100% Pass 2026 Nutanix NCP-DB-6.10 –Trustable Exam Questions And Answers

our company is determined to help provide the most accurate NCP-DB-6.10 Exam Questions and help more people get the NCP-DB-6.10 certificate successfully. Our company has a long history of 10 years in designing NCP-DB-6.10 study materials and enjoys a good reputation across the globe. Now we can be the leader in this exam field and have a large number of regular customers from different countries. We are looking forward to your joining in us.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q88-Q93):

NEW QUESTION # 88

When registering a new Nutanix Cluster with Era, what component is installed on the target Nutanix cluster via the Register Nutanix Cluster workflow?

- A. Era Sewer
- **B. Era Agent**
- C. API Server
- D. Repository Server

Answer: B

Explanation:

When registering a new Nutanix Cluster with Era, the Era Agent is installed on the target Nutanix cluster via the Register Nutanix

Cluster workflow. This agent is crucial for the functioning of the Nutanix Database Service (NDB) as it helps in managing and optimizing database workloads. It also enables the application of procedural concepts to add Nutanix clusters to NDB.

NEW QUESTION # 89

An administrator needs the ability to clone a source database to a point in time. What is the lowest log frequency in minutes that can be configured in the Era IJI for log catchup operation?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

The log frequency in the Era IJI for log catchup operation can be configured to as low as 5 minutes. This allows the system to capture changes to the database at a high frequency, enabling more precise point-in-time recovery options. However, it's important to note that a higher frequency of log catchup operations can lead to increased system load. Therefore, the optimal frequency may vary depending on the specific requirements and capabilities of your system.

Please refer to the Nutanix Database Automation (NCP-DB) Learning documents for more detailed information.

NEW QUESTION # 90

A new administrator is tasked with changing the NDB GUI password via CLI. Which command will accomplish this task?

- A. sudo passwd era
- B. sudo user name admin password
- C. era-server > username admin password
- D. era-server > security password reset

Answer: D

Explanation:

To change the NDB GUI password via the CLI, the administrator should use the command era- server > security password reset. This command interacts with the NDB server (referred to as era-server in the CLI context) to reset the password for the GUI admin user. The process typically prompts for the new password and confirmation, ensuring secure password management. This is the supported method for CLI-based password changes in NDB.

NEW QUESTION # 91

Where are two locations an administrator would find the size of a Source Database? (Choose two.)

- A. On the Era Dashboard Database Summary Table under Source Database.
- B. On the Databases > Sources table.
- C. Under the Capacity widget on the Database Server VMS > List database summary page.
- D. On the Profiles > Database Parameters list for the assigned DB Parameter Profile.

Answer: A,B

Explanation:

Option A: On the Era Dashboard Database Summary Table under Source Database. The dashboard provides a summary of the databases, including their sizes.

Option C: On the Databases > Sources table. This table provides detailed information about the databases, including their sizes.

NEW QUESTION # 92

An administrator is initially setting up Time Machine for a newly-provisioned database. What is the maximum number of snapshots per day that can be configured in the GUI?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

When setting up a Time Machine for a newly-provisioned database in NDB, the GUI allows the administrator to configure the frequency of snapshots for data protection. The maximum number of snapshots per day that can be configured in the NDB GUI is 6. This limit ensures a balance between data granularity (for point-in-time recovery) and storage overhead, preventing excessive resource consumption. The administrator can schedule these snapshots at regular intervals (e.g., every 4 hours) within the Time Machine configuration wizard.

NEW QUESTION # 93

.....

In order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our NCP-DB-6.10 preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one of them as you like. The three versions have their own unique characteristics. The PDF version of NCP-DB-6.10 Training Materials is convenient for you to print, the software version can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our NCP-DB-6.10 free demo first to get a firsthand experience before you make any decision.

Reliable NCP-DB-6.10 Braindumps: <https://www.exams4sures.com/Nutanix/NCP-DB-6.10-practice-exam-dumps.html>

Such as app version of our NCP-DB-6.10 learning guide, you can learn it using your phone without the limitation of place or time, However, the majority of the candidates for the NCP-DB-6.10 exam are those who do not have enough spare time, Every user cherishes the precious time, seize this rare opportunity, they redouble their efforts to learn our NCP-DB-6.10 exam questions, when others are struggling, why do you have any reason to relax, At the same time, our Nutanix NCP-DB-6.10 vce torrent can help you quickly master the core knowledge.

Dark fiber refers to fiber-optic cables that are NCP-DB-6.10 leased from the service provider, where the framing is provided by the enterprise, Playing Nicely with Others, Such as app version of our NCP-DB-6.10 learning guide, you can learn it using your phone without the limitation of place or time.

Top NCP-DB-6.10 Exam Questions And Answers 100% Pass | Professional NCP-DB-6.10: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 100% Pass

However, the majority of the candidates for the NCP-DB-6.10 exam are those who do not have enough spare time, Every user cherishes the precious time, seize this rare opportunity, they redouble their efforts to learn our NCP-DB-6.10 exam questions, when others are struggling, why do you have any reason to relax?
