You essentially have a baffled perspective toward it and some even consider not giving the SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects exam since they can't concentrate exactly as expected. SAP C-S4PM2-2507 Exam they need time to cover each point and this is unimaginable considering how they are left with only a piece of a month to give the SAP C-S4PM2-2507 exam.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q73-Q78):

NEW QUESTION # 73

During a system conversion, which of the following does SAP recommend you do in the Discover phase of the SAP Activate methodology ?

- A. Define an integration test strategy.
- B. Perform a sandbox conversion.
- C. Create a cutover plan.
- **D. Define a system conversion strategy.**

Answer: D

Explanation:

In a system conversion project using the SAP Activate methodology, the Discover Phase focuses on understanding the project scope, evaluating readiness, and planning conversion activities.

D). Define a system conversion strategy

During the Discover Phase, SAP recommends defining the system conversion strategy. This includes analyzing the existing system landscape, determining conversion prerequisites, and defining the overall approach for technical and functional conversion activities.

Other options:

- * A. Define an integration test strategy: Performed later in the Realize Phase.
- * B. Create a cutover plan: Defined during the Deploy Phase.
- * C. Perform a sandbox conversion: Conducted during the Prepare or Explore Phase.

NEW QUESTION # 74

When applying a cloud mindset in a Greenfield implementation, which of the following should you consider? Note: There are 2

correct answers to this question.

- A. Use quality gates
- B. Ensure transparency on deviations
- C. Use supported extensibility technologies
- D. Use SAP Digital Discovery Assessment

Answer: B,C

NEW QUESTION # 75

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. Access to the Software Update Manager tool
- B. Nomination of a lead configuration expert for content activation
- C. Detailed Digital Discovery Assessment with SAP Best Practices
- D. Nomination of a lead conversion expert for content activation

Answer: B,C

NEW QUESTION # 76

Which functions of the System View Dashboard in SAP Cloud ALM help maintain a clean core and support upgrades for SAP S/4HANA? Note: There are 3 correct answers to this question.

- A. Version insights: Ensure your installed SAP S/4HANA product version is up to date.
- B. Performance Benchmarking: Compare performance against Industry Peers.
- C. Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.
- D. Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).
- E. Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.

Answer: A,C,D

Explanation:

Step 1 - Understanding the question

This question asks about the System View Dashboard in SAP Cloud ALM and how it helps maintain a clean core and support upgrades for SAP S/4HANA.

A "clean core" means keeping the SAP system as standard as possible, reducing unnecessary custom code or modifications that can complicate upgrades.

Step 2 - Evaluate each option

Option A: Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

This is correct.

The System View Dashboard helps identify extensions and modifications that might impact system upgrades.

It provides visibility into the system landscape and highlights potential upgrade risks due to custom code or integrations.

Option B: Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.

This is incorrect.

The System View Dashboard does not perform cost analysis. Its purpose is monitoring system health, readiness, and upgrade-related insights, not financial evaluation.

Option C: Performance Benchmarking: Compare performance against industry peers.

This is incorrect.

Performance benchmarking is not part of the System View Dashboard. It focuses on system version, tool readiness, and upgrade preparation, not performance comparisons.

Option D: Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).

This is correct.

The dashboard checks whether key monitoring and analysis tools-like SAP EarlyWatch Alerts or other SAP monitoring services-are active.

These tools provide valuable data to support clean-core management and help ensure system stability before and after upgrades.

Option E: Version insights: Ensure your installed SAP S/4HANA product version is up to date.

This is correct.

The dashboard provides insights into the installed product version, ensuring that the system is on a supported release and highlighting
