MTCNA Certification Practice: 2026 Realistic MikroTik Dumps MikroTik Certified Network Associate Exam Torrent Pass Guaranteed

Now our MTCNA actual test guide can make you the whole relax down, with all the troubles left behind. Our MTCNA exam questions are compiled to meet all of your requirements. The comprehensive coverage would be beneficial for you to pass the exam. Only need to spend about 20-30 hours practicing our MTCNA study files can you be fully prepared for the exam. With deeply understand of core knowledge MTCNA actual test guide, you can overcome all the difficulties in the way. So our MTCNA exam questions would be an advisable choice for you.

MikroTik Certified Network Associate Exam Sample Questions (Q103-Q108):

NEW QUESTION # 103

If you use either Telnet or FTP, which is the highest layer you are using to transmit data?

- A. Application
- B. Presentation
- C. Transport
- D. Session

Answer: A

Explanation:

Protocols like Telnet and FTP are considered Application Layer protocols in the OSI model. They operate at Layer 7, providing interfaces for user-level interaction and command control.

MTCNA Course Material - TCP/IP vs OSI Model:

"Telnet, FTP, HTTP are Application Layer protocols. They operate at the top of the OSI stack (Layer 7)." Rene Meneses

MTCNA Study Guide - Protocol Layers:

"Telnet and FTP reside at the Application Layer. They initiate data exchange between hosts."

* Presentation and Session layers are not separately used in the TCP/IP model and are merged into the Application Layer.

* Transport (Layer 4) is used by these protocols (via TCP), but the protocol itself resides at the Application Layer.

NEW QUESTION # 104

MikroTik RouterOS commands can be run once a day by:

- A. /system cron
- B. /system scheduler
- C. /system watchdog

Answer: B

NEW QUESTION # 105

Which type of encryption could be used to establish a connection with a simple passkey without using a 802.1X authentication server?

- A. WPA EAP/WPA2 EAP
- B. WPA PSK/WPA2 PSK

Answer: A

NEW QUESTION # 106

Which firewall chain should you use to filter clients HTTP traffic going through the router?

- A. input
- B. forward
- C. output
- D. prerouting

Answer: B

NEW QUESTION # 107

Which type of encryption could be used to establish a connection with a simple passkey without using a 802.1 X authentication server?

- A. WPA PSK/WPA2 PSK
- B. WPA EAP/WPA2 EAP

Answer: A

Explanation:

Wireless encryption modes differ in how they authenticate clients:

* WPA/WPA2 PSK (Pre-Shared Key): Uses a passphrase shared by all clients. No external authentication server (like RADIUS

or 802.1X) is required. Simple and suitable for home or small networks.

* WPA/WPA2 EAP: Uses 802.1X (Enterprise mode) and requires a centralized authentication server.

Option analysis:

* A.#Correct - Pre-Shared Key does not require 802.1X server

* B.#Incorrect - Requires EAP-based authentication with 802.1X infrastructure Extract from Official MTCNA Course Material -

Wireless Security:

"WPA PSK/WPA2 PSK uses a pre-shared password. WPA/WPA2 EAP requires 802.1X authentication with a RADIUS server."

Extract from Rene Meneses MTCNA Study Guide - Wireless Encryption:

"To use a simple password for connecting wireless clients, select WPA2-PSK. It does not require server- based authentication."

Extract from Terry Combs Notes - Wireless Security Profiles:

"WPA2 PSK = password-based; WPA2 EAP = 802.1X based. Use PSK for fast, simple authentication."

NEW QUESTION # 108

.....

The MikroTik sector is an ever-evolving and rapidly growing industry that is crucial in shaping our lives today. With the growing demand for skilled MikroTik professionals, obtaining MikroTik Certified Network Associate Exam (MTCNA) certification exam has become increasingly important for those who are looking to advance their careers and stay competitive in the job market.
