At QuestionsTube, you can read HPE7-A01 free demo questions in pdf file, so you can check the questions and answers before deciding to download the HP HPE7-A01 practice questions. These free demo questions are parts of the HPE7-A01 exam questions. Download and read them carefully, you will find that the HPE7-A01 test questions of QuestionsTube will be your great learning materials online. Share some HPE7-A01 exam online questions below.

1.What is true regarding 802.11k?

We try to offer the best HPE7-A11 exam braindumps to our customers. First of all, in order to give users a better experience, we have been updating the system of HPE7-A11 simulating exam to meet the needs of more users. After the new version appears, we will also notify the user at the first time. Second, in terms of content, we guarantee that the content provided by our HPE7-A11 Study Materials is the most comprehensive.

About some esoteric points, they illustrate with examples for you. Our HPE7-A11 practice materials are the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our HPE7-A11 practice materials. The best way to gain success is not cramming, but to master the discipline and regular exam points of question behind the tens of millions of questions. Our HPE7-A11 practice materials can remove all your doubts about the exam. If you believe in our products this time, you will enjoy the happiness of success all your life.

HPE7-A11 Updated Testkings - Reliable HPE7-A11 Test Notes

Many candidates find the HP HPE7-A11 exam preparation difficult. They often buy expensive study courses to start their HP HPE7-A11 certification exam preparation. However, spending a huge amount on such resources is difficult for many HPE Network

Campus Access Professional Architect Exam exam applicants. The latest HP HPE7-A11 Exam Dumps are the right option for you to prepare for the HP HPE7-A11 certification test at home.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location. The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store. Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half. The office has an MDF and two IDF's located on floors one and two.

The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue. The customer has budget concerns but does want something that could last 7+ years. What should the architect be concerned about regarding the solution? (Select two.)

- A. multiple locations
- B. IP addresses
- C. Active Directory
- D. Regulatory Domains

Answer: A,D

Explanation:

In designing a network solution for ACME Retail, which operates across various regions in the US and Canada, the architect must consider Regulatory Domains and the challenges posed by multiple locations. Regulatory Domains are crucial because wireless standards and allowed frequencies vary by country, affecting how WLAN equipment is configured and deployed.

Compliance with local regulations is essential to avoid legal issues and ensure optimal network performance. The challenge of multiple locations involves ensuring consistent, high-quality network service across all sites, despite geographical distances and site-specific characteristics.

This requires a scalable, flexible network architecture that can be centrally managed while accommodating the unique needs of each location.

NEW QUESTION # 27

Why is it important to assess the current security posture during the discovery phase?

- A. To evaluate the aesthetic design of the network layout
- B. To determine the physical location of network devices
- C. To decide on the color scheme of network cables
- D. To identify vulnerabilities that need to be addressed in the new design

Answer: D

NEW QUESTION # 28

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client decided that they would like to manage two wiring closets as a single stack with a total of 10 switches and a minimum transport speed of 25Gbps over OM4 MM fiber. They would also like to keep the stacking cabling cost to a minimum.

Which switch series would most economically accomplish these requirements?

- A. 6100 Switch Series
- B. 6400 Switch Series
- **C. 6300F Switch Series**
- D. 6200F Switch Series

Answer: C

Explanation:

The Aruba 6300F Switch Series is designed to meet the needs of modern, full-stack wired and wireless networks with a focus on cost-effectiveness, performance, and scalability. This series supports high-speed connectivity options, including 25Gbps over OM4 MM fiber, making it suitable for the client's requirement to manage two wiring closets as a single stack with a total of 10 switches. The 6300F series also offers the flexibility of modular uplinks and stacking capabilities, ensuring that the client's needs for minimum transport speed and economic efficiency are met. Additionally, the Aruba 6300F series is known for its energy efficiency and lower operational costs, further contributing to its economic value.

NEW QUESTION # 29

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge. The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use. The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client would like to ensure redundant RADIUS resources in each of their three geographical regions (AMER, EMEA, and APAC). A large office location is available in each region with sufficient VMware resources available.

- Each region has between 4,435 and 5,859 clients, all of which will need to do either 802.1X wired or wireless authentications as well as 802.1X authentication for a single personal device on Wi-Fi.
- All of the non-personal devices will also need to validate health with a local agent.
- A total of 500 guests are expected to be connected on average with a maximum of 700 simultaneous connections making use of Guest Portal for access to the internet.
- TACACS authentication will also be configured for a total of 1200 evenly dispersed NADs.

How many OnGuard Licenses are required in this scenario?

- **A. 20,000**
- B. 30,000
- C. 15,000
- D. 10,000

Answer: A

NEW QUESTION # 30

Your organization is planning to implement HPE Aruba Networking User Experience Insight (UXI) sensors to enhance network visibility and proactive troubleshooting across your enterprise environment. The goal is to continuously monitor user experience, application performance, and network health across wired, wireless, and WAN segments.

Which capabilities accurately describe the features and requirements of HPE Aruba Networking UXI sensors? (Choose two.)

- **A. The UXI Linux agent matches the features of physical sensors but with reduced performance and will require a separate subscription.**
- **B. UXI sensors deliver 24/7 cloud-based monitoring and testing of network performance across wired, wireless, and WAN environments.**
- C. UXI directly integrates with HPE ANW SSE to continuously monitor and report Data Protection Policy violations across the network.
- D. UXI sensors depend entirely on passive traffic monitoring and do not generate any active synthetic test traffic for network assessment.

Answer: A,B

Explanation:

UXI sensors provide continuous cloud-based monitoring using active testing to validate user experience across wired, wireless, and WAN environments.

The UXI Linux agent offers similar functionality to hardware sensors but with some performance limitations and requires its own subscription for operation.

NEW QUESTION # 31

.....

We all have same experiences that some excellent people around us further their study and never stop their pace even though they have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the HPE7-A11 exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our HPE7-A11 practice materials. They do not let go even the tenuous points about the HPE7-A11 exam as long as they are helpful and related to the exam. And let go those opaque technicalities which are useless and hard to understand, which means whether you are newbie or experienced exam candidate of this area, you can use our HPE7-A11 real questions with ease.

HPE7-A11 Updated Testkings: <https://www.lead1pass.com/HP/HPE7-A11-practice-exam-dumps.html>

So if you are interested with our HPE7-A11 free demo then go for the HPE7-A11 complete questions & answers, Moreover, HPE7-A11 exam braindumps of us contain most of knowledge points for the exam, and they will help you pass the exam successfully, The ability of HPE7-A11 Updated Testkings - HPE Network Campus Access Professional Architect Exam latest valid dumps will kill all negative words and gives doubters a heavy punch, Our PDF version, online test engine and windows software of the HPE7-A11 Updated Testkings - HPE Network Campus Access Professional Architect Exam study materials have no restrictions to your usage.

With CyberSource Internet Fraud Screen enhanced by Visa, we do not have to divert HPE7-A11 Download Free Dumps valuable personnel to manually chase down fraudulent transactions, Machines cannot read and respond to rules that are expressed in human language.

HPE7-A11 Study Guide: HPE Network Campus Access Professional Architect Exam & HPE7-A11 Learning Materials

So if you are interested with our HPE7-A11 free demo then go for the HPE7-A11 complete questions & answers, Moreover, HPE7-A11 exam braindumps of us contain most of HPE7-A11 knowledge points for the exam, and they will help you pass the exam successfully.

The ability of HPE Network Campus Access Professional Architect Exam latest valid dumps will kill all negative words and gives Reliable HPE7-A11 Practice Questions doubters a heavy punch, Our PDF version, online test engine and windows software of the HPE Network Campus Access Professional Architect Exam study materials have no restrictions to your usage.

We take our candidates' future into consideration and pay attention to the development of our HPE7-A11 real test reviews constantly.
