Study Materials PL-600 Review | Reliable PL-600 Exam Papers

The Microsoft Power Platform Solution Architect (PL-600) exam questions are being offered in three different formats. The names of these formats are PL-600 desktop practice test software, web-based practice test software, and PDF dumps file. The PL-600 desktop practice test software and web-based practice test software both give you real-time Microsoft PL-600 exam environment for quick and complete exam preparation.

Microsoft Power Platform Solution Architect Sample Questions (Q170-Q175):

NEW QUESTION # 170

You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement | Data type |
|--|---|
| Capture information about the technician assigned to each service appointment. | <input type="text"/> ▼ Choice Choices Customer Lookup |
| Select the tools that the technician must bring to an appointment. | <input type="text"/> ▼ Choices Customer Lookup Text |

Answer:

Explanation:

| Requirement | Data type |
|--|--|
| Capture information about the technician assigned to each service appointment. | <input type="text"/> ▼ <div style="border: 2px solid red; padding: 2px;">Choice</div> Choices Customer Lookup |
| Select the tools that the technician must bring to an appointment. | <input type="text"/> ▼ <div style="border: 2px solid red; padding: 2px;">Choices</div> Customer Lookup Text |

Explanation:

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION # 171

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Technology option

Save captured images in an appropriate location.

| | |
|-----------------------|---|
| | ▼ |
| Business process flow | |
| Desktop flow | |
| Instant cloud flow | |
| Automated cloud flow | |

Analyze saved images by using an image recognition process.

| | |
|-------------------------------------|---|
| | ▼ |
| Instant cloud flow and AI Builder | |
| Automated cloud flow and AI Builder | |
| Desktop flow and AI Builder | |

Display data in real-time dashboards.

| | |
|---|---|
| | ▼ |
| Dynamics 365 interactive experience dashboard | |
| Model-driven app dashboard with native graphs | |
| Model-driven app dashboard with Power BI | |

Answer:

NEW QUESTION # 172

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the

session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

Associate educators with a list of their professional qualifications.

Assign a primary educator to each course that is held.

Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Microsoft Relationship

Educators must be associated with their qualifications.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

When a course is held there must be a primary educator assigned.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

When a course is held, the company needs to collect information on that session.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

Answer:

Explanation:

Requirement

Relationship

Educators must be associated with their qualifications.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

When a course is held there must be a primary educator assigned.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

When a course is held, the company needs to collect information on that session.

| |
|--|
| ▼ |
| Many-to-many relationship that uses a system generated table |
| Many-to-many relationship that uses a custom table |
| One-to-many relationship |

Reference:

Box 1: One-to-many relationship

Each educator can have 0, 1, or many qualifications

Box 2: One-to-many relationship

Each educator can be the primary educator for 0, 1 or many courses.

Box 3: Many-to-many relationship that uses a custom table.

Note: N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION # 173

A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:

- * Show or hide tabs in the main form based on the column value selected.
- * Add a discount code automatically when a new patient row is added.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Show or hide tabs in the main form based on the column value selected.

Add a discount code automatically when a new patient row is added.

Solution

| |
|------------------------------|
| Business process flow |
| Plug-in |
| Client script |
| Business rule |
| Business process flow |

| |
|-----------------------|
| Business rule |
| Client script |
| Business rule |
| Classic workflow |
| Business process flow |

Answer:

Explanation:

NEW QUESTION # 174

You are designing tables and columns for a Microsoft Power Platform solution. The solution will contain an interactive experience dashboard.

You need to ensure that the columns you create can be used as global filters for the dashboard. Which two data types can you use?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Text
- **B. Yes/No**
- C. Multiline Text
- **D. Choice**
- E. Lookup

Answer: B,D

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-solution-explorer#column-data-types>

Explanation:

With interactive dashboards, a chart uses the color assigned to the categories that make up the different values, even if the chart is configured to use random colors, when the chart is configured to be grouped by any of the following column types:

Choice

Yes/No

Status Reason
