

Analytics-DA-201 Test Testking, Analytics-DA-201 Valid Torrent

BTW, DOWNLOAD part of PDFBraindumps Analytics-DA-201 dumps from Cloud Storage: <https://drive.google.com/open?id=1xcdellJodXXhuGO2N9XAbiRY8Ltsf0>

Analytics-DA-201 practice material contains questions & answers together with explanations. You can do your Analytics-DA-201 study plan according to your actual test condition. If your time is limited, you can remember the questions and answers for the Analytics-DA-201 preparation. While, if your time is enough for well preparation, you can study and analyze the answers with the help of the Analytics-DA-201 Exam explanations. No matter in which way you study for the Salesforce certification, our Analytics-DA-201 valid pdf dumps will ensure you 100% pass.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Topic 2	<ul style="list-style-type: none"> Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Topic 3	<ul style="list-style-type: none"> ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.
Topic 4	<ul style="list-style-type: none"> ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.

Quiz High Pass-Rate Analytics-DA-201 - Salesforce Certified Tableau Data Analyst Test Testking

The test software used in our products is a perfect match for Windows' Analytics-DA-201 learning material, which enables you to enjoy the best learning style on your computer. Our Analytics-DA-201 certification guide also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our Analytics-DA-201 learning material is that when the user finishes the exercise, he can get feedback in the fastest time. So, users can flexibly adjust their learning plans according to their learning schedule. We hope that our new design of Tableau Data Analyst test questions will make the user's learning more interesting and colorful.

Salesforce Certified Tableau Data Analyst Sample Questions (Q33-Q38):

NEW QUESTION # 33

A Data Analyst is subscribed to several views.
The analyst needs to unsubscribe from the views.
What should the analyst use?

- A. The My Content area of Tableau Server / Cloud
- B. The Notifications area of Tableau Prep
- C. The Shared with Me page
- D. The Data Source page of Tableau Desktop

Answer: A

NEW QUESTION # 34

You have a dataset that contains sales data. The following is a sample of the data.

Month Year	Sales
February 2020	\$20,301
April 2020	\$36,522
January 2020	\$48,971
May 2020	\$44,261
July 2020	\$45,284
June 2020	\$52,982
March 2020	\$58,872
August 2020	\$63,121
October 2020	\$77,777
December 2020	\$83,829
September 2020	\$87,867
November 2020	\$118,448

You need to return a value of true if a month has sales greater than \$50,000. otherwise the formula must return a value of false.
Which two formulas achieve the goal Choose two

- A. [Sales] > 50000
- B. IIF(SUM([Sales]) > 50000, TRUE, FALSE)
- C. MAX([Sales], 50000)
- D. SUM([Sales]) IN (50000)

Answer: A,B

Explanation:

The two formulas that will return a value of true if a month has sales greater than \$50,000, otherwise the formula must return a value of false, are:

B). IIF(SUM([Sales]) > 50000, TRUE, FALSE) D. [Sales] > 50000

The IIF function is a logical function that returns one value if a condition is true, and another value if the condition is false. In this case, the condition is SUM([Sales]) > 50000, which means that the sum of sales for a month is greater than \$50,000. The function will return TRUE if the condition is true, and FALSE if the condition is false.

The comparison operator > is a logical operator that returns TRUE if the left operand is greater than the right operand, and FALSE otherwise. In this case, the operands are [Sales] and 50000, which means that the sales for a month are greater than \$50,000. The operator will return TRUE if the sales are greater than \$50,000, and FALSE otherwise.

The other options are not correct for this scenario. The IN function is a logical function that returns TRUE if a value is in a set of values, and FALSE otherwise. In this case, the value is SUM([Sales]), which is not in the set of values (50000). The function will always return FALSE. The MAX function is an aggregation function that returns the maximum value in a field or expression. In this case, the field or expression is [Sales], 50000, which is not valid syntax. The function will return an error. References:

NEW QUESTION # 35

A Data Analyst has the following view.

Movie Name	Movie Length	Rank of Movie Length
Borat	2:52	1
Shrek	2:52	2
The Hangover	2:52	3
One Hand	2:52	4
The Avengers	2:52	5
The Shaw	2:52	6
Toy Story	2:52	7
Star Wars	2:52	8

The analyst wants to filter the view to show only records that have a movie name starting with the word "The". The analyst must achieve the goal without writing any formulas.

Which type of filter should the analyst use?

- A. Top
- B. General
- C. Wildcard
- D. Condition

Answer: C

NEW QUESTION # 36

Open the link to Book1 found on the desktop. Open the Movie Durations worksheet.

Replace the existing data source with the Netflix_2019 data source.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To replace the existing data source with the Netflix_2019 data source, you need to do the following steps:

* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Movie Durations worksheet.

* Click on the Movie Durations tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the number of movies by duration for the existing data source.

* Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields

and values from the existing data source.

* Click on the drop-down arrow next to the data source name at the top of the page and select Replace Data Source from the menu. This will open a dialog box that allows you to replace your data source with another one.

* Select Netflix_2019 from the list of available data sources and click OK. This will replace your existing data source with the Netflix_2019 data source and update your worksheet accordingly. You may need to fix any broken fields or calculations that result from the replacement.

NEW QUESTION # 37

Open the link to Book1 found on the desktop. Open the Line worksheet.

Modify the chart to show only min and max values of both measures in each region.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To modify the chart to show only min and max values of both measures in each region, you need to do the following steps:

* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Line worksheet.

* Click on the Line tab at the bottom of the workbook to open the worksheet. You will see a line chart that shows the sales and profit for each month by region.

* Drag Month from the Columns shelf to Filters shelf. This will open a dialog box that allows you to filter by different criteria.

* Select Range of Dates from the dialog box. This will show you options to filter by a range of dates or values.

* Select Minimum and Maximum from the drop-down list next to Month. This will filter by the minimum and maximum values of Month for each region. You can also enter specific values or use the sliders to adjust the range.

* Click OK to apply the filter. You will see that the line chart now shows only min and max values of both measures in each region.
