## Test AB-900 Passing Score & AB-900 Braindumps Pdf

We have three versions of our AB-900 exam questions: the PDF, Software and APP online. Because our PDF version of the learning material is available for customers to print, so that your free time is fully utilized. Everything you do will help you pass the AB-900 Exam and get your AB-900 certificate. Of course, the APP and PC versions are also very popular. They can simulate the actual operation of the test environment, and users can perform mock tests for a limited time.

## Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.</li> </ul>

## Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Your company requires that all Microsoft SharePoint sites have a minimum of two owners.

You need to ensure that sites that have less than two owners are marked as read-only if the sites are NOT remediated.

What should you configure in the SharePoint admin center?

- A. Site lifecycle management
- B. Block download policy for SharePoint and OneDrive
- C. Data access governance reports
- D. Site-level access restriction

**Answer: D**

Explanation:

To enforce a minimum of two owners for SharePoint sites and apply a read-only restriction for non-compliant sites, you must combine Site Ownership Policies for monitoring and Site-Level Access Restriction (Restricted Access Control) for enforcement.

1. Enable Site Ownership Policy

Establish the governance rule to identify sites with fewer than two owners.

\*-> 2. Configure Site-Level Access Restriction

Prepare the environment to restrict access at the site level, which overrides individual permissions.

3. Implement Read-Only Remediation

While Site Ownership Policies can automate archival, a "read-only" state for lack of owners is typically managed through the Site Lock State or Custom Permission Levels.

### NEW QUESTION # 14

A Finance user received a sophisticated phishing email with a malicious link that was neutralized.

The security team needs a single, centralized view to review the incident timeline, related alerts (email and endpoint), and recommended actions to harden posture across email and endpoints.

Which Defender XDR capability or portal area gives the security operations team that unified incident timeline and improvement recommendations?

- A. The unified Incidents and Alerts experience plus Secure Score in the Microsoft Defender portal
- B. Microsoft Defender for Identity
- C. Microsoft Defender for Office 365
- D. Microsoft Defender Vulnerability Management

**Answer: A**

### NEW QUESTION # 15

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

□

**Answer:**

Explanation:

□ Explanation:

The correct answer is Connectors . Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems.

Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center , and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents.

This is why the hotspot in the Copilot area should be set to Connectors , not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors .

Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

**NEW QUESTION # 16**

Your company is piloting the use of Microsoft 365 Copilot and has purchased 100 Microsoft 365 Copilot licenses.

You need to view detailed reports about Copilot usage in Microsoft Teams, such as meeting hours summarized by Copilot and meeting actions taken by using Copilot.

What should you use?

- A. the Microsoft 365 Copilot usage report in the Microsoft 365 admin center
- B. the Microsoft 365 Apps usage report in the Microsoft 365 admin center
- **C. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights**
- D. the Microsoft 365 Copilot readiness report in the Microsoft 365 admin center

**Answer: C**

Explanation:

The correct answer is C. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights . Microsoft documents that the Microsoft Copilot Dashboard in Viva Insights provides detailed organizational reporting for Copilot usage and impact, including meeting-related metrics such as total meeting hours summarized or recapped , intelligent recap actions taken using Copilot , and summarize meeting actions taken using Copilot in Teams . Those metrics directly match the scenario in the question.

The other options are less suitable. The Microsoft 365 Apps usage report focuses on app usage generally, not detailed Copilot-in-Teams behavior. The Copilot readiness report is for readiness and deployment planning, not deep Teams usage metrics. The Microsoft 365 Copilot usage report in the admin center provides adoption information, but Microsoft's detailed meeting-action and meeting-hours metrics are documented in the Viva Insights Copilot Dashboard . Therefore, for detailed Teams-specific Copilot reporting during a pilot, the best answer is the Microsoft 365 Copilot dashboard in Microsoft Viva Insights .

**NEW QUESTION # 17**

Select the answer that correctly completes the sentence.

□

**Answer:**

Explanation:

□ The correct answer is Microsoft Graph . Microsoft documents that Microsoft 365 Copilot accesses organizational content and context through Microsoft Graph . Microsoft Graph provides the user's work context, including items such as emails, chats, meetings, files, contacts, and calendar data , along with relationship and activity signals that help Copilot ground and rank responses. Microsoft also explains that Copilot combines organizational content with the user's working context, such as recent chat conversations, email exchanges on a topic, and the meeting the user is currently in. Those are exactly the kinds of signals described in the question, including collaboration history and document relevance.

The other options do not fit this sentence. Microsoft Copilot Studio is used to build and customize copilots and agents. Microsoft Purview is for compliance, governance, and data protection. Microsoft Viva Insights provides workplace analytics and insights, but it is not the core service described by Microsoft as supplying the contextual signals that ground Microsoft 365 Copilot responses.

Therefore, the only option that correctly completes the sentence is Microsoft Graph .

## NEW QUESTION # 18

.....

Keeping in mind all these benefits, we ensure you can pass the Microsoft 365 Copilot & Agent Administration Fundamentals AB-900 exam on your maiden attempt with the help of our exceptional Microsoft AB-900 dumps material.
