Many people always are stopped by the difficult questions. Then they will fall into thoughts to try their best to answer the questions of the SC-300 Real Exam. But they forgot to answer the other questions, our SC-300 training guide can help you solve this problem and get used to the pace.

Microsoft SC-300 certification exam is a valuable credential for professionals who work in the field of identity and access management. Microsoft Identity and Access Administrator certification demonstrates that the candidate has the knowledge and skills needed to design, implement, and manage identity and access solutions in a Microsoft environment. Microsoft Identity and Access Administrator certification can lead to career advancement opportunities and higher salaries.

To become a Microsoft Certified Identity and Access Administrator, candidates must pass the Microsoft SC-300 Exam. SC-300 exam consists of multiple-choice questions that cover a range of topics such as Azure Active Directory, Azure AD Connect, conditional access policies, and identity protection. Candidates must demonstrate their ability to implement, manage, and monitor identity and access solutions using Azure Identity services.

Microsoft Identity and Access Administrator Sample Questions (Q296-Q301):

NEW QUESTION # 296
Case Study 1 - Contoso, Ltd
Overview
Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in London and Seattle.

Contoso has a partnership with a company named Fabrikam, Inc. Fabrikam has an Azure Active Directory (Azure AD) tenant named fabrikam.com.

Existing Environment. Existing Environment

The on-premises network of Contoso contains an Active Directory domain named contoso.com.

The domain contains an organizational unit (OU) named Contoso_Resources. The Contoso_Resources OU contains all users and computers.

The contoso.com Active Directory domain contains the users shown in the following table.

Existing Environment. Microsoft 365/Azure Environment

Contoso has an Azure AD tenant named contoso.com that has the following associated licenses:

* Microsoft Office 365 Enterprise E5
* Enterprise Mobility + Security
* Windows 10 Enterprise E3
* Project Plan 3

Azure AD Connect is configured between Azure AD and Active Directory Domain Services (AD DS). Only the Contoso_Resources OU is synced.

Helpdesk administrators routinely use the Microsoft 365 admin center to manage user settings.

User administrators currently use the Microsoft 365 admin center to manually assign licenses. All users have all licenses assigned besides the following exceptions:

* The users in the London office have the Microsoft 365 Phone System license unassigned.
* The users in the Seattle office have the Yammer Enterprise license unassigned.

Security defaults are disabled for contoso.com.

Contoso uses Azure AD Privileged Identity Management (PIM) to protect administrative roles.

Existing Environment. Problem Statements

Contoso identifies the following issues:

* Currently, all the helpdesk administrators can manage user licenses throughout the entire Microsoft 365 tenant.
* The user administrators report that it is tedious to manually configure the different license requirements for each Contoso office.
* The helpdesk administrators spend too much time provisioning internal and guest access to the required Microsoft 365 services and apps.
* Currently, the helpdesk administrators can perform tasks by using the User administrator role without justification or approval.
* When the Logs node is selected in Azure AD, an error message appears stating that Log Analytics integration is not enabled.

Requirements. Planned Changes

Contoso plans to implement the following changes:

* Implement self-service password reset (SSPR).
* Analyze Azure audit activity logs by using Azure Monitor.
* Simplify license allocation for new users added to the tenant.
* Collaborate with the users at Fabrikam on a joint marketing campaign.
* Configure the User administrator role to require justification and approval to activate.
* Implement a custom line-of-business Azure web app named App1. App1 will be accessible from the internet and authenticated by using Azure AD accounts.
* For new users in the marketing department, implement an automated approval workflow to provide access to a Microsoft SharePoint Online site, group, and app.

Contoso plans to acquire a company named Adatum Corporation. One hundred new ADatum users will be created in an Active Directory OU named Adatum. The users will be located in London and Seattle.

Requirement. Technical Requirements

Contoso identifies the following technical requirements:

* All users must be synced from AD DS to the contoso.com Azure AD tenant.
* App1 must have a redirect URI pointed to https://contoso.com/auth- response.
* License allocation for new users must be assigned automatically based on the location of the user.
* Fabrikam users must have access to the marketing department's SharePoint site for a maximum of 90 days.
* Administrative actions performed in Azure AD must be audited. Audit logs must be retained for one year.
* The helpdesk administrators must be able to manage licenses for only the users in their respective office.
* Users must be forced to change their password if there is a probability that the users' identity was compromised.

You need to meet the planned changes for the User administrator role.

What should you do?

- A. Modify Role settings.
- B. Create an administrative unit.
- C. Modify Active assignments.
- D. Create an access review.

Answer: A

Explanation:
Role Setting details is where you need to be: Role setting details - User Administrator Privileged Identity Management | Azure AD roles Default Setting State Require justification on activation Yes Require ticket information on activation No On activation, require Azure MFA Yes Require approval to activate No Approvers None

NEW QUESTION # 297

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.
You plan to increase app security for the subscription.
You need to identify which apps do NOT require user authentication
What should you do in the Microsoft 365 Defender portal?

- A. Review the cloud app catalog.
- B. Create a snapshot Cloud Discovery report.
- C. Create an OAuth policy and review alerts.
- D. Create a discovered app query.

Answer: D

NEW QUESTION # 298

You have an Azure AD tenant that contains the users shown in the following table.
☐
You need to compare the role permissions of each user. The solution must minimize administrative effort.
What should you use?

- A. the Microsoft Entra admin center
- B. the Microsoft Purview compliance portal
- C. the Microsoft 365 Defender portal
- D. the Microsoft 365 admin center

Answer: A

NEW QUESTION # 299

You have an Azure subscription.
Azure AD logs are sent to a Log Analytics workspace.
You need to query the logs and graphically display the number of sign-ins per user.
How should you complete the query? To answer, select the appropriate options in the answer area.
☐

Answer:

Explanation:
☐
Explanation:
Box 1 =
SigninLogs
| where ResultType == 0
| summarize login_count = count() by identity
| render piechart
This query retrieves the sign-in logs, filters the successful sign-ins, summarizes the count of sign-ins per user, and renders the result as a pie chart.
Box 2 = Render

NEW QUESTION # 300

You have an Azure subscription that contains the resources shown in the following table.
☐
The subscription contains the virtual machines shown in the following table.
☐
Which identities can be assigned the Owner role for RG1, and to which virtual machines can you assign Managed2? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.
☐

Answer:

Explanation:

Explanation:

Box1:Managed1, Managed2, VM1, and VM2 VM3

Box2: VM1, VM2, VM3, VM4 This article confirms that managed identities can be used acrossgeos:
https://learn.microsoft.com/en-us/entra/identity/managed-identities-azure-resources/managed-identities-faq

NEW QUESTION # 301

......

Passing the Microsoft Identity and Access Administrator certification test is an important step in professional development, and preparing with actual Microsoft Identity and Access Administrator exam questions can help applicants achieve this certification.
