This means you can study Plat-101 Exam Engine anytime and anyplace for the convenience these three versions bring.

Salesforce Plat-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Model: This section of the exam measures skills of Marketing Cloud Administrators and covers Salesforce's data model. It involves understanding the relationship between core standard objects such as Accounts, Contacts, Leads, Opportunities, and Cases. The section also evaluates knowledge of ensuring data visibility through features and maintaining data integrity using the right tools in different business scenarios.
Topic 2	<ul style="list-style-type: none">• Reports & Dashboards: This section of the exam measures skills of Marketing Specialists and covers reporting and visualization in Salesforce. It includes describing how reports are built, how dashboards present insights, and how these tools help organizations monitor performance and make informed marketing decisions.

Topic 3	<ul style="list-style-type: none"> • Navigation: This section of the exam measures the skills of Marketing Specialists and covers how users navigate Salesforce. It tests the ability to locate and access necessary information in given scenarios and to identify where different types of Salesforce customizations take place. The emphasis is on practical system navigation that supports marketing operations.
Topic 4	<ul style="list-style-type: none"> • Salesforce Ecosystem: This section of the exam measures skills of Marketing Cloud Administrators and covers the overall Salesforce ecosystem. It focuses on understanding the different resources available for learning and skill development, recognizing how Salesforce Customer 360 products can be applied in real business use cases, and explaining how organizations make use of Salesforce in daily operations. It also highlights awareness of job roles and career opportunities within the Salesforce ecosystem.

Salesforce Certified Platform Foundations Sample Questions (Q25-Q30):

NEW QUESTION # 25

Get Cloudy Consulting (GCC) wants to customize its Sales application's Home tab with additional components.

Outside of the org, where should GCC's Salesforce associate go to collaborate with others on solutions that might resonate with GCC users?

- A. Explore documents In Help and Training.
- B. Search for modules in Trailhead.
- **C. Ask a question In a Trailblazer Community Group.**

Answer: C

Explanation:

The best place for GCC's Salesforce associate to go to collaborate with others on solutions that might resonate with GCC users is to ask a question in a Trailblazer Community Group. A Trailblazer Community Group is a forum where Salesforce users, partners, customers, and employees can connect, share, and learn from each other. There are groups for different topics, regions, industries, and roles. The associate can join a group that is relevant to their needs and interests, and post a question or a discussion to get feedback and ideas from other members. Exploring documents in Help and Training or searching for modules in Trailhead are also useful ways to learn more about Salesforce, but they are not as interactive and collaborative as asking a question in a Trailblazer Community Group.

NEW QUESTION # 26

A Salesforce user at Get Cloudy Consulting informs the company's Salesforce associate they have moved to another department in the organization and no longer need access to Salesforce.

How should the associate change the user's access?

- A. Do nothing; the user may need to access Salesforce in the future.
- B. Delete the user to free up the Salesforce license.
- **C. Deactivate the user to free up the Salesforce license.**

Answer: C

Explanation:

Deactivating the user is the best way to change the user's access and free up the Salesforce license.

Deactivating a user prevents the user from logging in to Salesforce and removes the user from any assigned permission sets, queues, and groups. However, the user's record and related data are still preserved and can be reactivated if needed. Deleting the user would also free up the license, but it would also delete the user's record and related data, which may not be desirable. Doing nothing would not change the user's access or free up the license, and it would pose a security risk if the user still has the login credentials.

NEW QUESTION # 27

A Salesforce associate is asked to add a new employee record to their client. Get Cloudy Consulting.

To which object should they add this record?

- A. Accounts

- B. Contacts
- C. Leads

Answer: B

Explanation:

The Contact object is where the associate should add the new employee record. The Contact object is used to store information about individuals who are associated with an account, such as name, phone, email, title, and role. The Contact object has a lookup relationship with the Account object, which allows the user to select an account that the contact is related to. The Accounts object is used to store information about companies or organizations that are customers, partners, or competitors. The Accounts object does not store information about individual employees. The Leads object is used to store information about potential customers who have shown interest in a product or service, but have not yet been qualified. The Leads object does not store information about existing employees.

NEW QUESTION # 28

What is the maximum number of rows will display?

- A. 3,000
- B. 2,000
- C. 5, 000

Answer: A

Explanation:

The maximum number of rows that a report will display is 3,000. If a report returns more than 3,000 rows, only the first 2,000 rows are displayed and the rest are truncated. To see all the rows, you can export the report to a CSV file

NEW QUESTION # 29

A Salesforce standard profile end user is looking for specific information on an Opportunity record page.

They are overwhelmed by the required scrolling to see the page.

What should the user do to simplify the page to see only what they want?

- A. Remove activities.
- B. Change page layout assignment.
- C. Collapse detail sections.

Answer: C

Explanation:

Collapsing detail sections is a way to simplify the page to see only what the user wants, as it will hide the fields in that section and reduce the scrolling.

NEW QUESTION # 30

.....
