

Get the Latest NSE5_FNC_AD-7.6 Guide Torrent for Immediate Study and Instant Success

What's more, part of that DumpTorrent NSE5_FNC_AD-7.6 dumps now are free: https://drive.google.com/open?id=15cjR7zOPqDo1_Zs2CLxgPIT6LUF4VpNy

Before purchasing our NSE5_FNC_AD-7.6 practice guide, we will offer you a part of questions as free demo for downloading so that you can know our NSE5_FNC_AD-7.6 exam question style and PDF format deeper then you will feel relieved to purchase certification NSE5_FNC_AD-7.6 study guide. We try our best to improve ourselves to satisfy all customers' demands. If you have any doubt or hesitate, please feel free to contact us about your issues. If you have doubt about our NSE5_FNC_AD-7.6 Exam Preparation questions the demo will prove that our product is helpful and high-quality.

we can promise that our NSE5_FNC_AD-7.6 study materials will be the best study materials in the world with the high pass rate as 98% to 100%. All these achievements are due to the reason that our NSE5_FNC_AD-7.6 exam questions have a high quality that is unique in the market. If you decide to buy our NSE5_FNC_AD-7.6 training dumps, we can make sure that you will have the opportunity to enjoy the NSE5_FNC_AD-7.6 practice engine from team of experts.

Free PDF Quiz NSE5_FNC_AD-7.6 - Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Updated Guide Torrent

Just like the old saying goes: "Practice is the only standard to testify truth", which means learning of theory ultimately serves practical application, in the same way, it is a matter of common sense that pass rate of a kind of NSE5_FNC_AD-7.6 exam torrent is the only standard to testify whether it is effective and useful. I believe that you already have a general idea about the advantages of our Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam question, but now I would like to show you the greatest strength of our NSE5_FNC_AD-7.6 Guide Torrent --the highest pass rate. According to the statistics, the pass rate among our customers who prepared the exam under the guidance of our NSE5_FNC_AD-7.6 guide torrent has reached as high as 98% to 100% with only practicing our NSE5_FNC_AD-7.6 exam torrent for 20 to 30 hours.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which agent can receive and display messages from FortiNAC to the end user?

- A. MDM
- B. Passive
- C. Dissolvable
- **D. Persistent**

Answer: D

NEW QUESTION # 62

An administrator wants to use FortiNAC-F to prevent internal engineers from accessing specific websites as defined in web filter categories on FortiGate.

In addition to a security trigger and associated action, which configuration must also be defined on FortiNAC-F?

- A. A firewall policy
- B. A profiling method
- **C. A user/host profile**
- D. A compliance policy

Answer: C

NEW QUESTION # 63

An administrator wants to create a conference manager administrator account but would like to limit the number of conference accounts that can be generated to 30.

Which statement about conference accounts is true?

- **A. The administrator can set a maximum of 30 conference accounts in the administrative profile for the conference manager.**
- B. Conference account limits are defined in the conference guest and contractor template.
- C. In FortiNAC-F, conference accounts can be limited by multiples of 25, so the conference administrator could create 50 accounts.
- D. The conference account limit is defined in the onboarding conference portal.

Answer: A

Explanation:

In FortiNAC-F, the Conference Manager is a specialized administrative role designed for delegated administration, often used by receptionists or event organizers to create temporary guest accounts. To maintain security and prevent the over-provisioning of credentials, FortiNAC-F allows for granular restrictions on these accounts.

According to the FortiNAC-F Administration Guide regarding Administrative Profiles, when an administrator creates a profile for a Conference Manager, they can define specific "Account Limits." Under the profile settings (located in System > Settings > Admin Profiles), there is a field specifically for "Max Accounts." By entering "30" into this field, the administrator ensures that any user assigned to this profile cannot exceed 30 active conference accounts at any given time.

This setting is distinct from the Portal configuration or the Guest templates. While templates define the type of account (e.g., duration and access level), the Administrative Profile defines the capabilities and limitations of the person creating those accounts. This ensures that even if a guest template allows for unlimited registrations, the specific administrator is physically restricted by the system from generating more than the allotted 30.

"Administrative Profiles define what an administrator can see and do within the system. For delegated administration roles like the Conference Manager, the 'Max Accounts' field in the Administrative Profile is used to specify the maximum number of accounts the user is permitted to create. Once this limit is reached, the user will be unable to generate additional accounts until existing ones expire or are deleted."

NEW QUESTION # 64

When creating a device profiling rule, what are two advantages of registering the device in the host view? (Choose two.)

- A. The devices can be polled for connection status.
- B. The devices can be managed as a generic SNMP device.
- C. The devices can be associated with a user.
- D. The devices will have connection logs.

Answer: C,D

Explanation:

In FortiNAC-F, the Device Profiler is a rule-based engine that evaluates unknown "rogue" devices and classifies them based on fingerprints and behavior. When a profiling rule matches a device, the administrator can configure the rule to automatically register that device. The registration process can place the device record in two primary locations: the Topology View (as a device) or the Host View (as a registered host).

According to the FortiNAC-F Administration Guide, registering a device in the Host View provides significant advantages for identity management and historical tracking. First, the devices can be associated with a user (C). In the FortiNAC database architecture, the Host View is the primary repository for endpoint identity; placing a profiled device here allows the system to link that hardware (MAC address) to a specific user account, whether that user is an employee, guest, or a system-level "owner". This association is essential for Role-Based Access Control (RBAC) and for tracking accountability across the network fabric. Second, devices registered in the Host View will have connection logs (B). FortiNAC-F maintains a detailed operational history for all host records, including every instance of the device connecting to or disconnecting from a port, its IP address assignments, and the specific policies applied during each session. These logs are invaluable for troubleshooting connectivity issues and for security forensic audits, as they provide a clear timeline of the device's lifecycle on the network. In contrast, devices managed only in the Topology View are typically treated as infrastructure components where the focus is on device availability rather than individual session history.

"Devices that are registered and associated with a user are placed in the Host View and removed from the Profiled Devices window... Placing a device in the Host View allows for the tracking of connection history and the association of the device with a specific identity or user record within the FortiNAC database."

NEW QUESTION # 65

An administrator has created several device profiling rules and evaluated all existing devices in the database. Some of the devices appear in the profiled devices view because they matched a rule, but they remain unknown and the registration column in the profiled devices view shows

"No".

What is the most likely cause?

- A. The device profiling rule has registration set to manual.
- B. The confirm device profiling rule option is not enabled.
- C. The devices match more than one device profiling rule.
- D. The devices have persistent agents installed, and the point of connection has PA optimization enabled.

Answer: B

Explanation:

In FortiNAC-F, Device Profiling Rules are used to automatically identify and categorize devices (such as IP cameras, printers, or IoT devices) based on fingerprints like DHCP fingerprints, OIDs, or MAC prefixes. When a device matches a rule, it appears in the Profiled Devices view.

However, matching a rule does not automatically register the device in the database unless the rule is configured to do so. If the devices appear in the view but remain "Unknown" and show

"No" in the registration column, it indicates that the "Confirm" (or "Auto-register") action has not been triggered. In the Device Profiling Rule configuration, there is a setting called "Allow Auto-Approval" or "Confirm". If this is not enabled, the system identifies the device but waits for an administrator to manually approve the match before changing the host status from "Unknown" to "Registered".

This is a common "safety" configuration used during the initial deployment phase to ensure that the profiling rules are accurate before the system begins automatically granting network access based on those matches.

"If a device matches a rule but is not registered, check the rule configuration. The Confirm option (within the Method or Rule settings) determines if the system automatically registers the device upon a match. If Confirm is not enabled, the device will remain in the 'Profiled' state with a registration status of 'No' until an administrator manually promotes the device."

NEW QUESTION # 66

.....

Reliable Fortinet NSE 5 - FortiNAC-F 7.6 Administrator NSE5_FNC_AD-7.6 Dumps Questions and dumps ebook make your career more successful. Fortinet provides updated, free reliable Fortinet NSE 5 - FortiNAC-F 7.6 Administrator dumps free download. And the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Fortinet NSE 5 - FortiNAC-F 7.6 Administrator price is affordable. With 365 days updates. It works with all operating systems like Linux, Windows, Android, Mac, and IOS, etc.

Latest NSE5_FNC_AD-7.6 Exam Questions: https://www.dumptorrent.com/NSE5_FNC_AD-7.6-braindumps-torrent.html

Fortinet NSE5_FNC_AD-7.6 Guide Torrent It boosts their productivity as well, Online Support for NSE5_FNC_AD-7.6 Certification; Furthermore, the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) PDF format is portable and users can also print Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) questions in this document, In addition to the Fortinet NSE5_FNC_AD-7.6 PDF dumps, we also offer Fortinet NSE5_FNC_AD-7.6 practice exam software, Fortinet NSE5_FNC_AD-7.6 practice exam software allows students to review and refine skills in a preceding test setting.

Blocking and Nonblocking Assignments, Predicting the future is never a simple task, It boosts their productivity as well, Online Support for NSE5_FNC_AD-7.6 Certification.

Furthermore, the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) PDF format is portable and users can also print Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) questions in this document, In addition to the Fortinet NSE5_FNC_AD-7.6 PDF dumps, we also offer Fortinet NSE5_FNC_AD-7.6 practice exam software.
