Such failure can lead to the loss of time, money, and confidence.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q73-Q78):

NEW QUESTION # 73
As a Google Workspace administrator for your organization, you are tasked with controlling which third-party apps can access Google Workspace dat a. Before implementing controls, as a first step in this process, you want to review all the third-party apps that have been authorized to access Workspace data. What should you do?

- A. Open Admin Console > Security > API Controls > App Access Control > Manage Third Party App Access.
- B. Open Admin Console > Security > Less Secure Apps.
- C. Open Admin Console > Security > API Controls > App Access Control > Settings.
- D. Open Admin Console > Security > API Controls > App Access Control > Manage Google Services.

Answer: A

Explanation:
Access Admin Console: Log into your Google Workspace Admin Console.
Navigate to Security Settings: Go to Security > API Controls.
Manage Third-Party App Access: Select "App Access Control" and then click on "Manage Third Party App Access".
Review Authorized Apps: Here you will find a list of third-party apps that have been authorized to access your Google Workspace data.
Evaluate Access: Review the permissions and access scopes of each third-party app to determine if they should continue to have access or need to be restricted.
Reference
Google Support: Control which third-party & internal apps access Google Workspace data

NEW QUESTION # 74
Your organization recently bought 1.000 licenses for Cloud Identity Premium. The company's development team created an application in the enterprise service bus (ESB) that will read user data in the human resources information system (HRIS) and create accounts via the Google Directory REST API.
While doing the original test before production use, the team observes a 503 error coming from Google API response after a few users are created The team believes the ESB is not the cause, because it can perform 100 requests per second without any problems. What advice would you give the development team in order to avoid the issue?

- A. Use the domain-wide delegation API to avoid the limitation per account.
- B. Use an exponential back-off algorithm to retry failed requests.
- C. Use the batch request architecture, because it can pack 1,000 API calls in one HTTP request.
- D. Switch from REST API to gRPC protocol for performance improvement

Answer: B

NEW QUESTION # 75
You work for a midsize organization Your compliance and audit learn sees that users are frequently resetting their passwords You must provide accurate information and ensure that the compliance team is informed every time a user changes their password What should you do?

- A. Disable user account recovery so users must contact you before a reset
- B. Check the User's password changed alert in the alert center and include the compliance team in the email notifications
- C. Enable user account recovery and forward any alert to the compliance team through the alert center
- D. Create a new alert by using user log events and check that event Login type is Google password and include the compliance team in the email notifications

Answer: B

Explanation:
Step by Step Comprehensive Detailed Explanation:
* Access the Admin Console: Sign in to your Google Admin console.
* Navigate to the Alert Center: Click on "Security" and then "Alert Center."
* Create New Alert: In the Alert Center, click on "Manage alerts" and then "Add alert rule."
* Configure Alert Rule: Select "User's password changed" as the event type.
* Include Compliance Team: In the alert configuration, add the compliance team's email addresses to the notification recipients.
* Save the Alert: Save the configuration to ensure the compliance team is informed every time a user changes their password.

NEW QUESTION # 76
A retail company has high employee turnover due to the cyclical nature in the consumer space. The increase in leaked confidential content has created the need for a specific administrative role to monitor ongoing employee security investigations. What step should you take to increase the visibility of such investigations?

- A. Validate that the new administrator has access to Google Vault.
- B. Create a 'Custom Role' and add all the Google Vault privileges for a new administrator.
- C. Assign the 'Services Admin' role to an administrator with 'Super Admin' privileges.
- D. Create a 'Custom Role' and add the ability to manage Google Vault matters, holds, searches, and exports.

Answer: D

NEW QUESTION # 77

Today your company signed up for Google Workspace Business Starter with an existing domain name. You want to add team members and manage their access to email and other services. However, you are unable to create new user accounts or change user settings. You need to fix this problem. What should you do?

- A. Upgrade to a Google Workspace Enterprise edition.
- B. Run the Transfer tool to bring unmanaged users to your Workspace account.
- C. Wait 24 hours after signing up for the features to become active.
- D. Check domain ownership in the DNS settings.

Answer: D

Explanation:
To manage users and settings in Google Workspace, you must verify domain ownership. If the domain is not verified, you won't be able to create new user accounts or modify user settings. Checking the DNS settings and completing the domain verification process will resolve the issue and allow you to manage users and services in Google Workspace.
