SCENARIO

Please use the following to answer the next QUESTION:

Penny has recently joined Ace Space, a company that sells homeware accessories online, as its new privacy officer. The company is based in California but thanks to some great publicity from a social media influencer last year, the company has received an influx of sales from the EU and has set up a regional office in Ireland to support this expansion. To become familiar with Ace Space's practices and assess what her privacy priorities will be, Penny has set up meetings with a number of colleagues to hear about the work that they have been doing and their compliance efforts.

Penny's colleague in Marketing is excited by the new sales and the company's plans, but is also concerned that Penny may curtail some of the growth opportunities he has planned. He tells her "I heard someone in the breakroom talking about some new privacy laws but I really don't think it affects us. We're just a small company. I mean we just sell accessories online, so what's the real risk?" He has also told her that he works with a number of small companies that help him get projects completed in a hurry. "We've got to meet our deadlines otherwise we lose money. I just sign the contracts and get Jim in finance to push through the payment. Reviewing the contracts takes time that we just don't have." In her meeting with a member of the IT team, Penny has learned that although Ace Space has taken a number of precautions to protect its website from malicious activity, it has not taken the same level of care of its physical files or internal infrastructure. Penny's colleague in IT has told her that a former employee lost an encrypted USB key with financial data on it when he left. The company nearly lost access to their customer database last year after they fell victim to a phishing attack. Penny is told by her IT colleague that the IT team

"didn't know what to do or who should do what. We hadn't been trained on it but we're a small team though, so it worked out OK in the end." Penny is concerned that these issues will compromise Ace Space's privacy and data protection.

Penny is aware that the company has solid plans to grow its international sales and will be working closely with the CEO to give the organization a data "shake up". Her mission is to cultivate a strong privacy culture within the company.

Penny has a meeting with Ace Space's CEO today and has been asked to give her first impressions and an overview of her next steps.

To help Penny and her CEO with their objectives, what would be the most helpful approach to address her IT concerns?

- A. Ensure inventory of IT assets is maintained
- B. Host a town hall discussion for all IT employees
- C. Roll out an encryption policy
- D. Undertake a tabletop exercise

#### Answer: D

##### Explanation:

The most helpful approach to address Penny's IT concerns is to undertake a tabletop exercise. A tabletop exercise is a simulated scenario that tests the organization's ability to respond to a security incident, such as a data breach, a cyberattack, or a malware infection. A tabletop exercise typically involves:

- \* A facilitator who guides the participants through the scenario and injects additional challenges or variables
- \* A scenario that describes a plausible security incident based on real-world threats or past incidents
- \* A set of objectives that define the expected outcomes and goals of the exercise
- \* A set of questions that prompt the participants to discuss their roles, responsibilities, actions, decisions, and communications during

the incident response process

- \* A feedback mechanism that collects the participants' opinions and suggestions on how to improve the incident response plan and capabilities A tabletop exercise can help Penny and her CEO with their objectives by:
- \* Enhancing the awareness and skills of the IT team and other stakeholders involved in incident response
- \* Identifying and addressing the gaps, weaknesses, and challenges in the incident response plan and process
- \* Improving the coordination and collaboration among the IT team and other stakeholders during incident response
- \* Evaluating and validating the effectiveness and efficiency of the incident response plan and process
- \* Generating and implementing lessons learned and best practices for incident response

#### NEW QUESTION # 54

##### SCENARIO

Please use the following to answer the next QUESTION:

Perhaps Jack Kelly should have stayed in the U.S. He enjoys a formidable reputation inside the company, Special Handling Shipping, for his work in reforming certain "rogue" offices. Last year, news broke that a police sting operation had revealed a drug ring operating in the Providence, Rhode Island office in the United States. Video from the office's video surveillance cameras leaked to news operations showed a drug exchange between Special Handling staff and undercover officers.

In the wake of this incident, Kelly had been sent to Providence to change the "hands off" culture that upper management believed had let the criminal elements conduct their illicit transactions. After a few weeks under Kelly's direction, the office became a model of efficiency and customer service. Kelly monitored his workers' activities using the same cameras that had recorded the illegal conduct of their former co-workers.

Now Kelly has been charged with turning around the office in Cork, Ireland, another trouble spot. The company has received numerous reports of the staff leaving the office unattended. When Kelly arrived, he found that even when present, the staff often spent their days socializing or conducting personal business on their mobile phones. Again, he observed their behaviors using surveillance cameras. He issued written reprimands to six staff members based on the first day of video alone.

Much to Kelly's surprise and chagrin, he and the company are now under investigation by the Data Protection Commissioner of Ireland for allegedly violating the privacy rights of employees. Kelly was told that the company's license for the cameras listed facility security as their main use, but he does not know why this matters. He has pointed out to his superiors that the company's training programs on privacy protection and data collection mention nothing about surveillance video.

You are a privacy protection consultant, hired by the company to assess this incident, report on the legal and compliance issues, and recommend next steps.

Knowing that the regulator is now investigating, what would be the best step to take?

- A. Negotiate the terms of a settlement before formal legal action takes place.
- B. Use your background and knowledge to set a course of action.
- **C. Consult an attorney experienced in privacy law and litigation.**
- D. If you know the organization is guilty, advise it to accept the punishment.

**Answer: C**

Explanation:

Explanation

This answer is the best step to take knowing that the regulator is now investigating, as it can help the organization to obtain legal advice and representation on how to respond to and cooperate with the investigation, as well as how to defend or resolve any potential claims or disputes that may arise from the incident. Consulting an attorney experienced in privacy law and litigation can also help the organization to understand its rights and obligations under the applicable laws and regulations, as well as the possible outcomes and consequences of the investigation. An attorney can also assist the organization in preparing and submitting any required documents or evidence, communicating with the regulator or other parties, negotiating a settlement or agreement, or challenging or appealing any decisions or actions taken by the regulator. #### NEW QUESTION # 55

The main reason the response to this incident should be integrated into the Business Continuity Plan (BCP) is because?

- A. The impact on the company's competitive advantage is potentially significant.
- **B. Major stakeholders are involved from every critical area of the business.**
- C. The need for retraining employees will be paramount.
- D. The repercussions for the company could have significant environmental impacts.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

A Business Continuity Plan (BCP) ensures that organizations can recover from disruptions and maintain essential functions. Major stakeholders from every critical area must be involved to coordinate an effective response.

- \* Option A (Environmental impacts) is relevant for physical disaster recovery but not directly for a data breach.
- \* Option B (Retraining employees) is important but does not justify integrating the incident into BCP.
- \* Option D (Competitive advantage loss) is a consequence but not the primary reason for BCP integration.
- \* Option C (Major stakeholders are involved from every critical area of the business) is the correct answer because a comprehensive response requires cross-functional collaboration, including IT, legal, HR, and compliance teams.

### NEW QUESTION # 56

Which of the following is NOT a main technical data control area?

- A. Data minimization.
- B. Access controls.
- **C. Obfuscation.**
- D. Tokenization.

**Answer: C**

Explanation:

Explanation

Obfuscation is not a main technical data control area. Obfuscation means hiding or disguising data or information to make it less intelligible or accessible. Obfuscation can be used as a security measure or a privacy-enhancing technique, but it is not a specific type of data control. The main technical data control areas are tokenization, encryption, access controls, and data minimization.

Tokenization means replacing sensitive data with non-sensitive substitutes called tokens that have no intrinsic value. Encryption means transforming data into an unreadable format that can only be decrypted with a key. Access controls mean restricting who can access or modify data based on their roles, permissions, or authentication methods. Data minimization means collecting, storing, and processing only the minimum amount of data necessary for a specific purpose<sup>1, 2</sup>. ### NEW QUESTION # 57

In privacy protection, what is a "covered entity"?

- A. A privacy office or team fully responsible for protecting personal information.
- **B. An organization subject to the privacy provisions of HIPAA.**
- C. Personal data collected by a privacy organization.
- D. Hidden gaps in privacy protection that may go unnoticed without expert analysis.

**Answer: B**

Explanation:

A covered entity is an organization that is subject to the privacy provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996. HIPAA regulates how covered entities use and disclose protected health information (PHI) of individuals.

Covered entities include health plans, health care clearinghouses, and health care providers that transmit health information electronically. Reference: [HIPAA for Professionals], [What is a Covered Entity?]
