DevOps-Foundation test materials are famous for instant access to download. And you can obtain the download link and password within ten minutes, so that you can start your learning as quickly as possible. DevOps-Foundation exam dumps are verified by professional experts, and they possess the professional knowledge for the exam, therefore you can use them at ease. In order to let you know the latest information for the exam, we offer you free update for one year, and our system will send the latest version for DevOps-Foundation Exam Dumps to your email automatically.

Our company's top DevOps-Foundation exam braindumps are meant to deliver you the best knowledge on this subject. If you study with our DevOps-Foundation study guide, you will find that not only you can get the most professional and specialized skills to solve the problems in your daily work, but also you can pass the exam without difficulty and achieve the certification. What is more, the prices of our DevOps-Foundation training engine are quite favorable.

Valid DevOps-Foundation Test Sample, DevOps-Foundation Pdf Format

In spite of the high-quality of our Peoplecert DevOps-Foundation study braindumps, our after-sales service can be the most attractive project in our DevOps-Foundation guide questions. We have free online service which means that if you have any trouble using our Peoplecert DevOps-Foundation Learning Materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which of the following is NOT a dimension of transformational leadership?

- A. Personal recognition
- B. Vision
- C. **Coercive communication**
- D. Intellectual stimulation

Answer: C

Explanation:

Coercive communication(using force or threat) is not a transformational leadership dimension.

Transformational leaders:

- * Inspire vision
- * Recognize contributions
- * Stimulate new ideas (intellectual stimulation)
- * Foster intrinsic motivation

Extract-style reference:

"Transformational leadership builds trust, motivates by vision, provides intellectual stimulation, and recognizes individuals-not by coercion, but by inspiration."

-Transformational Leadership(James Burns), PeopleCert DevOps Foundation v3.6

NEW QUESTION # 79

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- A. All of the above
- B. Simulations
- C. Hackathons
- D. Common workspaces

Answer: A

Explanation:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

- * A: Common workspaces promote informal communication and rapid problem-solving
- * B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.
- * C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth.

Thus, D-All of the above-is correct.

NEW QUESTION # 80

Which of the following does NOT make DevOps important now?

- A. Time to value must accelerate
- B. Enterprises have young, nimble start-up competitors
- C. Consumers have "app" mentalities and expectations
- D. IT must continue to operate in a silo culture

Answer: D

Explanation:

The urgency for DevOps adoption is driven by increasing market competition, evolving customer expectations, and the need for rapid delivery of value.

* B: Nimble start-ups often deliver faster and more innovatively, putting pressure on established enterprises.

* C: Customers expect continuous improvement and seamless digital experiences ("app mentality").

* D: Reducing time-to-value is essential for staying competitive and meeting business demands.

However, A describes a siloed culture-something DevOps actively works to eliminate, not a reason for its importance. In fact, remaining siloed is an obstacle to achieving DevOps benefits, not a driver for adoption.

Therefore, A is the correct "NOT" choice.

NEW QUESTION # 81

Which of the following is NOT a characteristic of a DevOps culture?

- A. Accountability
- B. Data driven
- C. Reflective
- D. **Command and control**

Answer: D

Explanation:

A DevOps culture is built on principles like being data-driven, reflective (willing to learn from experience), and accountable (taking ownership, not blaming others).

* Command and control cultures are the opposite: hierarchical, rigid, discouraging initiative and learning. DevOps strives for empowerment, experimentation, and psychological safety.

Why not the others?

* Data-driven: Decisions are based on measurement and feedback, core to DevOps.

* Reflective: Regular retrospectives and post-incident reviews are essential DevOps rituals.

* Accountability: Teams are responsible for the software they build and operate.

Reference/Extract:

"DevOps culture values collaboration, continuous learning, and a data-driven, accountable approach to improvement. Command and control structures stifle innovation and slow down feedback."

-State of DevOps Report(2019), PeopleCert DevOps Foundation v3.6 Section 3.2

NEW QUESTION # 82

What are the CORRECT set of DevOps values?

- A. Culture, Automation, Lean, Metrics, Sharing
- B. **Culture, Automation, Lean, Measurement, Sharing**
- C. Culture, Accountability, Lean, Metrics, Sharing
- D. Culture, Collaboration, Communication, Commitment

Answer: B

Explanation:

According to PeopleCert DevOps Foundation v3.6, the five primary values that guide successful DevOps adoption are summarized in the CALMS framework: Culture, Automation, Lean, Measurement, and Sharing.

* Culture focuses on breaking down silos, encouraging trust, and promoting collaboration between development, operations, security, QA, and business teams.

* Automation is essential for speeding up delivery, reducing manual errors, and ensuring repeatability across the software delivery lifecycle.

* Lean emphasizes the elimination of waste, limiting work in progress (WIP), and improving flow.

* Measurement means using metrics and data to inform decisions, identify bottlenecks, and drive continuous improvement.

* Sharing fosters transparency, knowledge transfer, and a unified approach to goals and problem-solving.

Option A replaces automation and lean principles with softer collaboration aspects, which are important but not recognized as the formal value set. Option C replaces "Measurement" with "Metrics," which is only a part of measurement. Option D substitutes "Accountability" for "Automation," which is not part of the CALMS model.

Therefore, the official correct set of values per the DevOps Foundation syllabus is B.
