AP-211시험준비, AP-211최신버전 시험공부

PassTIP는 자격증 응시자에게Salesforce AP-211 시험 준비를 위한 현재 그리고 가장 최근의 자료들을 제공하는 이 산업 영역의 리더입니다. PassTIP는Salesforce AP-211덤프를 시험문제변경에 따라 계속 갱신하여 고객님의게서 받은 것이Salesforce AP-211 시험의 가장 최신 기출문제임을 보증해드립니다.

Salesforce AP-211 시험요강:

주제	소개
주제 1	Discovery: This domain covers identifying customer personas and stakeholders, defining required capabilities from use cases, and gathering functional and technical requirements to achieve desired business outcomes.
주제 2	Deploy: This domain addresses pre-deployment and post-deployment steps for specific use cases and Health Cloud capabilities, along with managing technical aspects through Mobile app capabilities.
주제 3	Design: This domain encompasses creating Health Cloud solution designs using best practices, modeling healthcare entities with appropriate objects, determining specific capabilities to use, defining success metrics and reporting, implementing security and compliance, developing integration strategies, and creating data migration plans.

- Implement: This domain focuses on installing Health Cloud, configuring applications and OmniStudio components, customizing features, implementing integrations and APIs, configuring security rules, and establishing reporting.

최신 Salesforce Health Cloud AP-211 무료 샘플문제 (Q71-Q76):

질문 # 71

Bloomington Caregivers has created and tested its first care plan template in sandbox, which includes problems, goals, and tasks. The company has deployed this template to its final environment using Data Loader. Which two steps should a consultant recommend, following this deployment, to enable users to successfully leverage this new template?

Choose 2 answers

- A. Confirm User access to Care Plan objects.
- B. Conduct end-user training on the use of the care plan template.
- C. Activate the problems, goals, and tasks associated with the template.
- D. Activate the new care plan template.

정답: A,D

설명:

Step 1: Requirement Analysis

After deploying a care plan template (including problems, goals, and tasks) via Data Loader to the final environment, users must be able to use the new template for creating care plans in production.

Step 2: Salesforce Health Cloud Documentation Guidance

According to the official Health Cloud administration guide, two key post-deployment steps are required:

1. Confirm User Access to Care Plan Objects

Users must have the correct permissions to view, create, and use care plan templates and related records. This involves assigning the appropriate permission sets or profiles to allow access to the Care Plan, Care Plan Template, and related objects.

Extract:

"Ensure users have the necessary permissions to access care plan templates and related objects so they can view and apply templates to patients' care plans." Administer Health Cloud - Care Plans and Permissions

2. Activate the New Care Plan Template

Templates (and their related records) must be activated after being deployed to make them available for use by end users. Care plan templates in Salesforce Health Cloud have an "Active" status that must be set to "True" or "Activated" before users can select them when creating new care plans.

Extract:

"After importing care plan templates and related data, administrators must activate the template to make it available to care coordinators and clinicians." Administer Health Cloud - Deploying and Activating Care Plan Templates Other Options:

B. Activate the problems, goals, and tasks associated with the template:

Not required as a separate step. When you activate the care plan template, its associated problems, goals, and tasks become available.

D. Conduct end-user training:

While important, it is not a required technical step for enabling the template after deployment.

Verified Answers:

A. Confirm User access to Care Plan objects.

C. Activate the new care plan template.

질문 # 72

A payer is implementing Health Cloud and wants to leverage predefined rules for its prior authorization request review process. The payer would like to leverage out-of-the-box Health Cloud functionality to drive speed to value.

Which prebuilt feature should a consultant recommend the payer leverage?

- A. Expression Set Templates
- B. OmniScript Templates

- C. Integration Procedures
- D. FlexCards

정답: A

설명:

Step 1: Requirement Analysis

The payer wants to use predefined rules for prior authorization request reviews, seeking out-of-the-box Health Cloud functionality for speed to value.

Step 2: Health Cloud Prior Authorization & Rules Engine

The Expression Set Templates in Health Cloud provide a prebuilt, configurable framework to automate and standardize prior authorization request reviews. These templates contain reusable logic and criteria that can be easily tailored and applied to common authorization scenarios.

Extract:

"Use Health Cloud's prebuilt Expression Set Templates to accelerate prior authorization configuration. These templates enable payers to implement standardized review criteria and automate decision logic without building rules from scratch." Administer Health Cloud - Utilization Management and Expression Sets Integration Procedures, FlexCards, and OmniScript Templates are OmniStudio tools for integration, UI, and guided processes, but Expression Set Templates are the feature specifically designed for rules automation in Utilization Management.

질문 # 73

A payer needs to triage provider and care team inquiries around member plan benefits and member care. The agents also need to be informed about changes in records that require attention.

Which three permission set licenses should a consultant assign to the security model for these users?

- A. CRM Content User permission set license
- **B. Health Cloud Platform permission set license**
- C. Service Cloud User permission set license
- **D. OmniStudio User permission set license**
- **E. Contact Center for Health Cloud permission set license**

정답: B,D,E

질문 # 74

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- **A. Health Cloud Platform permission set license**
- B. Health Cloud Standard permission set license
- **C. Health Cloud permission set license**
- D. Health Cloud Foundation permission set license

정답: A,C

질문 # 75

A customer wants to view medication data from Health Cloud leveraging FHIR standards.

Which Health Cloud data model should a consultant use?

- **A. Clinical data model**
- B. Virtual Care data model
- C. Integrated Care Management data model
- D. Electronic health record (EHR) data model

정답: A
