NEW QUESTION # 231

31 at 08:59. You need to be able to analyze the complaints by the logged date and use a built-in date hierarchy. What should you do?

- A. Create a column by example that starts with 2018-12-31.

Answer: D

Explanation:

One of the transformations you can perform in Power Query Editor is extract date from text, which creates a date value from a textual representation. For example, given a text column like this:

Logged

2018-12-31 at 08:59

2019-01-01 at 09:15

You can extract the date part by using the `Date.FromText` function with a specific format4. The result will be:

Logged

33
Date

2018-12-31 at 08:59

2018-12-31

2019-01-01 at 09:15

2019-01-01
