

# Quiz Updated Microsoft - AZ-700 Test Simulator Fee

P.S. Free 2026 Microsoft AZ-700 dumps are available on Google Drive shared by ExamsReviews: <https://drive.google.com/open?id=1I5DSeMhuB1PMfzdn5Sk8Pmv4G-dtLYvI>

To meet the different and specific versions of consumers, and find the greatest solution to help you review, we made three versions for you. Three versions of Designing and Implementing Microsoft Azure Networking Solutions prepare torrents available on our test platform, including PDF version, PC version and APP online version. The trait of the software version is very practical. It can simulate real test environment, you can feel the atmosphere of the Designing and Implementing Microsoft Azure Networking Solutions exam in advance by the software version, and install the software version several times. PDF version of AZ-700 Exam torrents is convenient to read and remember, it also can be printed into papers so that you are able to write some notes or highlight the emphasis. PC version of our AZ-700 test braindumps only supports windows users and it is also one of our popular types to choose.

In recent years, the market has been plagued by the proliferation of AZ-700 learning products on qualifying examinations, so it is extremely difficult to find and select our AZ-700 test questions in many similar products. However, we believe that with the excellent quality and good reputation of our AZ-700 Study Materials, we will be able to let users select us in many products. Our study materials allow users to use the AZ-700 certification guide for free to help users better understand our products better.

## AZ-700 exam torrent & Microsoft AZ-700 study guide - valid AZ-700 torrent

In order to meet the requirements of our customers, Our AZ-700 test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our AZ-700 exam question provide the automatic correcting system to help customers understand and correct the errors. If you want to improve your correct rates of exam, we believe the best method is inscribed according to the fault namely this in appearing weak sports, specific aim ground consolidates knowledge is nodded. Our AZ-700 Guide Torrent will help you establish the error sets. We believe that it must be very useful for you to take your exam, and it is necessary for you to use our AZ-700 test questions.

To prepare for the Microsoft AZ-700 Exam, candidates should have a strong understanding of Azure networking concepts and be familiar with Azure networking tools and features. Microsoft offers several training courses, study materials, and practice exams to help candidates prepare for the exam. Candidates can also gain practical experience by working with Azure networking solutions in a real-world environment.

## Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q81-Q86):

### NEW QUESTION # 81

You have an Azure subscription that contains multiple virtual machines in the West US Azure region. You need to use Traffic Analytics.

Which two resources should you create? Each correct answer presents part of the solution. (Choose two.) NOTE: Each correct answer selection is worth one point.

- A. a Log Analytics workspace
- C a storage account
- B. an Azure Monitor data collection rule
- C. an Azure Monitor workbook
- D. an Azure Sentinel workspace

**Answer: A,D**

### NEW QUESTION # 82

You have an Azure private DNS zone named contoso.com that is linked to the virtual networks shown in the following table.

The links have auto registration enabled.

You create the virtual machines shown in the following table.

You manually add the following entry to the contoso.com zone:

\* Name: VM1

\* IP address: 10.1.10.9

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: No

The manual DNS record will overwrite the auto-registered DNS record so VM1 will resolve to 10.1.10.9.

Box 2: No

The DNS record for VM1 is now a manually created record rather than an auto-registered record. Only auto- registered DNS records are deleted when a VM is deleted.

Box 3: No

This answer depends on how the IP address is changed. To change the IP address of a VM manually, you would need to select 'Static' as the IP address assignment. In this case, the DNS record will not be updated because only DHCP assigned IP addresses are auto-registered.

<https://docs.microsoft.com/en-us/azure/dns/dns-faq-private>

### NEW QUESTION # 83

You have an Azure virtual network named Vnet1 that contains two subnets named Subnet1 and Subnet2. Both subnets contain virtual machines. You create a NAT gateway named NATgateway1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 84

You have the network security groups (NSGs) shown in the following table.

In NSG1, you create inbound rules as shown in the following table.

You have the Azure virtual machines shown in the following table.

NSG2 has only the default rules configured.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□ Explanation:

NO, NO, YES

1. VM3 can connect to port 8080 on VM1 : false, UserRule\_DenyVirtualNetworkInbound
2. VM1 and VM2 can connect on port 9090: false, UserRule\_DenyVirtualNetworkInbound
3. VM1 can connect to VM3 on port 9090: true

**NEW QUESTION # 85**

Case Study 3 - Contoso, Ltd

Overview

Proseware, Inc. is a financial services company that has a main office in New York City and a branch office in San Francisco.

Existing Environment. Hybrid Environment

Proseware has an on-premises Active Directory Domain Services (AD DS) forest named corp.proseware.com that syncs with a Microsoft Entra tenant named proseware.com.

Proseware has an Azure subscription that is linked to proseware.com.

Proseware has an internal certification authority (CA).

Existing Environment. Network Infrastructure

The offices contain the resources shown in the following table.

□ NYCNet connects to Azure by using an ExpressRoute circuit.

SFONet connects to Azure by using a Site-to-Site (S2S) VPN.

Existing Environment. Azure Resources

The Azure subscription contains the virtual networks and subnets shown in the following table.

□ The subscription contains four virtual machines named VM1, VM2, VM3, and VM4. VM1 and VM2 host an app named App1.

VM3 and VM4 host a web app named App2 that is accessed by using a FQDN of app2.proseware.com. Users access app2.proseware.com by using HTTP or HTTPS.

VM1, VM2, and VM4 are connected to SpokeVNet.

The subscription contains Application Gateway resources shown in the following table.

□ The subscription contains an Azure Front Door Standard profile named FD1. FD1 contains a single origin group that targets APPGW1 by using the default endpoint name.

HubVNet connects to NYCNet by using an ExpressRoute gateway named ERGW1.

Planned Changes and Requirements. Planned Changes

Proseware plans to implement the following changes:

- Deploy an Azure Private DNS Resolver named PRDNS1 to HubVNet and link PRDNS1 to SpokeVNet.
- Create a DNS forwarding ruleset named DNSRS1 and associate DNSRS1 with PRDNS1.
- Deploy Azure Virtual Network Manager and implement the following rules:
  - Allow inbound connections on TCP port 3389 from the on-premises networks to SUBNET- JUMPHOSTS.
  - Block inbound connections on TCP port 80 from the internet to SpokeVNet.
  - Ensure that Azure Virtual Network Manager rules take precedence over conflicting NSG rules.
- Deploy two network virtual appliances (NVAs) named NVA1 and NVA2 to HubVNet.
- Deploy a gateway load balancer named LBGW1 to HubVNet.
- Configure LBGW1 to inspect traffic on TCP ports 443, 1433, and 1434 from LBS1 by using NVA1 and NVA2.
- Ensure that all the traffic to App2 is processed by using FD1.

Planned Changes and Requirements. Connectivity requirements

Proseware identifies the following connectivity requirements:

- Minimize the complexity of the Azure Virtual Network Manager deployment.
- Route traffic between NYCNet and SFONet via the ExpressRoute circuit and the S2S VPN.
- Ensure that remote users on Windows 11 devices can connect to HubVNet by using a Point-to-Site (P2S) VPN and their proseware.com credentials.

Planned Changes and Requirements. Security requirements

Proseware identifies the following security requirements:

- Whenever possible, use the internal CA.
- Ensure that all connections routed via APPGW1 use end-to-end encryption.
- Ensure that user connections to Azure-hosted apps use end-to-end encryption.
- Ensure that all inbound internet traffic to app2.proseware.com is routed via FD1.
- Prevent devices that connect to NYCNet from accessing Azure services that use private endpoints.
- Enable the virtual machines that connect to HubVNet and SpokeVNet to access Azure services that use private endpoints.
