UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q160-Q165):

NEW QUESTION # 160

What are the main functionalities provided by Assisted Task Mining to enhance task understanding and analysis?

- **A. It allows you to capture variations of tasks, merge these variations for a comprehensive understanding, edit the task graph, and accelerate actionability by generating essential assets.**
- B. It only focuses on generating PDD and XAML files, ignoring the variations or illustration of tasks.
- C. It captures the actions performed by the mouse clicks and system logs.
- D. It disregards the task graph and focuses only on the annotation of actions.

Answer: A

Explanation:

Understanding Assisted Task Mining (ATM):

Assisted Task Mining focuses on enhancing the understanding of known tasks by capturing user actions, analyzing variations, and generating actionable outputs like PDDs and automation skeletons.

Why Option A is Correct:

Capturing task variations and merging them into a comprehensive map ensures end-to-end task analysis.

Editing task graphs and annotating actions facilitates deeper analysis and provides clear insights for automation.

Essential outputs like PDDs and XAML files accelerate the implementation process.

Why Other Options Are Incorrect:

Option B: Focusing solely on mouse clicks and system logs limits the scope of task analysis.

Option C: ATM does not ignore variations; it integrates them for a better understanding.

Option D: Disregarding the task graph would overlook a critical analysis tool.

NEW QUESTION # 161

What UiPath deployment model should a customer use if they would like a full-platform experience that is self-hosted in cloud or on-premises?

- **A. Automation Suite**
- B. Automation Platform
- C. Standalone
- D. Automation Cloud

Answer: A

Explanation:

For customers seeking a full-platform experience that can be self-hosted either in the cloud or on-premises, the UiPath Automation Suite is the recommended deployment model. This suite provides a comprehensive set of tools and services for enterprise automation, supporting complex and scalable RPA initiatives under the organization's control. NEW QUESTION # 162

What is the role of UiPath Automation Hub?

- A. Estimates when the business process should be automated
- **B. Manages and tracks the progress of automation projects**
- C. Discovers the primary stakeholders of the business processes
- D. Helps in choosing the members of the RPA development team

Answer: B

Explanation:

The role of UiPath Automation Hub is to manage and track the progress of automation projects. It acts as a centralized platform where all stakeholders can collaborate, share ideas, and monitor the various stages of automation initiatives, ensuring transparency and efficient management of the automation lifecycle.

NEW QUESTION # 163

Which of the following principles applies during the Process Documentation stage?

- A. Including more scenarios and business rules should be done after the first review
- B. Sign-Off is not mandatory if the feedback was implemented after review.
- C. High-level process map should be created only after the To-Be process map is done
- **D. A minimum of one review is required**

Answer: D

Explanation:

During the Process Documentation stage, it is a best practice and often a requirement to have at least one review of the documentation created, such as the Process Design Document (PDD). This ensures that all stakeholders agree on the process as documented and that it accurately represents the business needs and technical requirements.
