

Hot GICSP Spot Questions, Preparation GICSP Store

As a professional IT exam dumps provider, our website gives you more than just GICSP exam answers and questions, we also offer you the comprehensive service when you buy and after sales. Our valid GICSP dumps torrent and training materials are the guarantee of passing exam and the way to get succeed in IT field. We will send the latest GICSP vce pdf immediately once we have any updating about this dump.

You will feel convenient if you buy our product not only because our GICSP exam prep is of high pass rate but also our service is also perfect. What's more, our update can provide the latest and most useful GICSP exam guide to you, in order to help you learn more and master more. We provide great customer service before and after the sale and different versions for you to choose, you can download our free demo to check the quality of our GICSP Guide Torrent before you make your purchase. You will never be disappointed for buying our GICSP exam questions.

Preparation GICSP Store | New GICSP Test Review

Our GICSP test prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to GICSP study materials, especially to such important GICSP exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the exams and realize your dream of living a totally different life. So if you do want to achieve your dream, buy our GICSP practice materials.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which of the following technologies uses Secure Simple Pairing (SSP) to pair devices?

- A. Bluetooth
- B. ISA100.11a
- C. WirelessHART
- D. Zigbee

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Secure Simple Pairing (SSP) is a security feature used in Bluetooth technology (B) to provide improved authentication and encryption during device pairing.

Zigbee (A), WirelessHART (C), and ISA100.11a (D) use different security mechanisms adapted to industrial wireless environments and do not use SSP.

GICSP training covers Bluetooth SSP as part of wireless security protocols.

NEW QUESTION # 61

How are general purpose Programmable Logic Controllers (PLC) different than smart field devices?

- A. Smart field devices cannot be controlled centrally from a management server
- B. Smart field devices contain their own control logic that cannot be changed
- **C. Programmable Logic Controllers have a more limited purpose and function**
- D. Programmable Logic Controllers are usually microcontroller-based

Answer: C

Explanation:

General-purpose PLCs are designed to perform a wide range of control tasks, programmed to execute complex control logic and interact with multiple I/O points, making them versatile controllers in industrial automation.

In contrast, smart field devices (like smart transmitters or actuators) are typically dedicated to specific measurement or control functions and may have embedded intelligence for self-calibration, diagnostics, or simple control, but with a more limited purpose and function (C).

(A) is incorrect because smart field devices often can be managed remotely.

(B) is true but not a differentiating functional characteristic.

(D) is incorrect; smart field devices often have configurable logic or settings.

GICSP training differentiates these device classes to tailor cybersecurity controls effectively.

NEW QUESTION # 62

At which offset of ~/GIAC/memdump/raw/key_13 does binwalk indicate is the beginning of the binary file?

- A. 0x3400
- B. 0x01d8
- C. 0x3cf1
- D. 0x08e1
- E. 0x5c33
- **F. 0x5b66**
- G. 0x2712
- H. 0x33c1
- I. 0x5df0
- J. 0x0000

Answer: F

Explanation:

In memory forensics and file carving - critical areas in GICSP's Incident Response and Forensic Analysis domain - binwalk is used to analyze binary dumps and identify embedded files or binaries.

Running binwalk against a memory dump file (like key_13) scans for known file signatures or embedded binaries and reports the

offset where such content starts.

According to standard GICSP lab exercises, the beginning of the embedded binary in key_13 is at offset 0x5b66.

This offset marks the start of executable or embedded data critical for reconstructing evidence or analyzing malware payloads in ICS environments.

Understanding how to interpret binwalk output and memory offsets helps ICS security professionals identify malicious code hidden within memory dumps.

NEW QUESTION # 63

Which protocol is commonly used to establish secure communication between remote devices in an ICS network?

Response:

- A. Hypertext Transfer Protocol (HTTP)
- **B. Secure Shell (SSH)**
- C. File Transfer Protocol (FTP)
- D. Simple Network Management Protocol (SNMP)

Answer: B

NEW QUESTION # 64

You are tasked with securing a new Linux-based ICS system. Which of the following actions should be taken during the initial configuration to harden the endpoint?

(Select all that apply)

Response:

- **A. Disable root login over SSH**
- **B. Set strong passwords for all user accounts**
- C. Enable file sharing on all directories
- **D. Remove unnecessary software packages**

Answer: A,B,D

NEW QUESTION # 65

.....

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the Global Industrial Cyber Security Professional (GICSP) (GICSP) exam questions with interest. Itcertmaster uses pictures that are related to the Global Industrial Cyber Security Professional (GICSP) (GICSP) certification exam and can even add some charts, and graphs that show the numerical values. It will not let the reader feel bored with the Global Industrial Cyber Security Professional (GICSP) (GICSP) practice test. They can engage their attention in the GIAC GICSP exam visual effects and pictures that present a lot of.
