

SAP Certified Associate - SAP IBP for Supply Chain cexamkiller Praxis Dumps & C-IBP-2502 Test Training Überprüfungen

Wir PrüfungFrage bieten seit langem die entsprechenden SAP C-IBP-2502 Prüfungsunterlagen. Das ist eine Website, die von vielen Kadidaten übergeprüft. Es kann Ihnen die besten Dumps bieten. Wir PrüfungFrage garantieren Ihre Interesse und sind von allen gut bewertet. Wir PrüfungFrage sind auch Ihre zuverlässige Website auf heutigem Markt.

Ea ist Traum der Angestellten, sich in der IT-Branche engagieren zu können, die SAP C-IBP-2502 Zertifizierungsprüfung zu bestehen. Wenn Sie Ihren Traum verwirklichen wollen, brauchen Sie nur fachliche Ausbildung zu wählen. PrüfungFrage ist eine fachliche Website, die Schulungsunterlagen zur SAP C-IBP-2502 Zertifizierung bietet. Wählen Sie PrüfungFrage. Und wir versprechen, dass Sie den Erfolg erlangen und Ihren Traum verwirklichen, egal welches hohes Ziel Sie anstreben, können.

>> C-IBP-2502 Deutsche Prüfungsfragen <<

C-IBP-2502 Neuesten und qualitativ hochwertige Prüfungsmaterialien bietet - quizfragen und antworten

PrüfungFrage steht Ihnen ein umfassendes und zuverlässiges Konzept zur SAP C-IBP-2502 Zertifizierungsprüfung zur Verfügung. Unser Konzept bietet Ihnen eine 100%-Pass-Garantie. Außerdem bieten wir Ihnen einen einjährigen kostenlosen Update-Service. Sie können im Internet kostenlos die Software und Prüfungsfragen und Antworten zur SAP C-IBP-2502 Zertifizierungsprüfung als Probe herunterladen.

SAP Certified Associate - SAP IBP for Supply Chain C-IBP-2502 Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

You are developing the functionality and appearance of the Excel UI for SAP IBP business users. Which extensibility capabilities for SAP IBP, add-in for Microsoft Excel are provided by Custom VBA coding?

Note: There are 2 correct answers to this question.

- A. Changing the layout of the master data workbooks
- B. Changing the entries from the Name Manager
- C. SAP IBP ribbon extension
- D. Changing the member names

Antwort: A,C

Begründung:

Custom VBA (Visual Basic for Applications) coding extends the SAP IBP Excel add-in's functionality and UI, per SAP IBP's extensibility documentation.

* Option A: Changing the member names This is incorrect. Member names (e.g., Product IDs) are master data, not modifiable via VBA in the Excel UI; VBA customizes behavior, not data content.

* Option B: SAP IBP ribbon extension This is correct. VBA can extend the SAP IBP ribbon (toolbar) with custom buttons or commands, enhancing user interaction, a supported extensibility feature, per SAP IBP's guides.

* Option C: Changing the entries from the Name Manager This is incorrect. Name Manager entries (Excel-defined names) are managed by Excel, not directly extensible via SAP IBP VBA for IBP-specific functionality.

* Option D: Changing the layout of the master data workbooks This is correct. VBA can modify the layout (e.g., rearrange columns, add sheets) of master data workbooks in the Excel UI, a common customization, per SAP IBP's documentation.

Thus, B and D are VBA extensibility capabilities, per SAP IBP's official Excel add-in features.

61. Frage

What option is available for the key figure that is enabled for fixing?

- A. You can change a fixed key figure only with administrative rights
- B. Fixing is possible for a part of a key figure value on a certain planning level
- C. Fixing is possible for a certain period, including all child values in the hierarchy
- D. Fixing is possible for key figures with negative values

Antwort: C

Begründung:

Key figure fixing in SAP IBP allows planners to lock values (e.g., in Excel) to prevent changes during planning runs, a feature in time-series planning.

* Option A: Fixing is possible for key figures with negative values This is incorrect. Fixing applies to any value (positive, negative, zero), but this isn't a specific option or limitation in SAP IBP's fixing functionality.

* Option B: Fixing is possible for a part of a key figure value on a certain planning level This is incorrect. Fixing locks the entire value at a planning level, not a portion of it. Partial adjustments require separate key figures or manual edits before fixing.

* Option C: You can change a fixed key figure only with administrative rights This is incorrect. Fixed key figures can be unfixed or edited by users with appropriate planning permissions, not just administrators, via the Excel UI.

* Option D: Fixing is possible for a certain period, including all child values in the hierarchy This is correct. In SAP IBP, fixing a key figure (e.g., Demand Plan Qty) for a period locks that value and propagates the fix to all child levels in the hierarchy (e.g., disaggregated Product-Customer combinations), ensuring consistency, as per SAP IBP's fixing documentation.

Thus, D is the correct option for key figure fixing, reflecting SAP IBP's hierarchical locking mechanism.

62. Frage

The Planner Workspaces is an important User Interface of SAP IBP for Supply Chain. What are the value drivers to use this as a planner? Note: There are 3 correct answers to this question.

- A. It combines the data from multiple planning areas into one user interface
- B. It can trigger SAP S/4HANA transactions in real time
- C. Issues can be identified and solved with special functions
- D. Application jobs can be started from this user interface
- E. It combines various components into one user interface

Antwort: C,D,E

Begründung:

Planner Workspaces in SAP IBP is a Fiori-based UI that integrates planning tools, analytics, and workflows, enhancing planner productivity. Its value drivers are outlined in SAP IBP's UI documentation.

- * Option A: Issues can be identified and solved with special functions This is correct. Alerts and playbooks in Planner Workspaces help identify and resolve issues (e.g., supply shortages), a key value driver, per SAP IBP's features.
 - * Option B: It combines various components into one user interface This is correct. It integrates planning views, charts, and alerts into a single UI, streamlining workflows, a core benefit, per SAP IBP's documentation.
 - * Option C: It can trigger SAP S/4HANA transactions in real time This is incorrect. Planner Workspaces focuses on IBP planning, not real-time S/4HANA transaction execution, which requires integration tools like CI-DS.
 - * Option D: It combines the data from multiple planning areas into one user interface This is incorrect. It operates within one planning area; combining multiple areas requires separate configurations or views, not a native feature.
 - * Option E: Application jobs can be started from this user interface This is correct. Planners can trigger jobs (e.g., Copy Operator) directly from Planner Workspaces, enhancing efficiency, per SAP IBP's UI capabilities.
- Thus, A, B, and E are value drivers, per SAP IBP's official Planner Workspaces description.

63. Frage

What are some of the capabilities of the Planner Workspaces app? Note: There are 2 correct answers to this question.

- A. It supports favorites created in SAP IBP, add-in for Microsoft Excel
- B. It supports embedding analytic stories as a workspace component
- C. It supports sharing with other users or user groups
- D. It supports simulating the effect of the changes

Antwort: A,B

Begründung:

The Planner Workspaces app in SAP IBP is a Fiori-based UI that integrates planning tools, analytics, and collaboration features for supply chain planners.

* Option A: It supports simulating the effect of the changes This is incorrect. While simulation is a feature in SAP IBP (e.g., via versions or scenarios in Excel), Planner Workspaces focuses on visualization and navigation, not direct simulation execution. Simulation occurs in other apps like Excel or Manage Scenarios.

* Option B: It supports favorites created in SAP IBP, add-in for Microsoft Excel This is correct.

Planner Workspaces integrates with the Excel add-in, allowing users to access their Excel favorites (e.g., planning views) directly within the workspace. This enhances usability by linking preferred tools, as per SAP IBP's documentation on Planner Workspaces.

* Option C: It supports embedding analytic stories as a workspace component This is correct.

Analytic stories (created in the Manage Analytics Stories app) can be embedded in Planner Workspaces, providing charts and insights alongside planning data. This is a key visualization feature, per SAP IBP's UI capabilities.

* Option D: It supports sharing with other users or user groups This is incorrect. Sharing is available in Excel (e.g., templates) or analytics apps, but Planner Workspaces doesn't have a native sharing function for workspaces themselves. Collaboration occurs via other mechanisms.

Thus, B and C are accurate capabilities of Planner Workspaces, aligning with SAP IBP's official feature set.

64. Frage

You are implementing a demand process in SAP IBP for sales and operations, and consider using the standard forecast key figures available in the sample planning area SAPIBP1. What are the first and last key figures in the logical progression of demand in the S&OP process?

- A. Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last
- B. Statistical Forecast Qty first and Consensus Demand Plan Qty last
- C. Local Demand Plan first and Consensus Demand Plan Qty last
- D. Local Demand Plan first and Combined Final Demand last

Antwort: B

Begründung:

In SAP IBP for Sales and Operations Planning (S&OP), the demand planning process follows a logical progression of key figures, as exemplified in the sample planning area SAPIBP1. This progression starts with raw forecast data and ends with an agreed-upon demand plan.

* Option A: Local Demand Plan first and Combined Final Demand last "Local Demand Plan" is not a standard key figure in SAPIBP1; it's a vague term. "Combined Final Demand" is also not a recognized key figure. This option misaligns with the S&OP process flow.

* Option B: Statistical Forecast Qty first and Consensus Demand Plan Qty last This is correct. In SAPIBP1, the demand process begins with Statistical Forecast Qty (e.g., generated via statistical models like moving average or exponential smoothing), representing the initial unconstrained forecast.

The process progresses through adjustments (e.g., manual overrides, market inputs) and collaboration, culminating in Consensus Demand Plan Qty, the final agreed-upon demand plan after S&OP meetings.

This reflects SAP IBP's S&OP workflow: forecast generation # review # consensus.

* Option C: Local Demand Plan first and Consensus Demand Plan Qty last As noted, "Local Demand Plan" is not a standard key figure in SAPIBP1 or S&OP terminology, making this incorrect despite the valid end point.

* Option D: Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last While

"Statistical Forecast Qty" is a valid starting point, "Global Demand Plan Qty for S&OP" is not a standard key figure in SAPIBP1. The correct term is "Consensus Demand Plan Qty," which is more specific to the S&OP output.

Thus, B aligns with SAP IBP's S&OP demand planning progression per SAPIBP1's standard key figures and official S&OP process documentation.

65. Frage

.....

Um jeden Kunden geeignete Vorbereitungsmethode für SAP C-IBP-2502 finden zu lassen, bieten wir insgesamt 3 Versionen von SAP C-IBP-2502 Prüfungsunterlagen, nämlich PDF, Online Test Engine, sowie Simulations-Software. Mindestens wird wohl eine davon Ihnen am besten bei der Vorbereitung unterstützen. Kostenlose Demos aller drei Versionen sind angeboten. Jede Version enthält die neuesten und umfassendsten Prüfungsunterlagen der SAP C-IBP-2502.
