

Free PDF 2026 NCP-CI-Azure: Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7)–Valid Learning Mode

P.S. Free 2026 Nutanix NCP-CI-Azure dumps are available on Google Drive shared by Exam-Killer: <https://drive.google.com/open?id=1zWq8qjGzez5IEv442CJQbuKJaIk4wBwx>

If you are worried about your NCP-CI-Azure real exam and you are not prepared so, now you don't need to take any stress about it. Get most updated Nutanix dumps torrent with 100% accurate answers. Our website is considered one of the best website where you can save extra money by getting one-year of free updates after buying the NCP-CI-Azure Dumps PDF files.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 2	<ul style="list-style-type: none"> Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 3	<ul style="list-style-type: none"> Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.
Topic 4	<ul style="list-style-type: none"> Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

NCP-CI-Azure Valid Exam Vce Free & NCP-CI-Azure Reliable Exam Tutorial

Every detail of our NCP-CI-Azure exam guide is going through professional evaluation and test. Other workers are also dedicated to their jobs. Even the proofreading works of the NCP-CI-Azure study materials are complex and difficult. They still attentively accomplish their tasks. Please have a try and give us an opportunity. Our NCP-CI-Azure Preparation guide will totally amaze you and bring you good luck. And it deserves you to have a try!

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which console must be used to deploy a Nutanix cluster on Azure?

- A. Azure Console
- **B. NC2 Console**
- C. Prism Central Console
- D. Prism Element Console

Answer: B

NEW QUESTION # 66

A company wants to start using Nutanix Cloud Clusters (NC2) in Azure. The company has large spend commitments as part of a Microsoft Azure Consumption Commitment (MACC) totaling \$15 million.

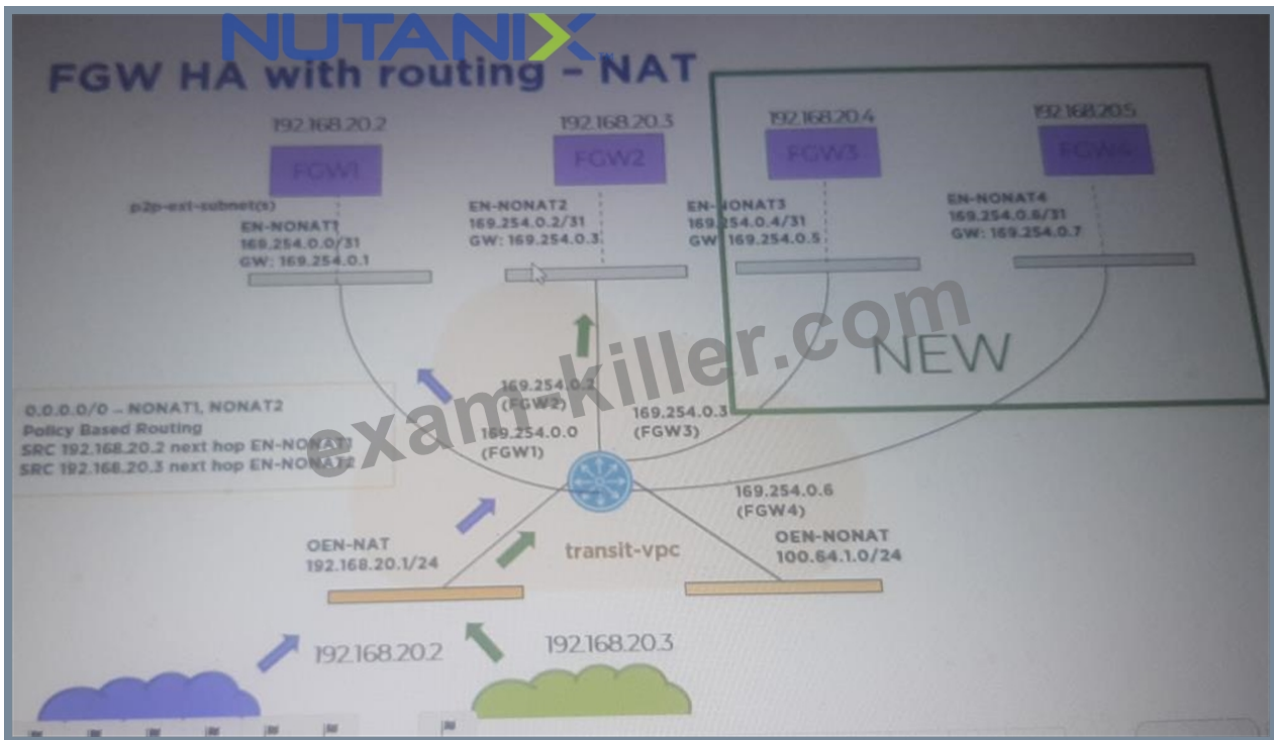

What approach should the administrator take to ensure the Nutanix licensing costs apply to the MACC?

- A. Request a trial directly from Nutanix.
- B. Purchase Nutanix licenses directly from Nutanix and contact Microsoft support.
- C. Leverage existing Nutanix licenses
- **D. Purchase Nutanix licenses through the Azure Marketplace.**

Answer: D

NEW QUESTION # 67

Exhibit

An NC2 on Azure cluster was deployed with two Flow Gateway in HA (FGW1 and FGW2). After a week of use, four bare-metal nodes were added to the NC2 cluster and additional workloads were added. The existing workloads were using floating IPs to allow inbound traffic to communicate with the running workloads on the NC2 cluster.

It was determined that additional bandwidth for north/south traffic would be needed. Two additional Flow Gateways were added (FGW3 and FGW4) from the NC2 portal configuration menu.

The existing workloads prior to expansion on the NC2 cluster will be able to use which Flow Gateways using the NAT traffic path after the expansion?

- A. All four Flow Gateways using a MAC/Hash algorithm.
- **B. Only the Flow Gateway each workload was using prior to expansion.**
- C. All four Flow Gateways.
- D. They will be able to use FGW3 and FGW4 once the NC2 workloads reboots.

Answer: B

Explanation:

In the NC2 on Azure cluster scenario, the existing workloads were using floating IPs for inbound traffic before the addition of new Flow Gateways (FGW3 and FGW4). The NAT traffic path established initially will continue to direct traffic through the originally assigned Flow Gateways (FGW1 and FGW2). The existing workloads will not automatically utilize the new Flow Gateways (FGW3 and FGW4) without a reconfiguration or reboot, which reassigns the NAT paths.

NEW QUESTION # 68

An administrator is tasked to identify the firewall requirement and submit the port request to the requirement team before the clusters deployment.

Which requirement should the administrator ensure is implemented on the corporate firewall?

- **A. Allow bi-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.**
- B. ICMP and connectivity can be disabled between the CVMs, Prism Element, and Prism Central
- C. ICMP can be disabled but the connectivity should be enabled between the CVMs, Prism Element, and Prism Central.
- D. Allow uni-directional internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element and Prism Central.

Answer: A

Explanation:

* ICMP Traffic:ICMP is essential for network diagnostics and troubleshooting, such as ping and traceroute, which help in monitoring the connectivity and health of the network.

* Bi-Directional Traffic:Allowing bi-directional ICMP traffic ensures that all nodes (CVMs, Prism Element, and Prism Central) can both send and receive diagnostic messages, which is crucial for maintaining proper communication and network stability.

NEW QUESTION # 69

When configuring permissions for an Azure subscription, which role is required to delegate minimum permissions for the Azure AD App registration?

- A. Azure Contributor role
- B. Azure Custom role defined by Nutanix
- C. Azure Reader role
- **D. Azure user Access Administrator role**

Answer: D

Explanation:

* Azure AD App Registration: When setting up an application registration in Azure AD, specific permissions are required to delegate access.

* User Access Administrator Role: This role has the necessary permissions to manage user access to

* Azure resources, including delegating permissions for app registrations.

* Comparison of Roles:

* Azure Reader Role: Grants read-only access, insufficient for managing app registrations.

* Azure Contributor Role: Allows creation and management of resources but does not include permissions to manage access.

* Azure Custom Role: While it can be defined to meet specific needs, the User Access Administrator role is predefined to handle access delegation.

* Conclusion: The Azure User Access Administrator role is required to delegate minimum permissions for Azure AD App registration.
