Moreover, our customer service team will reply the clients' questions on the L5M10 Exam Questions patiently and in detail at any time and the clients can contact the online customer service. The clients at home and abroad can purchase our L5M10 certification questions online.

CIPS L5M10 Exam Syllabus Topics:

Topic	Details
Topic 1	• Analyse the Role and Activities of Logistics Management: This section of the exam measures the skills of Logistics Managers and covers the essential concepts, functions, and strategic importance of logistics within modern supply chains. It explains what logistics is, how its key elements work together—such as transportation, warehousing, inventory, packaging, information flow, and security—and how these components support procurement, production, distribution, after-sales processes, and product disposal. The section explores how logistics integrates with broader supply chain management and introduces the idea of total logistics and total cost thinking, showing how multimodal transport and pipeline inventory contribute to efficiency. Candidates must understand how logistics creates competitive advantage by aligning operations with business strategy, managing customer service levels, measuring service quality, and recognizing its financial impact. This heading also evaluates the increasing role of technology in logistics, including barcoding, RFID, e-fulfilment systems, warehouse management systems, automated data capture, and the integration of digital tools across the logistics network.
Topic 2	• Understand Capacity Planning and Control in Logistics Management: This section of the exam measures the skills of Operations Planners and focuses on the techniques and systems used to manage capacity, demand, and resource planning across logistics activities. It explains how organizations balance planning with real-time control, adjust to fluctuating demand, and schedule workloads effectively. Candidates are expected to understand capacity concepts, constraints, demand forecasting, capacity measurement, and different planning approaches such as level planning, chase demand strategies, and demand management methods. The section also examines the use of technology in capacity planning, particularly Materials Requirements Planning (MRP), MRP II, ERP systems, master production scheduling, inventory data, and bills of materials, while recognizing the limitations of these tools. Finally, it covers the role of reverse logistics, emphasizing the handling of customer returns, the development of return policies, and how returned items are reintegrated into the supply chain.

CIPS Logistics Management Sample Questions (Q81-Q86):

NEW QUESTION # 81

Paul is a Warehouse Manager of plumbing supplies. He is planning to change the layout by placing fast- moving items near the front, slower further back, and rarely used items in separate storage. What type of system is Paul using?

- A. ABC analysis
- B. HML analysis
- **C. FSN analysis**
- D. VED analysis

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

FSN groups items by movement speed: Fast-moving, Slow-moving, Non-moving. It's used to position stock for efficient access and handling based on usage frequency. (CIPS L5M10 Study Guide, p. 147)

NEW QUESTION # 82

A detailed list of a ship's cargo, issued as a receipt by the master of the ship to the person consigning the goods, is known as which document?

- A. EUR1 Form
- B. Customs Declaration
- C. Bill of Lading
- D. Certificate of Origin

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A Bill of Lading (B/L) serves as both a receipt for shipped goods and a document of title. It confirms carriage terms between shipper and carrier and is critical in international freight documentation. (Reference: CIPS L5M10 Study Guide, "Key transport documents," p. 44)

NEW QUESTION # 83

Which of the following is a commonly used indicator for measuring capacity and manufacturing productivity and is usually expressed as the percentage of time a machine is truly productive?

- A. Effective Operational Measure
- B. Machine downtime
- C. Overall Equipment Effectiveness
- D. Actual output

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Overall Equipment Effectiveness (OEE) combines availability, performance, and quality to indicate how much of scheduled time a resource is genuinely productive. Downtime is a component that reduces OEE;

"actual output" is an absolute measure, not an effectiveness percentage. (Reference: CIPS L5M10 Study Guide, OEE definition, p. 109)

NEW QUESTION # 84

Select from the following list the example of reverse logistics.

- A. A distribution centre sends goods to several retail units using the same delivery truck
- B. The manufacturer sends completed goods to the customer
- C. A supplier provides an additional delivery of items to the buyer
- D. A retail outlet returns faulty goods to the manufacturer

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Reverse logistics involves goods moving upstream in the supply chain—typically from customers back to the manufacturer or supplier—for return, repair, reuse, or recycling. Returning faulty goods to a manufacturer is a textbook example.

(Reference: CIPS L5M10 Study Guide, Reverse logistics definition and examples, p. 189)

NEW QUESTION # 85

Miranda is updating the Business Strategy for her company. It is important she aligns the Business Strategy with which of the following?

- A. Corporate strategy

- B. Service strategy
- C. Cost strategy
- D. Functional strategy

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Corporate Strategy sets the organisation's overarching mission and goals. Business Strategy derives from it, outlining how those goals will be achieved. Functional strategies (like procurement or logistics) then support the Business Strategy. Therefore, Business Strategy alignment must be upward with Corporate Strategy.

(Reference: CIPS L5M10 Study Guide, Strategic alignment hierarchy, p. 52)

NEW QUESTION # 86
