With the pass rate more than 98%, our I27001F exam materials have gained popularity in the international market. And we have received many good feedbacks from our customers. In addition, we offer you free demo to have a try before buying I27001F Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can also enjoy free update for one year, and the update version for I27001F will be sent to your email automatically.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following activities are responsibilities of top management?

- A. Assigning the resources necessary to maintain the system
- B. Supporting the drive for continual improvement
- C. Ensuring compliance with the information security policy
- D. All of the above

Answer: D

Explanation:

ISO/IEC 27001:2022 requires top management to demonstrate leadership and commitment with respect to the ISMS. This includes ensuring that the information security policy and objectives are established, ensuring that the resources needed for the ISMS are available, and promoting continual improvement. Top management is also responsible for supporting relevant roles and ensuring that the ISMS achieves its intended outcomes.

Since all of the listed activities align with top management responsibilities, option D is correct.

NEW QUESTION # 13

In ISO/IEC 27001:2022, what does the information security risk assessment process refer to?

- A. All of the above
- B. Establishing and maintaining information security risk criteria
- C. Identifying information security risks
- D. Identifying risk owners

Answer: A

Explanation:

ISO/IEC 27001:2022 requires the organization to establish and maintain information security risk criteria, identify information security risks, and identify risk owners as part of the risk assessment process. These activities are core elements of clause 6 on planning and risk assessment. Since all of the listed options are required parts of the process, the correct answer is D.

NEW QUESTION # 14

Identify the missing words in the following sentence.

The organization shall establish, _____, maintain, and continually improve an information security management system.

- A. administer
- B. monitor
- C. exploit
- D. implement

Answer: D

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 requires the organization to establish, implement, maintain, and continually improve an information security management system. This is one of the core statements of the standard and defines the lifecycle expectation for

the ISMS. Therefore, the missing word is implement, making option A correct.

NEW QUESTION # 15

Within the ISMS, ensuring the integration of information security management system requirements into the organization's processes is a responsibility of:

- A. The IT Security Manager
- B. The quality management representative
- C. The Operations Manager
- D. Top management

Answer: D

Explanation:

ISO/IEC 27001:2022 assigns leadership and accountability for the ISMS to top management. One of the specific responsibilities of top management is to ensure that the ISMS requirements are integrated into the organization's processes. This demonstrates that information security is not treated as an isolated activity, but as part of the overall governance and operation of the organization. Therefore, option D is correct.

NEW QUESTION # 16

Which statement describes a critical success factor for an Information Security Management System ISMS?

- A. Purchasing a good antivirus system
- B. Hiring a consulting firm that is also the same firm that will perform the third-party audit
- C. Hiring a certified ISMS implementation consultant with at least five successful cases
- D. Implementing an effective information security awareness, education, and training program

Answer: D

Explanation:

A successful ISMS depends heavily on awareness, competence, and engagement across the organization. ISO/IEC 27001:2022 emphasizes competence, awareness, communication, leadership, and operational discipline. An effective awareness, education, and training program helps ensure that people understand their information security responsibilities and contribute to the effectiveness of the ISMS. Hiring consultants or buying specific tools may help in some cases, but they are not critical success factors defined by the standard itself. Therefore, option D is the correct answer.

NEW QUESTION # 17

.....

We all know that the I27001F exam is not easy to pass and the certification is not easy to get. But where is a will, there is a way. If you are really determined, go buy I27001F study materials now. With the help of I27001F learning guide, your road will go more smoothly. If you want to know more about our products, maybe you can use the trial version of I27001F simulating exam first. Of course, you can also spend a few minutes looking at the feedbacks to see how popular our I27001F exam questions are.
