Topic 4	<ul style="list-style-type: none"> <li>• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.</li> </ul>

## UiPath (ADPv1) Automation Developer Professional Sample Questions (Q175-Q180):

### NEW QUESTION # 175

In order for a developer to utilize the default REFramework without relying on Orchestrator queues, what is the essential prerequisite to ensure that the project does not interact with Orchestrator?

- A. Exclude the Get Transaction Item activity from the project. Eliminate the three SetTransactionStatus activities from the SetTransactionStatus workflow & change the variable type.
- B. Remove the Get Transaction Data state from the Main state machine. Remove the OrchestratorQueueName setting from Config.xlsx & change the variable type.
- C. Eliminate the Get Transaction Data state from the Main state machine. Exclude the Get Transaction Item activity from the project & change the variable type.
- D. Omit the OrchestratorQueueName setting from the Config.xlsx file. Exclude the three SetTransactionStatus activities from the SetTransactionStatus workflow & change the variable type.

**Answer: A**

Explanation:

To utilize the default REFramework without relying on Orchestrator queues, the essential prerequisite is to exclude the Get Transaction Item activity from the project, eliminate the three SetTransactionStatus activities from the SetTransactionStatus workflow, and change the variable type of the TransactionItem and TransactionData variables. The Get Transaction Item activity is used to retrieve a transaction item from the Orchestrator queue, which is not needed if the queue is not used. The SetTransactionStatus activities are used to update the status of the transaction item in the Orchestrator queue, which is also not needed if the queue is not used. The variable type of the TransactionItem and TransactionData variables should be changed to match the type of data that is used as input for the process, such as DataRow, String, or Object. These changes will ensure that the project does not interact with Orchestrator and can use other sources of data for the transactions. References: [The UiPath REFramework], [Get Transaction Item], [Set Transaction Status]

### NEW QUESTION # 176

Which of the following describes the correct hierarchy of the elements in the Object Repository tree structure?

- A. Application, Screen, UI Element, Version.
- B. Application, Version, Screen, UI Element.
- C. Screen, Application, Version, UI Element.
- D. Version, Application, Screen, UI Element.

**Answer: A**

### NEW QUESTION # 177

A developer aims to employ the REFramework for automating a business process that involves a TransactionData collection and addresses.

What is the appropriate variable type for the TransactionItem?

- A. List
- B. Data Row
- C. DataRow[]
- D. QueueItem

**Answer: B**

Explanation:

In the REFramework, the TransactionItem type depends on the data source.

\* When using Queues, the type is QueueItem.

\* When using Data Tables, as in this scenario (involving addresses and collections), the TransactionItem should be of type DataRow to handle each row of data individually.

Reference: UiPath REFramework Documentation > Configuration > Variables and Arguments

### NEW QUESTION # 178

What distinguishes the Settings sheet from the Assets sheet in the "Config.xlsx" file?

- A. Settings sheet contains Credential Assets stored in Orchestrator. Assets sheet contains hard-coded values.
- B. Settings sheet contains hard-coded values. Assets sheet contains all names of Orchestrator Assets except those of type Credential.
- C. Settings sheet contains only values used for the initialization of applications. Assets sheet contains only Credential Assets stored in Orchestrator.
- **D. Settings sheet contains hard-coded values. Assets sheet contains all names of Orchestrator Assets including those of type Credential.**

**Answer: D**

### NEW QUESTION # 179

Which of the following demonstrates the correct syntax for using the Vb.Net "If" Operator?

- A. If condition1 Then valueIfTrue ElseIf valueIfFalse
- **B. If(condition1, valueIfTrue, valueIfFalse)**
- C. valueIfTrue If condition1 Else valueIfFalse
- D. If(condition1, valueIfTrue) ElseIf(valueIfFalse)

**Answer: B**

### NEW QUESTION # 180

.....

With UiPath-ADPv1 study tool, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to UiPath-ADPv1 exam torrent based on constantly changing syllabus and industry development breakthroughs. We also hire dedicated staff to continuously update our question bank daily, so no matter when you buy UiPath-ADPv1 Guide Torrent, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our UiPath-ADPv1 study tool, we will still provide you with the benefits of free updates within a year.
