

# MTCNA Latest Study Plan - First-grade MTCNA: MikroTik Certified Network Associate Exam Practice Exam

P.S. Free & New MTCNA dumps are available on Google Drive shared by Pass4SureQuiz: [https://drive.google.com/open?id=1bXKDM6rUVbM\\_3bk1lFBIKGho-7UcjB0c](https://drive.google.com/open?id=1bXKDM6rUVbM_3bk1lFBIKGho-7UcjB0c)

We have professional technicians examine the website every day, and if you purchase MikroTik Certified Network Associate Exam MTCNA Learning Materials from us, we can offer you a clean and safe online shopping environment, and if you indeed meet any questions in the process of buying, you can contact us, our technicians will solve the problem for you.

The MTCNA certification is ideal for network administrators, technicians, and engineers who are responsible for managing and maintaining network infrastructure. MikroTik Certified Network Associate Exam certification is also suitable for IT professionals who are interested in gaining knowledge and skills in the area of networking. The MTCNA certification is a prerequisite for other advanced MikroTik certifications, such as MTCRE, MTCTCE, and MTCINE.

The MTCNA Exam is a one-day practical and theoretical test that covers various topics such as routing, wireless networking, network security, and network management. MTCNA exam comprises of 60 multiple-choice questions, and the candidate must score at least 60% to pass. MikroTik Certified Network Associate Exam certification is valid for three years and can be renewed by passing the MTCNA renewal exam.

## Pass-Sure 100% Free MTCNA – 100% Free Latest Study Plan | MTCNA Practice Exam

You also get the opportunity to download the latest MTCNA pdf questions and practice tests up to three months from the date of MikroTik MikroTik Certified Network Associate Exam exam dumps purchase. So rest assured that with MikroTik MTCNA real dumps you will not miss even a single MTCNA Exam Questions in the final exam. Now take the best decision of your career and enroll in MikroTik MikroTik Certified Network Associate Exam certification exam and start this journey with MikroTik Certified Network Associate Exam MTCNA practice test questions.

MikroTik MTCNA Certification program is an excellent option for network engineers who want to enhance their skills and knowledge in managing MikroTik routers and wireless systems. It is a comprehensive program that covers all aspects of network management and is recognized globally by the networking industry.

## MikroTik Certified Network Associate Exam Sample Questions (Q150-Q155):

### NEW QUESTION # 150

It is possible to create a configuration where VLAN and PPTP interfaces are bridged together.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

RouterOS allows different types of interfaces, including VLANs and PPP-based interfaces (like PPTP), to be added to a bridge. This creates a Layer 2 network between them, enabling transparent communication.

\* A.#TRUE - Supported and commonly used in tunneling + VLAN transport.

\* B.#FALSE - Incorrect.

Extract from MTCNA Course Material - Bridging Concepts:

"Bridging can include Ethernet, VLAN, wireless, and virtual interfaces such as PPTP and EOIP." Extract from MikroTik Wiki - Bridge Interface:

"Any Layer 2-capable interface (including VLANs, PPP tunnels, and Ethernet) can be included in a bridge." Extract from Rene Meneses Study Guide - Bridging and VLANs:

"It is possible to bridge VLAN interfaces with VPN interfaces for advanced Layer 2 tunneling scenarios."

### NEW QUESTION # 151

In MikroTik RouterOS, Layer 3 communication between 2 hosts can be achieved by using an address subnet of:

- A. /32
- B. /29
- C. /31
- D. /30

**Answer: C**

Explanation:

In traditional IPv4 subnetting, a /30 is often used to connect two hosts directly, giving two usable IPs.

However, MikroTik RouterOS (and as per RFC 3021) supports the use of /31 subnet masks for point-to-point links. A /31 provides exactly two IP addresses - which are both usable - and is ideal for conserving IP space on router-to-router links.

Subnet details for /31:

\* Total addresses: 2

\* Usable addresses: 2 (both can be assigned to endpoints, no broadcast) Evaluation:

\* A. /31 ##Supported by MikroTik for point-to-point links (2 hosts only)

\* B. /29 # Provides 6 usable IPs; more than needed for 2 hosts

\* C. /32 # Single host only; no communication possible with second device

\* D. /30 # Valid, but less efficient than /31

MTCNA Course Manual - IP Addressing and Point-to-Point Communication:

"MikroTik RouterOS allows the use of /31 subnets for point-to-point communication. Both IPs are usable." Rene Meneses

MTCNA Guide - IP & Routing Concepts:

"For links between exactly two devices, /31 saves address space and is supported by MikroTik." Terry Combs Notes - Subnet Efficiency:

"Use /30 or /31 for point-to-point links. MikroTik supports /31 fully, unlike older systems."

### NEW QUESTION # 152

It is possible to add user-defined chains in ip firewall mangle

- A. False
- **B. True**

**Answer: B**

#### NEW QUESTION # 153

Collisions are possible in full-duplex Ethernet networks:

- A. true
- **B. false**

**Answer: B**

Explanation:

In full-duplex Ethernet, devices can transmit and receive simultaneously on separate physical or logical channels. This eliminates the possibility of collisions because there is no need for devices to listen before transmitting - unlike half-duplex Ethernet, which uses CSMA/CD to manage potential collisions.

Full-duplex connections are the standard in modern switching environments and are always collision-free.

MTCNA Official Course Material - Ethernet & Duplex Modes:

"In full-duplex Ethernet, there are separate transmit and receive paths, and therefore, collisions cannot occur." Rene Meneses Study Guide - Ethernet Basics:

"Full-duplex = simultaneous send/receive = no collisions. Collisions are a legacy issue from half-duplex Ethernet." Terry Combs

MTCNA Notes - CSMA/CD and Ethernet:

"Collision Detection (CD) is not used in full-duplex. Only half-duplex environments use CSMA/CD to manage access."

#### NEW QUESTION # 154

Which command is used to determine if an IP access list is enabled on a particular interface?

- A. show interface access-lists
- **B. show interface**
- C. show access-lists
- D. show ip interface

**Answer: B**

#### NEW QUESTION # 155
