The Salesforce Certified Platform Administrator II (Plat-Admn-301) certification is one of the hottest career advancement credentials in the modern Salesforce world. The Salesforce Plat-Admn-301 certification can help you to demonstrate your expertise and knowledge level. With only one badge of Plat-Admn-301 Certification, successful candidates can advance their careers and increase their earning potential.

Salesforce Plat-Admn-301 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security and Access: This section of the exam measures the skills of Salesforce Administrator and covers how record-level access, field access, and sharing models impact data visibility across the system. It focuses on understanding controlled-by-parent relationships, territory management, role hierarchies, and access to reports, dashboards, and email folders. It also includes comparing custom profiles, permission sets, and delegated administration, along with evaluating different authentication methods. The section also addresses the structure of business models such as person accounts, standard accounts, contacts, and contact-to-multiple-account relationships.

Topic 2	<ul style="list-style-type: none"> • Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.
Topic 3	<ul style="list-style-type: none"> • Objects and Applications: This section of the exam measures the skills of a Salesforce Business Analyst and covers selecting appropriate object and application-level solutions to meet business needs. It focuses on identifying when to use master-detail relationships, lookups, junction objects, related lists, record types, Schema Builder, and Object Creator. The section also includes improving UI and user experience using App Manager, Lightning App Builder, Dynamic Forms, standard Lightning components, console apps, and tools like the Lightning page analyze button.

Types of TestValid Salesforce Plat-Admn-301 Practice Questions

The Salesforce Plat-Admn-301 certification exam is a valuable asset for beginners and seasonal professionals. If you want to improve your career prospects then Plat-Admn-301 certification is a step in the right direction. Whether you're just starting your career or looking to advance your career, the Salesforce Plat-Admn-301 Certification Exam is the right choice.

Salesforce Certified Platform Administrator II Sample Questions (Q118-Q123):

NEW QUESTION # 118

Cloud Kicks has updated several profiles and created a new app in the sandbox. After testing, everything is working as expected. Which two options should the administrator use to migrate these changes to production from the sandbox?

Choose 2 answers

- **A. Inbound Change Set**
- B. Package deployment
- **C. Outbound Change Set**
- D. Change Data Capture

Answer: A,C

Explanation:

Change sets are tools that allow administrators to move customizations such as fields, page layouts, profiles, permission sets, etc. from one Salesforce org to another. To use change sets, administrators need to establish a deployment connection between a source org (such as a sandbox) and a target org (such as production). Then, administrators can create an outbound change set in the source org that contains the components they want to deploy, and upload it to the target org. In the target org, administrators can view and validate the inbound change set before deploying it to their org. References: <https://help.salesforce.com/s/articleView?id=sf.changesets.htm&type=5>

NEW QUESTION # 119

AW Computing has implemented the Contacts to Multiple Accounts functionality. Users should be able to distinguish between contacts and related contacts.

What should the administrator do to configure the account page layout?

- A. Display the related accounts related list on the page layout.
- **B. Display the related contacts related list and add the direct field.**
- C. Display both the contacts and the related contacts related lists.
- D. Display the contacts related list and add the related field.

Answer: B

Explanation:

Displaying the related contacts related list and adding the direct field will allow users to distinguish between contacts and related contacts. The related contacts related list shows all contacts that are related to an account, either directly or indirectly. The direct field indicates whether a contact is directly associated with an account or not. By adding this field to the related list, users can easily see which contacts are direct and which are not.

https://help.salesforce.com/s/articleView?id=sf.contacts_multiple_accounts_direct_field.htm&type=5

NEW QUESTION # 120

The Service team at Cloud Kicks needs a way to show the current status from the Account on the Case. This value should be on the page and is used in validation rules.

What should the administrator recommend to solve this?

- A. Add a lookup field to Account.
- B. Make a Rollup Summary.
- C. Use a picklist field.
- **D. Create a cross-object formula.**

Answer: D

Explanation:

A cross-object formula is a formula that references fields from related objects. The administrator can create a cross-object formula field on the Case object that displays the current status from the Account. This field can be used in validation rules and other processes. References: https://help.salesforce.com/s/articleView?id=sf.tips_on_building_formulas_cross_object_formulas.htm&type=5

NEW QUESTION # 121

Ursa Major Solar has a junction object that connects Docs with Solar Panels. The administrator needs users to be able to see all the solar panels that a Doc is related to. Users already have access to the Doc and the Junction, but not the Solar Panel object.

What access does the user need to be able to see the solar panel records?

- **A. Read permission is required on at least one master record.**
- B. Read permission is required on both master records.
- C. Create permission is required on both master records.
- D. Access permission is not required on either master record.

Answer: A

Explanation:

To access a junction object record, a user needs to have at least read permission on one of its master records and on the junction object itself. If the user does not have access to either master record, they cannot access the junction object record. If the user has access to both master records, they can access the junction object record with the most permissive access level of either master record. References: https://help.salesforce.com/s/articleView?id=sf.relationships_manytomany.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.relationships_manytomany.htm&type=5

NEW QUESTION # 122

A sales rep at Ursa Major Solar was assigned to a role under their manager and is the record owner of several opportunities; however, the sales rep is missing from the manager's forecast.

What should the administrator review to solve this issue?

- A. Allow Override Forecasts
- **B. Allow Forecasting**
- C. Enable manager adjustments
- D. Enable owner adjustment

Answer: B

Explanation:

Allow Forecasting is what the administrator should review to solve this issue. Allow Forecasting is a user permission that enables users to access and edit forecasts. If a user does not have this permission, they will not be able to see their own forecast or any forecasts below them in the role hierarchy. Therefore, the administrator should make sure that the sales rep has this permission enabled on their profile or permission set.

NEW QUESTION # 123
