## Microsoft MS-102 試験は簡単に高品質のMS-102学習指導: Microsoft 365 Administrator

Jpexam市場調査によると、MS-102試験の準備をしている多くの人が、試験に関する最新情報を入手したいことがわかっています。すべての候補者の要件を満たすために、私たちはあなたを助けるためにそのような高品質のMS-102学習資料をまとめました。当社Microsoftの製品はお客様にとって非常に便利であり、MS-102試験問題よりも優れたMicrosoft 365 Administrator教材を見つけることはできないと考えられています。私たちの学習教材を学ぶために数時間を費やすつもりなら、短時間で試験に合格します。次に、MS-102テストの質問を紹介します。

### Microsoft MS-102 認定試験の出題範囲:

| トピック   | 出題範囲                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| トピック 1 | <ul style="list-style-type: none"><li>Deploy and manage a Microsoft 365 tenant: Management of roles in Microsoft 365 and management of users and groups are discussion points of this topic. It also focuses on implementing and managing a Microsoft 365 tenant.</li></ul>                                                                                                                                                                                             |
| トピック 2 | <ul style="list-style-type: none"><li>Implement and manage Microsoft Entra identity and access: In this topic, questions about Microsoft Entra tenant appear. Moreover, it delves into implementation and management of authentication and secure access.</li></ul>                                                                                                                                                                                                     |
| トピック 3 | <ul style="list-style-type: none"><li>Manage compliance by using Microsoft Purview: Implementation of Microsoft Purview information protection and data lifecycle management is discussed in this topic. Moreover, questions about implementing Microsoft Purview data loss prevention (DLP) also appear.</li></ul>                                                                                                                                                     |
| トピック 4 | <ul style="list-style-type: none"><li>Manage security and threats by using Microsoft Defender XDR: This topic discusses how to use Microsoft Defender portal to manage security reports and alerts. It also focuses on usage of Microsoft Defender for Office 365 to implement and manage email and collaboration protection. Lastly, it discusses the usage of Microsoft Defender for Endpoint for the implementation and management of endpoint protection.</li></ul> |

### Microsoft 365 Administrator 認定 MS-102 試験問題 (Q96-Q101):

#### 質問 #96

#### HOTSPOT

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

| Name   | Type                  |
|--------|-----------------------|
| Group1 | Security              |
| Group2 | Mail-enabled security |
| Group3 | Microsoft 365         |
| Group4 | Distribution          |

All the groups are deleted.

Which groups can be restored, and what is the retention period? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Groups that can be restored:

- Group3 only
- Group1 and Group2 only
- Group2 and Group4 only
- Group1, Group2, and Group3 only
- Group1, Group2, Group3, and Group4

Retention period:

- 24 hours
- 7 days
- 14 days
- 30 days
- 90 days

正解:

解説:

Groups that can be restored:

- Group3 only
- Group1 and Group2 only
- Group2 and Group4 only
- Group1, Group2, and Group3 only
- Group1, Group2, Group3, and Group4

Retention period:

- 24 hours
- 7 days
- 14 days
- 30 days
- 90 days

Explanation:

## Answer Area

Groups that can be restored:

▼

- Group3 only
- Group1 and Group2 only
- Group2 and Group4 only
- Group1, Group2, and Group3 only
- Group1, Group2, Group3, and Group4

Retention period:

▼

- 24 hours
- 7 days
- 14 days
- 30 days
- 90 days

Box 1: Group3 only

Box 2: 30 days

If you've deleted a group, it will be retained for 30 days by default. This 30-day period is considered a "soft-delete" because you can still restore the group. After 30 days, the group and its associated contents are permanently deleted and cannot be restored.

### 質問 #97

You have a Microsoft 365 E5 subscription.

You create a Conditional Access policy named Policy1 and assign Policy1 to all users.

You need to configure Policy1 to enforce multi factor authentication (MFA) if the user risk level is high.

Which two settings should you configure in Policy1? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

## New

Conditional Access policy

Control access based on Conditional Access policy to bring signals together, to make decisions, and enforce organizational policies.

Access controls

Grant ⓘ

0 controls selected

Session ⓘ

0 controls selected ✓

Explanation:

Conditions: Set "User risk" to "High"

To enforce MFA based on user risk, you need to configure the Conditional Access policy to trigger when the user risk level is high.

This setting ensures that the policy is applied only to users who have a high-risk level.

Grant: Require multi-factor authentication

This setting enforces MFA for users who meet the condition set (high user risk). Requiring MFA ensures that users must provide additional verification, enhancing security for high-risk sign-ins.

#### 質問 #98

Your network contains an on-premises Active Directory domain that is synced to Azure AD as shown in the following exhibit.

An on-premises Active Directory user account named Allan You is synchronized to Azure AD. You view Allan's account from Microsoft 365 and notice that his username is set to Allan @>ddatum.onmicrosoft.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE Each correct selection is worth one point.

| Answer Area                                                               |                       |                       |  |
|---------------------------------------------------------------------------|-----------------------|-----------------------|--|
| Statements                                                                | Yes                   | No                    |  |
| From the Azure portal, you can reset the password of Allan Yoo.           | <input type="radio"/> | <input type="radio"/> |  |
| From the Azure portal, you can configure the job title of Allan Yoo.      | <input type="radio"/> | <input type="radio"/> |  |
| From the Azure portal, you can configure the usage location of Allan Yoo. | <input type="radio"/> | <input type="radio"/> |  |

正解:

|  |  | From the Azure portal, you can reset the password of Allan Yoo.           | <input type="radio"/>            | <input checked="" type="radio"/> |
|                                                                                   |  | From the Azure portal, you can configure the job title of Allan Yoo.      | <input type="radio"/>            | <input checked="" type="radio"/> |
|                                                                                   |  | From the Azure portal, you can configure the usage location of Allan Yoo. | <input checked="" type="radio"/> | <input type="radio"/>            |

#### 質問 #99

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Office 365.

The subscription has the default inbound anti-spam policy and a custom Safe Attachments policy.

You need to identify the following information:

\* The number of email messages quarantined by zero-hour auto purge (ZAP)

\* The number of times users clicked a malicious link in an email message Which Email & collaboration report should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

| Answer Area                                                                 |                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| To identify the number of emails quarantined by ZAP:                        | <div>  <ul style="list-style-type: none"> <li>Threat protection status</li> <li>Mailflow status report</li> <li>Spoof detections</li> <li>Threat protection status</li> <li>URL threat protection</li> </ul> </div> |
| To identify the number of times users clicked a malicious link in an email: | <div> <ul style="list-style-type: none"> <li>Mailflow status report</li> <li>Mailflow status report</li> <li>Spoof detections</li> <li>Threat protection status</li> <li>URL threat protection</li> </ul> </div>                                                                                       |

| To identify the number of times users clicked a malicious link in an email: | Mailflow status report   |

#### 質問 #100

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Office 365 Advanced Threat Protection (ATP) settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft 365 admin center, you assign SecAdmin1 the SharePoint admin role.

Does this meet the goal?

- A. Yes
- B. No

正解: B

解説:

You need to assign the Security Administrator role.
