We have confidence that your career will be in the ascendant with the passing certificate of the DEP-2025 Study Guide as a beginning. With the unbeatable high pass rate as 98% to 100%, no one can do this job better than us to help you pass the DEP-2025 exam. Just give you a chance to success!

### Apple Deployment and Management Exam Sample Questions (Q172-Q177):

#### NEW QUESTION # 172

Which is an important user authentication feature of an MDM solution that you should consider?

- A. Support for future versions of macOS, iOS, and iPadOS
- B. Support for the BYOD deployment model
- **C. Support and integration with your identity provider or directory service**

**Answer: C**

Explanation:

A key feature to consider in an MDM solution is its ability to integrate with an organization's existing identity provider (IdP) or directory service (e.g., Active Directory, Azure AD, or Google Workspace). This ensures seamless user authentication, leveraging single sign-on (SSO) and existing credentials, which enhances security and user experience. Support for future OS versions (option B) is important for compatibility but not specifically an authentication feature. Support for BYOD (option C) is a deployment consideration, not an authentication feature. The Apple Platform Deployment Guide highlights IdP integration as critical for authentication in MDM deployments.

#### NEW QUESTION # 173

What does the Bonjour zero-configuration networking architecture support?

- A. MAC address randomization
- **B. Discovering services on a local area network**
- C. RADIUS authentication
- D. Opportunistic Wireless Encryption

**Answer: B**

Explanation:

Bonjour enables service discovery on a LAN. The macOS Deployment Reference states, "Bonjour supports discovering services such as printers, file shares, and other resources on a local network." Options A, B, and D are unrelated to Bonjour's function.

Reference:

macOS Deployment Reference, "Bonjour" section.

Apple Platform Deployment Guide, "Networking" section.

#### **NEW QUESTION # 174**

What do you use to manually add a device to Apple Business Manager or Apple School Manager?

- A. Mac Evaluation Utility
- B. Profile Manager
- **C. Apple Configurator**
- D. Apple Remote Desktop

**Answer: C**

Explanation:

Apple Configurator is the tool for manually adding devices to ABM or ASM, especially for devices not purchased directly from Apple. The Apple Configurator User Guide states, "Use Apple Configurator to add devices to Apple Business Manager or Apple School Manager by connecting them to a Mac via USB. This process supervises the devices and assigns them to your organization's MDM server." Options A, B, and C serve other purposes and cannot perform this task.

References:

Apple Configurator User Guide, "Adding Devices to Apple Business Manager" section.

Apple Business Manager User Guide, "Manually Add Devices" section.

#### **NEW QUESTION # 175**

You bought new app licenses in Apple Business Manager, but they're not available in your MDM solution.

What might cause this?

- A. APNs token annual expiration
- B. A password change to the MDM administrator account
- **C. Content token annual expiration**
- D. Creation of a new Content Manager

**Answer: C**

Explanation:

Content token expiration disrupts app sync. The Apple Business Manager User Guide states, "If the content token expires, app licenses won't sync to the MDM solution until it's renewed." Option B affects notifications, not apps.

References:

Apple Business Manager User Guide, "Apps and Books" section.

Mobile Device Management Protocol Reference, "Content Token" section.

#### **NEW QUESTION # 176**

You're using Apple Business Manager or Apple School Manager. Which two account roles can manage the federation process, but can't sign in using federated authentication? (Select two.)

- A. Device Enrollment Manager
- B. Content Manager
- **C. People Manager**
- D. Manager
- **E. Administrator**

**Answer: C,E**

Explanation:

Administrator and People Manager roles manage federation but use local ABM/ASM credentials. The Apple Business Manager User Guide states, "Administrators and People Managers can configure and manage the federation process in Apple Business Manager or Apple School Manager, but their accounts remain local and cannot sign in using federated authentication." Options C, D, and E lack these permissions or are not relevant roles for federation management.

References:

Apple Business Manager User Guide, "Roles and Federated Authentication" section.

Apple Platform Deployment Guide, "Identity Management Roles" section.

**NEW QUESTION # 177**

.....
