

Quiz Nutanix - Trustable NCP-MCI-6.10 Online Training Materials

DOWNLOAD the newest Exams4sures NCP-MCI-6.10 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1TpKT40HG1CEPu0NU-ICxDJSaOB3BIzET>

In the process of preparing the passing test, our NCP-MCI-6.10 guide materials and service will give you the oriented assistance. We can save your time and energy to arrange time schedule, search relevant books and document, ask the authorized person. As our NCP-MCI-6.10 Study Materials are surely valid and high-efficiency, you should select us if you really want to pass NCP-MCI-6.10 exam one-shot. With so many advantages of our NCP-MCI-6.10 training engine to help you enhance your strength, why not have a try?

Nutanix NCP-MCI-6.10 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Conduct Custom Monitoring within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Analysts and Systems Engineers and covers custom monitoring for optimized performance management. Candidates must analyze performance charts, set retention policies, create custom service level agreements (SLAs), and manage storage based on policies. Creating reports involves identifying the required type, selecting generation frequency, determining retention properties, and customizing report formats for different monitoring needs. Effective monitoring ensures better resource utilization, system efficiency, and proactive issue resolution within the multi-cloud environment.
Topic 2	<ul style="list-style-type: none"> • Troubleshoot a Nutanix Multicloud Environment: This section of the exam measures the skills of Technical Support Engineers and IT Operations Specialists and covers diagnosing and resolving common issues within a Nutanix multi-cloud environment. Troubleshooting protection policies and recovery plans requires identifying network mapping failures, vNIC issues, script execution problems, and connectivity failures. Metro replication troubleshooting involves addressing naming conventions, network limitations, and replication states. Security issues in AOS and Prism Central must be resolved by managing CVM communications, security warnings, and log analysis. LCM operations require diagnosing failures in inventory updates and version upgrades. Performance troubleshooting involves analyzing logs, reading performance charts, and adjusting VM configurations to meet performance needs.

Topic 3	<ul style="list-style-type: none"> • Configure Disaster Recovery and Data Protection within a Nutanix Multicloud Environment: This section of the exam measures the skills of Disaster Recovery Specialists and Cloud Engineers and covers configuring protection policies and domains for data security and recovery. Candidates need to identify the right entities for protection, schedule backups, define retention policies, and set up replication to remote sites. Recovery plans must be configured and executed with proper scripting, network mapping, and failover strategies. Metro replication requires understanding failover methodologies, comparing solutions on different hypervisors, and preventing split-brain scenarios. Effective disaster recovery planning ensures minimal downtime and data integrity across environments.
Topic 4	<ul style="list-style-type: none"> • Manage VMs within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Administrators and Virtualization Engineers and covers managing virtual machines (VMs) within a Nutanix multicloud environment. It includes creating and updating VMs by determining hardware requirements, boot modes, sizing, and configuration based on application needs. Candidates must understand how to deploy VMs using templates, snapshots, and image configurations, ensuring the correct formats for importing and exporting VMs. Migration processes require knowledge of prerequisites, storage, network settings, and software compatibility. Additionally, configuring VM categories and attributes is essential for proper organization and management within the environment, ensuring alignment with labels, storage policies, and security settings.
Topic 5	<ul style="list-style-type: none"> • Manage Clusters within a Nutanix Multicloud Environment: This section of the exam measures the skills of Infrastructure Engineers and Systems Administrators and covers the administration of Nutanix clusters. Storage management includes creating, reading, updating, and deleting storage containers and volume groups. Configuring AOS and Prism Central settings involves authentication, SSL certificate management, IAM role-based access control, and configuring network segmentation. Network administration procedures focus on creating VLAN-backed subnets, virtual switches, and load-balancing policies while monitoring NIC usage. Lifecycle management includes performing hardware and software updates and maintaining firmware. Hardware maintenance involves adding or removing nodes and physical disks while ensuring proper upgrades and replacements. Intelligent operations require configuring capacity policies, discovering application relationships, and simulating scenarios to optimize performance.

NCP-MCI-6.10 Latest Exam Guide Help You Pass Exam with High Pass Rate - Exams4sures

Preparation from reliable material is essential to get success in the real Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) exam. One of the most crucial aspects of test preparation is relying on Nutanix NCP-MCI-6.10 exam dumps. The authenticity of Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) exam questions material plays a huge role in achieving a passing score. In the case of choosing, Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) exam dumps outdated material, and one fails and loses resources. Exams4sures is committed to providing real NCP-MCI-6.10 Questions, ensuring that applicants get success in a short time.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q109-Q114):

NEW QUESTION # 109

An administrator has been asked to calculate baseline Capacity Runway on a newly registered AHV cluster. The cluster has been running for 16 days, but no runway projections are displayed. Why are no Capacity Runway projections being displayed?

- A. Capacity Planning requires at least 3 months of data.
- **B. Capacity Planning requires at least 30 days of data.**
- C. Capacity Planning requires at least 6 months of data.
- D. Capacity Planning requires at least 21 days of data.

Answer: B

NEW QUESTION # 110

Which networking component in AHV is responsible for providing network connectivity to virtual machines?

- A. Virtual Switch (vSwitch)
- B. Nutanix Files
- C. RDMA
- D. Controller VM (CVM)

Answer: A

NEW QUESTION # 111

An administrator is tasked with protection of a business critical application. The application is running on a Linux VM and is using a custom DB that require application consistent snapshots for data integrity.

An administrator has written a `pre_freeze` and `post_thaw` scripts and placed them under `/usr/local/sbin/`.

During protection domain scheduled run an alert is generated:

Execution of the PostThaw Script Failed

Which two resolution steps could an administrator conduct to fix the issue? (Choose two.)

- A. Ensure NGT service is up and running.
- B. Review the NGT logs under `/usr/local/sbin/post_thaw`.
- C. Execute scripts manually and ensure they succeed
- D. Ensure that scripts have nutanix user ownership and admin access.

Answer: A,C

Explanation:

To resolve issues with application-consistent snapshots (script execution failures), two critical actions are needed:

* NGT Service Status: From the ECA materials:

"The Nutanix Guest Tools (NGT) service is responsible for executing pre-freeze and post-thaw scripts for application-consistent snapshots. If NGT is not running, these scripts will not execute."

* Script Validation:

"Before relying on scheduled snapshot runs, execute pre-freeze and post-thaw scripts manually to ensure they complete successfully. This helps to rule out script logic or permission issues." Ownership or log review of the script path itself (A and B) are secondary and typically not root-cause resolution steps.

NEW QUESTION # 112

An administrator is responsible for resource planning and needs to plan for resiliency of a 10-node RF3 cluster. The cluster has 100TB of storage.

How should the administrator plan for capacity in the event of future failures?

- A. Set Reserve Memory Capacity (%) to 20.
- B. Set Reserve Storage Capacity (%) to 20.
- C. Set Reserve Capacity for Failure to None.
- D. Set Reserve Capacity for Failure to Auto Detect.

Answer: D

Explanation:

RF3 (Replication Factor 3) clusters require sufficient reserved capacity to tolerate failures without data loss.

* Option C (Set Reserve Capacity for Failure to Auto Detect) is correct:

* Auto Detect dynamically calculates the necessary reserved space based on cluster size and RF settings.

* It ensures that enough storage remains available in case of a node failure.

* Option A (Set Reserve Storage Capacity to 20%) is incorrect:

* The required storage reservation depends on the number of nodes and RF level, not a fixed percentage.

* Option B (Set Reserve Capacity for Failure to None) is incorrect:

* Without reserved capacity, a node failure could lead to data unavailability.

* Option D (Set Reserve Memory Capacity to 20%) is incorrect:

* This setting applies to RAM, not storage resiliency.

References:

* Nutanix Bible #Understanding Replication Factor (RF) and Failure Planning

* Nutanix Prism Element Guide #Configuring Reserve Capacity for Cluster Resiliency

* Nutanix KB #How to Plan Capacity for RF3 Clusters

NEW QUESTION # 113

Which feature in Nutanix AHV provides network microsegmentation to enhance VM security?

- A. Acropolis SDN
- **B. Flow**
- C. vSwitch
- D. Nutanix Prism

Answer: B

NEW QUESTION # 114

.....

Rely on Exams4sures's easy NCP-MCI-6.10 Questions Answers that can give you first time success with 100% money back guarantee! Thousands of professional have already been benefited with the marvelous NCP-MCI-6.10 and have obtained their dream certification. There is no complication involved; the exam questions and answers are simple and rewarding for every candidate. Exams4sures's experts have employed their best efforts in creating the questions and answers; hence they are packed with the relevant and the most updated information you are looking for.
