## Microsoft Power Platform Developer Sample Questions (Q39-Q44):

**NEW QUESTION # 39**
You need to implement visual hints in the custom connector.
What should you do? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Extend the Open API definition of the Web API for the EnvironmentName parameter.

- B. In the custom connector, update the name of the policy template.
- C. In the custom connector, update the description for the DataId parameter.
- D. Extend the Open API definition of the Web API for the DataId parameter

**Answer: C,D**

**NEW QUESTION # 40**
You work for a staffing company that helps employees fill temporary jobs. Available temporary jobs are categorized and listed on a secure area of the company's website.
The company wants to eliminate manual work that relates to job and candidate management. The company plans to invite employers with available jobs and job candidates to view jobs by sending personalized invitations. The company identifies the following requirements:
Human resources team members from the staffing company must be able to access the jobs listing and post available positions.
Employers seeking temporary employees must also be able to access the jobs listing and post available positions.
Approved job candidates must be notified about new positions for which they are qualified.
Approved job candidate must have an option to accept a job assignment directly from a notification.
You need to perform a gap analysis against the features and capabilities of the Power Platform.
Which features should you implement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

## Requirement

**NEW QUESTION # 41**

A travel company has a Common Data Service (CDS) environment.

The company requires the following:

Custom entities that track which regions clients have traveled.

The dates their clients traveled to these regions.

You need to create the entities and relationships to meet the requirements.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a N:N relationship from Contact to the Region entity.
- B. Create an intersect entity named ContactRegion and create 1:N relationships to Contact and Region.
- C. Create the Region entity.
- D. Create a 1:N relationship from the ContactRegion intersect entity and Region.
- E. On the main form for ContactRegion, add lookup fields for Contact and Region, and a date field for the visit date.
- F. Create an intersect entity named ContactRegion and create N:1 relationships to Contact and Region.

- G. Create a 1:N relationship from Contact to the Region entity.
- H. On the main form for ContactRegion, add a sub-grid to view country information.

**Answer: B,C,E**

Explanation:
Need a Region entity, a intersect entity ContactRegion between Contact and Region, and a way to input region visits.

**NEW QUESTION # 42**
A company updates their client contact information periodically. The contact entity has alternate keys defined.
You have the following code. (Line numbers are included for reference only.)

```
1. Entity contact = new Entity()
2. {
3.    LogicalName = "contact",
4.    KeyAttributes =
5.    {
6.       {"lastname", "Smith"},
7.       {"clientnumber", "abc123"}
8.    }
9. },
10 contact["lastname"] = "Doe";
11. UpsertRequest updcontact = new UpsertRequest ();
12. {
13.    Target = contact;
14.    }
15. UpsertResponse response = ( UpsertResponse )service.Execute(updcontact);
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

| Statement | Yes | No |
|---|---|---|
| If the last name is an alternate key and there are no contacts with the last name Smith, the stored value of the last name is Smith. | O | O |
| If the client number is an alternate key and the client number exists, the stored value of the last name is Smith. | O | O |
| If the last name is an alternate key and there are people who have the last name Smith, the stored value of the last name is Smith. | O | O |
| If the client number is an alternate key and the client number does not exist, the stored value of the last name is Smith. | O | O |

**Answer:**

Explanation:

| Statement | Yes | No |
|---|---|---|
| If the last name is an alternate key and there are no contacts with the last name Smith, the stored value of the last name is Smith. | ○ | [○] |
| If the client number is an alternate key and the client number exists, the stored value of the last name is Smith. | [○] | ○ |
| If the last name is an alternate key and there are people who have the last name Smith, the stored value of the last name is Smith. | ○ | [○] |
| If the client number is an alternate key and the client number does not exist, the stored value of the last name is Smith. | ○ | [○] |

Explanation

| Statement | Yes | No |
|---|---|---|
| If the last name is an alternate key and there are no contacts with the last name Smith, the stored value of the last name is Smith. | ○ | ● |
| If the client number is an alternate key and the client number exists, the stored value of the last name is Smith. | ● | ○ |
| If the last name is an alternate key and there are people who have the last name Smith, the stored value of the last name is Smith. | ○ | ● |
| If the client number is an alternate key and the client number does not exist, the stored value of the last name is Smith. | ○ | ● |

**NEW QUESTION # 43**

You are creating a business process flow for an organization's Request for Quote process.

You need to ensure that the business process flow meets the company's requirements.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes to scroll to view content. Select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Components**

| Components |
|---|
| Step |
| Stage |
| Custom control |
| Branching condition |

| Requirement | Component |
|---|---|
| The process starts with the receipt of the request for quote. | |
| Ensure that credit checks are performed for new users only. | |
| Merge all process paths into the main flow. | |

**Answer:**

Explanation:
