Successfully Get the Quality Infoblox NIOS-DDI-Expert Exam Questions

Exam4Tests wants to win the trust of Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) exam candidates at any cost. To achieve this objective Exam4Tests is offering real, updated, and error-free Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) exam dumps in three different formats. These Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) exam questions formats are Exam4Tests Infoblox NIOS-DDI-Expert dumps PDF files, desktop practice test software, and web-based practice test software.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q42-Q47):

NEW QUESTION # 42

What sends the email messages for Workflow Approval notifications in NIOS?

- A. NIOS SuperAdmin
- **B. NIOS Grid Master (GM)**
- C. NIOS Grid Master (GM) and the NIOS Grid Master Candidate (GMC)
- D. NIOS Grid Master Candidate (GMC)

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Workflow Approval notifications:

* A: The Grid Master (GM) sends emails via its configured SMTP settings (Grid > Grid Properties > Email), as it manages Grid-wide tasks. Correct.

* B: GMC is a standby, not active unless promoted-doesn't send emails. Incorrect.

* C: Only GM sends, not both-GMC is passive. Incorrect.

* D: SuperAdmin is a role, not a process-no sending capability. Incorrect.

* Practical Example: In an INE lab, configure SMTP on the GM, test approval emails, and troubleshoot delivery from GM logs. References: Infoblox NIOS Administrator Guide - Workflow Notifications; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 43

What types of permissions can be assigned to a Group or Role in NIOS? (Select all that apply.)

- A. Member permissions
- **B. Grid permissions**
- **C. Global permissions**
- **D. Object permissions**

Answer: B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation: NIOS uses a granular permission model for admin groups/roles (Administration > Administrators). Here's what applies:

* A (Global Permissions): Broad privileges across all objects (e.g., "All DNS Zones" read/write).

Applies to groups/roles for universal access. Correct.

* B (Object Permissions): Specific to individual objects (e.g., read-only on "zone1.example.com").

Assignable to groups/roles for fine control. Correct.

* C (Grid Permissions): Control Grid-wide settings (e.g., backup, upgrade permissions). Assignable to groups/roles, distinct from member-specific rights. Correct.

* D (Member Permissions): Permissions are tied to Grid members (e.g., restart services on "Member1"), but NIOS documentation classifies these under object or Grid permissions, not a separate "Member" category. Incorrect in this context.

* Setup: In Grid Manager, you assign these via group/role properties, selecting scopes (global, object-specific, Grid-level).

* Practical Example: In an INE lab, you'd assign a group global DNS write access and Grid backup rights, testing restricted troubleshooting scenarios. References: Infoblox NIOS Administrator Guide - Permissions; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 44

When defining a custom DHCP option, how does the administrator select the option name?

- A. The name must match the vendor definition, but it is not case-sensitive
- B. The name must exactly match what the vendor has defined
- **C. The administrator may define any name**
- D. The name must contain the vendor name

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation: Custom DHCP options in NIOS allow tailoring DHCP responses for specific

devices or applications:

- * Configuration: In Grid Manager (Data Management > DHCP > Option Spaces > Add), admins define custom options with:
 - * Option Number: Must match the DHCP standard or vendor spec (1-254).
 - * Name: A user-defined label for clarity (e.g., "TFTP-Server").
 - * Data Type: (e.g., string, IP).
 - * Naming Freedom: The "name" is an internal NIOS identifier, not tied to DHCP packets or vendor standards-it's for admin convenience. The option number and value align with vendor needs (e.g., Option 66 for TFTP), but the name can be arbitrary (e.g., "MyTFTP" vs. "VendorTFTP").
 - * Options:
 - * A/B: Vendor definitions apply to option numbers/values, not names. Case sensitivity is irrelevant.
- Incorrect.
- * C: No requirement to include the vendor name-it's optional. Incorrect.
 - * D: Admins can choose any descriptive name, making management intuitive. Correct.
 - * Practical Example: In an INE lab, you'd define a custom option "VoIPConfig" (Option 66, string), assign it to a range, and troubleshoot client reception, testing DHCP flexibility. References: Infoblox NIOS Administrator Guide - Custom DHCP Options; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 45

When defining a custom DHCP option, what does the administrator need to specify? (Select all that apply.)

- A. Data Type
- B. Option Name
- C. Data Value
- D. Option Number

Answer: A,B,D

Explanation:

Comprehensive and Detailed In-Depth Explanation: Custom DHCP options (Data Management > DHCP > Option Spaces):

- * A (Option Name): Mandatory label (e.g., "CustomOpt"). Correct.
- * B (Option Number): Mandatory code (1-254, e.g., 150). Correct.
- * C (Data Type): Mandatory format (e.g., string, integer). Correct.
- * D (Data Value): Set when applying the option to a scope/range, not during definition. Optional here.

Incorrect.

* Practical Example: In an INE lab, define "VoiceVLAN" (Number: 150, Type: integer), apply value "10" later, and troubleshoot client config. References: Infoblox NIOS Administrator Guide - DHCP Options; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 46

You need to reset the database on a Grid member and disconnect it from the Grid, but you would like it to preserve its current network settings. What command can you use to do this?

- A. reset member
- B. reset database
- C. reset all
- D. It is possible to reset without losing network settings

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Resetting a Grid member's database while retaining network settings requires a targeted CLI command:

- * Requirements: Clear DNS/DHCP/Grid data, disconnect from the Grid, keep IP/hostname for reconnection or standalone use.
- * Commands:
- * reset database: Wipes the NIOS database (zones, leases, Grid membership), leaving network settings (IP, gateway, etc.) intact. The member becomes standalone, requiring rejoining if needed.
- * set factory: Full reset to factory defaults, erasing everything (database, network, licenses).
- * Options:
- * A (reset all): Not a valid command (see Q28). Incorrect.

* B (reset database):Meets all criteria-clears database, disconnects, preserves network. Correct.

* C (reset member):Not a specific CLI command; vague term. Incorrect.

* D: Misinterprets the question as a statement-it's possible with B, but this isn't a command.

Incorrect.

* Practical Example:In an INE lab, you'd run reset database on a test member, verify its IP persists via show network, and troubleshoot rejoining the Grid.References:Infoblox NIOS CLI Reference Guide - Reset Commands; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 47

.....

All these three Infoblox NIOS-DDI-Expert exam dumps formats contain the real and Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) certification exam trainers. So rest assured that you will get top-notch and easy-to-use Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) practice questions. The NIOS-DDI-Expert PDF dumps file is the PDF version of real Infoblox NIOS-DDI-Expert exam questions that work with all devices and operating systems.
