

Free PDF Cisco - 400-007 - Cisco Certified Design Expert (CCDE) Written Exam Newest Training For Exam

DOWNLOAD the newest Pass4training 400-007 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1510KnPJVz9FKvEsix16zhN4aUW4cy8kg>

The development and progress of human civilization cannot be separated from the power of knowledge. You must learn practical knowledge to better adapt to the needs of social development. Now, our 400-007 learning materials can meet your requirements. You will have good command knowledge with the help of our study materials. The certificate is of great value in the job market. Our 400-007 Study Materials can exactly match your requirements and help you pass exams and obtain certificates. As you can see, our products are very popular in the market. Time and tides wait for no people.

Cisco 400-007 Exam Syllabus Topics:

Section	Weight	Objectives
Service Design	15%	- Incorporate automation and network programmability • 1. Infrastructure as Code tool adoption • 2. Data parsing structures using JSON and XML formats - Design infrastructure and network virtualization • 1. MPLS architecture implementations such as LDP and Segment Routing • 2. Cloud integration models including hybrid and multi-cloud environments

Security Design	15%	- Design secure perimeter and edge boundaries • 1. Enterprise cryptography architectures and VPN frameworks • 2. Firewall and Intrusion Prevention System deployment modes - Design secure infrastructure controls • 1. Network virtualization security and microsegmentation • 2. Layer 2 and Layer 3 security defense mechanisms
Business Strategy Design	15%	- Assess business goals and drivers • 1. Determine regulatory and compliance constraints • 2. Evaluate risk management and business continuity strategies • 3. Analyze company financial metrics and drivers like CAPEX, OPEX, and ROI - Evaluate project management methodologies impact • 1. Waterfall framework implementation constraints • 2. Agile framework and iterative lifecycle alignment
Network Design	30%	- Design resilient and scalable campus architectures • 1. Layer 2 and Layer 3 boundary definitions • 2. High availability techniques and fast convergence mechanisms - Design Service Provider and Enterprise WAN architectures • 1. Software-Defined WAN design implementations • 2. WAN transport technologies including MPLS, Layer 3 VPN, and Metro Ethernet • 3. Data center interconnect solutions
Control, Data, Management Plane and Operational Design	25%	- Design control plane routing architectures • 1. IPv4 and IPv6 dual-stack infrastructure transitions • 2. Unicast routing protocols including OSPF, EIGRP, IS-IS, and BGP • 3. Multicast routing designs and protocol options - Design data plane transport and management plane strategies • 1. End-to-end Quality of Service policies • 2. Network visibility, telemetry, and logging infrastructures

Cisco Certified Design Expert (CCDE) Written Exam free exam pdf & 400-007 useful dumps are the best choice for you

We will not only ensure you to pass the exam, but also provide for you a year free update service. If you are not careful to fail to pass the 400-007 examination, we will full refund to you. However, this possibility is almost not going to happen. We can 100% help you pass the 400-007 Exam, you can download part of practice questions from Pass4training as a free try.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q240-Q245):

NEW QUESTION # 240

An enterprise requires MPLS connected branches to access cloud-based Microsoft 365 services over an SD-WAN solution.

Internet access is available only at dual regional hub sites that are connected to the MPLS network. Which connectivity method provides an optimum access method to the cloud-based services if one ISP suffers loss or latency?

- A. Cloud onRamp SaaS
- B. Cloud onRamp SWG
- C. Cloud onRamp gateway site
- D. Cloud onRamp

Answer: A

NEW QUESTION # 241

You have been asked to design a remote access VPN solution to support up to 2000 devices. You must ensure that only corporate assets are allowed to connect to the VPN, and users must authenticate to gain access based on their user role. Users must use a password that they are already using to access existing applications. A user may not always use the same device to access the VPN. Which two options combined meet the requirements? (Choose two)

- A. Deploy certificates that are unique to each user
- B. Use local usernames and passwords on the VPN device
- C. Deploy a central authentication directory that users can be authenticated and authorized against
- D. Deploy an IPsec VPN solution
- E. Deploy a SSL VPN solution
- F. Deploy certificates that are unique to each device

Answer: C,E

Explanation:

The design requires scalability, centralized credential management, device independence, and role-based access:

* B (Central authentication directory): A centralized directory (such as Active Directory, RADIUS, or LDAP) allows the VPN solution to leverage existing user credentials, support role-based access control, and scale easily.

* F (SSL VPN): Provides remote access VPN services that support a variety of client devices, including unmanaged or personal devices, without requiring device certificates. SSL VPN is well-suited for scenarios where users may not always use the same device.

Other options explained:

* A: Local usernames/passwords do not scale to thousands of users and lack centralized policy control.

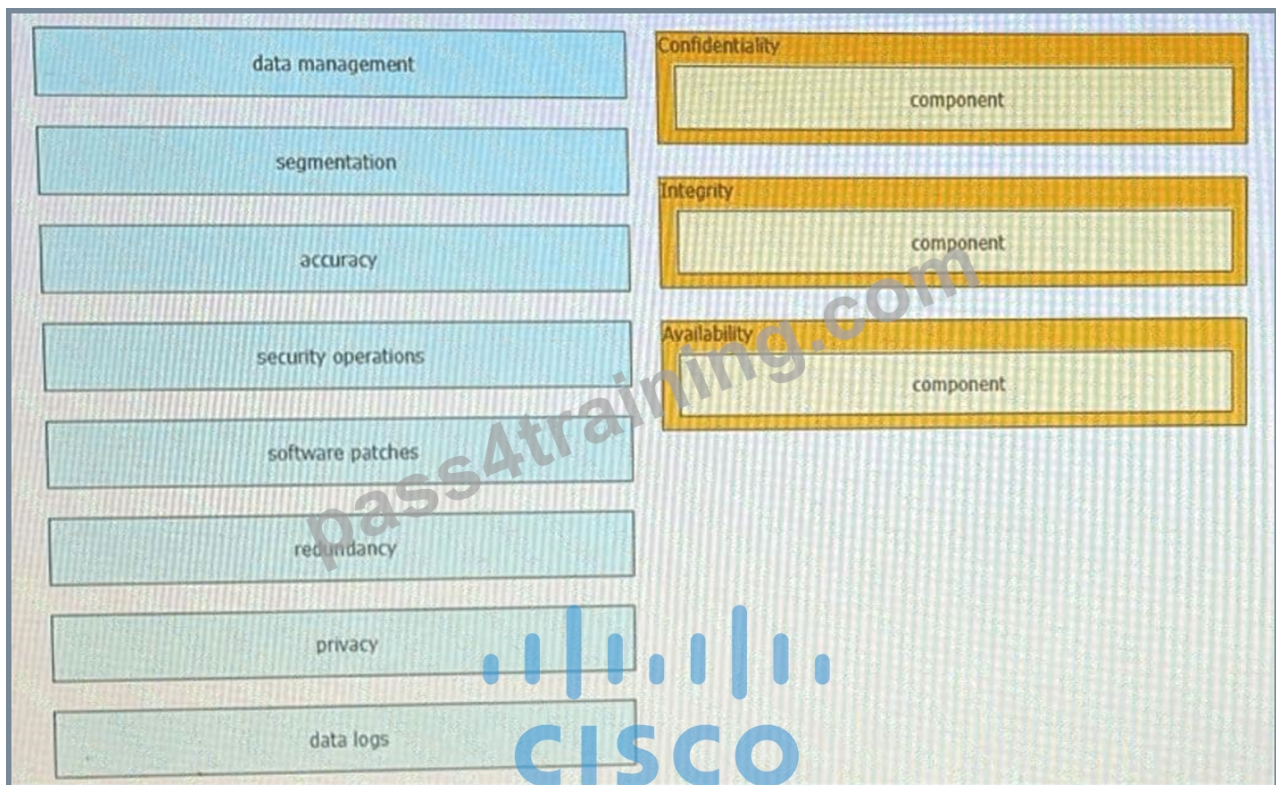

* C/E: Certificates would require device management and may not be feasible if users switch devices.

* D: IPsec VPN can work, but typically requires more complex client configuration and may not support flexible device usage as well as SSL VPN.

-

NEW QUESTION # 242

Drag the components that are part of the CIA triad to the correct target on the right. Not all components are used.

Answer:

Explanation:

NEW QUESTION # 243

A business requirement is supplied to an architect from a car manufacturer stating their business model is changing to just-in-time manufacturing and a new network is required, the manufacturer does not produce all of the specific components in-house. which area should the architect focus on initially?

- A. Low Latency Infrastructure
- B. Modularity
- C. Automation
- D. Zero Trust Networking

Answer: C

NEW QUESTION # 244

Over the years, many solutions developed to limit control plane state which reduces the scope or the speed of control plane information propagation Which solution removes more specific information about a particular destination as topological distance is covered in the network?

- A. Aggregation
- B. Summarization
- C. Back-off timers
- D. Layering

Answer: B

NEW QUESTION # 245

.....

The Cisco 400-007 exam practice questions are being offered in three different formats. These formats are Cisco 400-007 web-based practice test software, desktop practice test software, and PDF dumps files. All these three Cisco 400-007 exam questions format are important and play a crucial role in your Cisco Certified Design Expert (CCDE) Written Exam (400-007) exam preparation. With the Cisco 400-007 exam questions you will get updated and error-free Cisco Certified Design Expert (CCDE) Written Exam (400-007) exam questions all the time. In this way, you cannot miss a single Pass4training Cisco 400-007 exam question without an answer.
